

Contents

<i>Preface</i>	v
Chapter 1. GEOLOGY AND THE SOURCE OF HEAT	1
1.1. A Revolution in Geology	3
1.1.1. Palaeomagnetism	7
1.1.2. Oceans	10
1.1.3. Sea-floor spreading	13
1.1.4. Plate tectonics	14
1.1.5. Earth history	16
1.2. Plate Tectonics and Geothermal Energy	20
Chapter 2. GEOTHERMAL SYSTEMS	24
2.1. History	24
2.2. Geothermal Systems	27
2.3. Planetary Heat	33
2.4. Important Known Planetary Geothermal Reserves	37
Chapter 3. THE SEARCH FOR GEOTHERMAL RESOURCES	43
3.1. Introduction	43
3.2. Methods of Exploration	45
3.2.1. Search for information	45
3.2.2. Aerial surveys	46
3.2.3. Geological and hydrological survey	47
3.2.4. Geochemical survey	47
3.2.4(i) Chemical geothermometry	48
3.2.4(ii) Rising waters	52
3.2.4(iii) Isotopic techniques in geothermal investigations	54

3.2.4(iv)	Radiogenic noble gases in geothermal tracing	57
3.2.4(v)	The chemistry of geothermal gases	58
3.2.5.	Geophysical survey	59
3.2.5(i)	Thermal methods	60
3.2.5(ii)	Electrical and electromagnetic methods	61
3.2.5(iii)	Gravimetry	64
3.2.5(iv)	Seismic methods	64
3.2.5(v)	Microwave radiometry	65
3.2.5(vi)	Satellites	65
3.2.6.	Drilling	65
 Chapter 4. OBSERVATIONS ON HYDROTHERMAL CONVECTION SYSTEMS		72
4.1.	Vapour-dominated Systems	72
4.1.1.	Larderello subtype	73
4.1.2.	Monte Amiata subtype	75
4.2.	Hot-water Systems	76
4.3.	Exploitation	78
4.4.	Economics	82
4.5.	Breakthroughs	83
 Chapter 5. ARTIFICIAL STIMULATION OF GEOTHERMAL SYSTEMS		86
5.1.	Nuclear Explosives	89
5.2.	Environmental Considerations	92
5.2.1.	Ground movement	92
5.2.2.	Emission of radiation	93
5.2.3.	Additional effects	95
5.3.	Prospects	95
5.3.1.	Corrosion control	96
5.3.2.	Radioactive contents of steam	97
 Chapter 6. THE GEYSERS GEOTHERMAL FIELD		100
6.1.	Geology	102
6.2.	Exploitation of Steam	103
6.3.	The Performance of the Reservoir	105
6.4.	Installations at the Surface	105
6.4.1.	The construction materials	106

6.5. Operation	107
6.5.1. Cooling towers	107
6.5.2. Turbines	107
6.5.3. Electric generators	107
6.5.4. The main transformers	108
6.5.5. Metering	108
6.5.6. The power cycle	109
6.6. Costs	110
 Chapter 7. THE GEOTHERMAL RESOURCES OF NEW ZEALAND	 112
7.1. Wairakei	112
7.1.1. Geology	113
7.1.2. Wells	117
7.1.3. The collection and transmission of steam	117
7.1.4. Wellhead equipment	118
7.1.5. The power plant	121
7.1.6. Safety considerations	124
7.1.7. Efficiency of the operation	124
7.1.8. Environmental effects	124
7.2. Broadlands, A Gas-dominated Geothermal Field	125
7.3. Other Geothermal Fields in New Zealand	128
 Chapter 8. SPACE AND PROCESS HEATING	 130
8.1. Space Heating	132
8.1.1. Distribution	133
8.1.2. Heating homes	134
8.1.3. Agriculture	134
8.2. Process Heating	137
 Chapter 9. OTHER GEOTHERMAL REGIONS	 138
9.1. USA	138
9.1.1. Yellowstone National Park	139
9.1.2. Imperial Valley, California	141
9.1.3. Salton Sea, California	141
9.1.4. Casa Diablo, Mammoth, California	141
9.1.5. Beowawe, Nevada	141
9.1.6. Brady's Hot Springs, Nevada	142
9.1.7. Steamboat Springs, Nevada	142
9.1.8. Clear Lake (Sulphur Bath Mine), California	142

