

CONTENTS

PREFACE XIII

1

SOIL MICROBIOLOGY AND BIOCHEMISTRY IN PERSPECTIVE

- Definition and Scope 2
- Pioneering Contributions 2
- Soil Microbiology in the Early Twentieth Century 3
- Progress and Diversification 4
- Literature of Soil Biology 6
- Entering the Twenty-first Century 7
- References and Suggested Reading 8

2

SOIL AS A HABITAT FOR ORGANISMS AND THEIR REACTIONS

- Soil Genesis 12
- Structural Aspects of Soil 13
- Soil Atmosphere 16
- Soil Water 20
- Redox Potential 24
- Soil pH 25

Soil Temperature	27
Interactions of Environmental Factors	30
References and Suggested Reading	32

3

METHODS FOR STUDYING SOIL MICROORGANISMS

Introduction	36
Collection of Soil Samples	36
Microscopy	38
<i>Cell Counting by Direct Microscopy</i>	41
Calculation of Biovolume and Biomass	43
Chemical Analyses: Signal Molecules	43
<i>Cytoplasmic Constituents</i>	43
ATP	46
<i>Microbial Membrane Components and Fatty Acids</i>	46
Ergosterol	49
<i>Lipopolysaccharides and Cell Walls</i>	49
<i>Growth Rates from Signature Molecules</i>	50
Nucleic Acid Analyses	50
<i>DNA and RNA in Soil</i>	52
<i>The Polymerase Chain Reaction</i>	53
<i>Application of DNA Analyses to Soil</i>	55
<i>Guanine and Cytosine (G+C) Content</i>	57
<i>Thymidine Incorporation into DNA</i>	58
<i>Phylogenetic Analysis of Soil RNA and DNA</i>	58
Physiological Analyses	60
<i>Cultural Studies</i>	60
<i>Isolation and Characterization of Specific Organisms</i>	61
<i>Measurement of Respiration</i>	62
Enzymes and Their Measurements	63
References and Suggested Reading	65

4

COMPONENTS OF THE SOIL BIOTA

Bacteria	71
<i>Nutritional and Other Characteristics</i>	73
<i>Purple Bacteria</i>	74
<i>Green Sulfur Bacteria</i>	76

<i>Actinomycetes</i>	76
<i>Sporogenic Bacilli</i>	78
<i>Cyanobacteria</i>	81
Archaea	82
<i>Extreme Halophiles</i>	84
<i>Methanogens</i>	84
<i>Extreme Thermophiles</i>	84
<i>Thermoacidophilic Crenarchaeotes</i>	86
Eucarya	86
Protozoa	86
<i>Ciliates</i>	86
<i>Zooflagellates</i>	88
<i>Amoebas</i>	88
<i>Slime Molds</i>	89
Chromista	89
<i>Oomycetes</i>	90
<i>Algae</i>	90
Fungi	92
<i>Chytridiomycetes</i>	95
<i>Zygomycetes</i>	95
<i>Ascomycetes</i>	95
<i>Basidiomycetes</i>	96
<i>Deuteromycetous Fungi</i>	97
<i>Lichenized Fungi</i>	98
Animalia	99
<i>Nematodes</i>	100
<i>Mites</i>	101
<i>Collembolans</i>	101
<i>Millipedes</i>	102
<i>Centipedes</i>	102
<i>Annelid Worms</i>	102
<i>Winged Insects</i>	103
Faunal Participation in Soil Dynamics	103
References and Suggested Reading	106

5

OCURRENCE AND DISTRIBUTION OF SOIL ORGANISMS

Geographical and Geological Differences in Biota	110
Microorganisms beneath the Rooting Zone	111

Distribution of Organisms within the Soil Profile	113
Association of Organisms with Plant Roots	115
<i>Substrates Supplied by Roots</i>	117
<i>Rhizosphere Effects Other Than through Substrate Additions</i>	119
Association of Organisms with Plant Leaves and Seeds	122
Plant Litter	123
Influences of Management Practices on Soil Organisms	124
<i>Soil Tillage</i>	124
<i>Biocides and Other Chemicals</i>	125
<i>Clear Cutting and Controlled Burning</i>	126
References and Suggested Reading	127

6

CARBON CYCLING AND SOIL ORGANIC MATTER

Global Carbon Cycle	130
Constituents of Organic Residues	132
<i>Carbohydrates</i>	132
<i>Lignin</i>	135
<i>Nitrogenous Components</i>	138
<i>Lipids</i>	141
<i>Cell Walls of Microorganisms</i>	142
<i>Plant Solubles, Roots, and Root Exudates</i>	143
Formation of Soil Organic Matter	145
Components of Organic Matter	148
<i>Fulvic Acids</i>	149
<i>Humic Acids and Humin</i>	150
Quantity and Distribution of Organic Matter in Soils	152
References and Suggested Reading	154

7

DYNAMICS OF RESIDUE DECOMPOSITION AND SOIL ORGANIC MATTER TURNOVER

Pool Sizes and Reaction Kinetics	158
<i>Establishing Pool Sizes</i>	159
<i>Reaction Kinetics</i>	160
Dynamics of Decomposition	164
Modeling of Plant and Soil Data	166

