Chapter 1	Introduction	1
Chapter 2	Pest management and IPM	7
Chapter 3	Pests	15
	Why do some insects and mites become pests?	15
	Factors that increase pest pressure	17
	Environmental factors beyond our control	19
	Thresholds	20
	Descriptions of pest species	21
	Resident pests	21
	Transient pests	28
Chapter 4	Biological controls	33
	Definitions	33
	Resident beneficials	33
	Transient species	35
	Generalist predator	35
	Specialist parasite	36
	Introduced/exotic	36
	Descriptions of beneficial species	36
	Brown lacewings	36
	Carabid beetles	37
	Damsel bugs	38
	Shield bugs	38
	Predatory earwigs	38
	Predatory mites	39

Parasitic wasps	39
Ladybird beetles	40
Hoverflies	40
Spiders	41
Chapter 5: Cultural controls	43
Definitions	43
Examples of cultural control	44
Tillage	44
Burning	44
Rotation	44
Variety selection	44
Time of planting	45
Location	45
Weed management	45
Intercropping; trap crops	45
Provision of alternative food sources	46
Tree planting	46
Beetle banks	46
Physical barriers	47
Integration of cultural controls	47
Applying knowledge of cultural controls	47
Chapter 6: Chemical (pesticide) controls	67
Introduction	67
Effects of pesticides on beneficial species	68
How do you decide if a product is safe for beneficial species in agriculture?	69
Pesticides and organics	70
Pesticide options where no selective product is available	71
Pesticides and IPM	71
Chapter 7: Monitoring and getting started	73
What to look for	73
Who should monitor the crops?	74
Selecting your first IPM paddocks	74
How to monitor a paddock	75
When to monitor	77
Recording information	77
Decision making	78
When to use a pesticide and what to use	79
Specific examples of monitoring with some selected scenarios	81

Scenario 1: Canola	81
Scenario 2: Summer brassicas	82
Scenario 3: Cereals	84
Scenario 4: New lucerne	85
Chapter 8: Case studies and examples	87