9.1.9. Other Californian prospects	142
9.1.10. Other Nevada prospects	142
9.1.11. Oregon	142
9.1.12. Hawaii	142
9.1.13. Salt domes	142
9.2. Mexico	144
9.3. Iceland	144
9.4. USSR	144
9.5. Elsewhere	145
9.5.1. Great Britain	145
9.5.2. Tibet	145
 Chapter 10. GEOTHERMAL RESOURCES AND WATER	 147
10.1. Characteristics	148
10.2. Multiple-effect and Multistage Distillation Procedures	150
10.3. Cost Management	152
10.3.1. Budget	154
 Chapter 11. GEOTHERMICS IN ITALY	 156
11.1. Isotopic Geothermometry at Larderello	156
11.1.1. The CO ₂ -CH ₄ isotope geothermometer	157
11.1.2. CO ₂ -water vapour isotope geothermometer	159
11.1.3. Seismic noise measurements	159
11.2. Other Areas	160
11.3. Natural Electric Field Surveys in Southern Italy	161
11.3.1. Lipari and Vulcano	161
11.3.2. Ischia	163
11.3.3. Some inferences	163
11.4. Italy—The Overall Picture	164
 Chapter 12. GEOTHERMAL ENERGY AND THE ENVIRONMENT	 167
12.1. The Potential Risks to Ground-water Aquifers	171
12.2. Surficial Waters	171
12.3. The Impact on the Atmosphere	172
12.4. Some Inferences	173
 Chapter 13. RESEARCH INTO GEOTHERMAL RESOURCES: SOME INTERESTING RECENT DEVELOPMENTS	 175

13.1. The Exploration Programme	175
13.2. Assessment of the Geothermal Resource	177
13.2.1. Hot-water heat-exchanging systems	178
13.2.2. Dry geothermal source systems	179
13.3. The Combination of Resources	181
13.3.1. Integrated system	181
13.3.2. The divorced system	182
13.4. Research and Development in New Zealand	182
13.4.1. Ore bodies: their influence as indicators of past geothermal conditions	184
13.4.2. The origins and circulation of water from New Zealand and other countries	185
13.5. Tuscany	186
13.6. Iran	187
Chapter 14. THE FUTURE OF GEOTHERMAL ENERGY	192
14.1. Solar Energy	192
14.2. Ocean Thermal Energy Conversion	194
14.3. Satellite Energy Systems	194
14.3.1. Microwave energy reflectors	195
14.3.2. Orbital power generation	195
14.3.3. Microwave energy transfer	195
14.3.4. Laser energy transmission	195
14.4. Wind Power	196
14.5. Photosynthesis	198
14.6. Recent Developments in Solar Power Utilisation	198
14.7. The Geothermal Resource	199
GLOSSARY	203
BIBLIOGRAPHY	227
Appendix 1. THE MAJOR DIVISIONS OF GEOLOGICAL TIME	229
Appendix 2. SIDE-LOOKING AIRBORNE RADAR (SLAR)	231
<i>Index of Geothermal Localities</i>	<i>233</i>
<i>Author Index</i>	<i>237</i>
<i>Subject Index</i>	<i>241</i>

13.1. The Exploration Programme	175
13.2. Assessment of the Geothermal Resource	177
13.2.1. Hot-water heat-exchanging systems	178
13.2.2. Dry geothermal source systems	179
13.3. The Combination of Resources	181
13.3.1. Integrated system	181
13.3.2. The divorced system	182
13.4. Research and Development in New Zealand	182
13.4.1. Ore bodies: their influence as indicators of past geothermal conditions	184
13.4.2. The origins and circulation of water from New Zealand and other countries	185
13.5. Tuscany	186
13.6. Iran	187
Chapter 14. THE FUTURE OF GEOTHERMAL ENERGY	192
14.1. Solar Energy	192
14.2. Ocean Thermal Energy Conversion	194
14.3. Satellite Energy Systems	194
14.3.1. Microwave energy reflectors	195
14.3.2. Orbital power generation	195
14.3.3. Microwave energy transfer	195
14.3.4. Laser energy transmission	195
14.4. Wind Power	196
14.5. Photosynthesis	198
14.6. Recent Developments in Solar Power Utilisation	198
14.7. The Geothermal Resource	199
GLOSSARY	203
BIBLIOGRAPHY	227
Appendix 1. THE MAJOR DIVISIONS OF GEOLOGICAL TIME	229
Appendix 2. SIDE-LOOKING AIRBORNE RADAR (SLAR)	231