<i>The Rothamsted Model</i>	167
<i>Models Using Plant Residue Components</i>	168
<i>The Century Model</i>	170
Decomposition in the Absence of Oxygen	173
<i>Methane-Producing Bacteria</i>	173
<i>Methane-Consuming Bacteria</i>	175
<i>Methane Cycling in Soils</i>	176
Sample Calculations Involving Reaction Kinetics and Soil Microbial Activity	177
References and Suggested Reading	178

8

AMMONIFICATION AND NITRIFICATION

The Nitrogen Cycle	182
Mineralization of Nitrogen	182
Nitrogen Metabolism	184
<i>Assimilation of Nitrogen</i>	184
Fate of Ammonium	188
Estimation of Available Soil Nitrogen	190
Nitrification	190
<i>Nitrifying Organisms and Their Biochemical Reactions</i>	191
<i>Heterotrophic Nitrification</i>	193
<i>Factors Affecting Nitrification</i>	194
<i>Effects of Nitrification</i>	195
<i>Inhibition of Nitrification</i>	195
References and Suggested Reading	196

9

THE FATE OF NITRATE

Nitrate Removals	200
Denitrification	200
Organisms Capable of Denitrification	201
Factors Controlling Denitrification	202
<i>Nitrate and Carbon Availability</i>	203
<i>Soil Moisture</i>	204
<i>Soil pH and Temperature</i>	205
Chemodenitrification	205

Magnitude of Nitrogen Loss by Denitrification	206
Procedures for Measuring Denitrification	207
Assimilatory Reduction of Nitrate	208
Nitrate Removal by Leaching	209
Erosional Losses of Nitrate	210
Loss of Nitrogen Oxides to the Atmosphere	211
<i>Nitrous Oxide</i>	211
<i>Nitric Oxide</i>	212
<i>Reactions of Nitrogen Oxides with Methane</i>	213
References and Suggested Reading	214

10

CLOSING THE NITROGEN CYCLE: RETURN OF NITROGEN TO THE SOIL

Global Distribution and Transfers	216
Organisms and Associations in Nitrogen Fixation	218
<i>Free-Living Associative Nitrogen Fixers</i>	219
<i>Cyanobacteria</i>	221
<i>Diazotrophs Associated with Grasses</i>	223
Phototrophic Associations	224
Actinorhizal Associations	226
Fixation in Symbiotic Systems	230
<i>Establishment of the Symbioses</i>	232
Biochemistry of Nitrogen Fixation	236
Nitrogen Fixation in Ecosystem Functioning and Management	239
Inoculation	240
References and Suggested Reading	242

11

MYCORRHIZAL RELATIONSHIPS

Forms and Distribution of Mycorrhiza	246
<i>Mycorrhiza of Orchidaceae and Monotropaceae</i>	247
<i>Arbutoid Mycorrhiza</i>	248
<i>Ericoid Mycorrhiza</i>	248
<i>Ectomycorrhiza</i>	249
<i>Arbuscular Mycorrhiza</i>	252
Physiology and Function of Mycorrhiza	256

<i>Nutrient Uptake</i>	257
<i>Other Effects</i>	259
<i>Carbon Flow in Mycorrhizal-Plant Associations</i>	259
The Study of Mycorrhiza	262
References and Suggested Reading	263

12

THE COMMERCIALIZATION OF SOIL ORGANISMS

Introduction	266
Ecological Impacts of Introduced Organisms	267
<i>Persistence of Added Organisms</i>	268
<i>Gene Transfer in Soil</i>	268
<i>Biological Containment</i>	270
Biocontrol	271
<i>Antagonism</i>	271
<i>Competition</i>	273
<i>Exploitation</i>	273
<i>Biocontrol by Plant-Growth-Promoting Rhizobacteria</i>	274
Bioremediation	274
<i>Bioremediation Technology</i>	277
<i>Degradation of Pesticides and Other Anthropogenic Organics</i>	277
<i>Manipulation of Catabolic Pathways</i>	278
Composting	281
<i>Organisms and the Process of Composting</i>	282
<i>Characteristics of Composts</i>	284
References and Suggested Reading	285

13

PHOSPHORUS TRANSFORMATIONS

Global Aspects	290
The Terrestrial Phosphorus Cycle	292
Solution Phosphorus	293
Solubilization of Inorganic Phosphorus	294
Soil Organic Phosphorus	294
Fluxes of Phosphorus in the Plant Root-Soil System	296
References and Suggested Reading	298

14

SULFUR TRANSFORMATIONS IN SOIL

Role of Sulfur in the Environment	300
<i>Forms of Sulfur in Nature</i>	301
<i>Sulfur Constituents in Microorganisms</i>	303
Mineralization of Organic Sulfur	304
Oxidation of Inorganic Sulfur Compounds	307
<i>Chemotrophic Sulfur Bacteria</i>	308
<i>Heterotrophic Sulfur Microorganisms</i>	309
<i>Dissimilatory Reduction of Inorganic Sulfur</i>	310
References and Suggested Reading	312

15

MICROBIAL TRANSFORMATIONS OF METALS

Introduction	316
Transformations of Iron	316
<i>Transformations of Iron in Nature</i>	318
<i>Anaerobic Corrosion of Iron Pipes</i>	319
<i>Microbial Participation in Ore Leaching</i>	319
Transformations of Manganese	321
Transformations of Mercury	323
<i>Abiotic Transfers and Transformations</i>	324
<i>Biotic Transformations</i>	324
Biomethylations of Other Potentially Toxic Metals	325
References and Suggested Reading	327
