Acknowledgements.....	I
Management summary	II
Table of Contents.....	IV
List of Figures	VIII
List of tables.....	IX
Abbreviations	X
0 Preamble	i
1 Soft aspects of R&D development in China, and its strategic relevance.....	1
1.1 Introduction.....	1
1.2 Strategy and emerging markets aspects.....	2
1.2.1 Political and institutional aspects.....	3
1.2.2 Economy opening aspects	5
1.2.3 Investment aspects	7
1.2.4 Consumer aspects	8
1.2.5 Cultural aspects	9
1.2.6 Risk aspects	11
1.2.7 Technological aspects.....	14
1.3 Conclusions	15
2 NXP, company profile	16
2.1 NXP Semiconductors at a glance	16
2.1.1 BU Mobile and Personal / BL Cellular Systems at a glance.....	18
2.1.1.1 Scope and portfolio	19
2.1.1.2 Market arena and positioning	20
2.1.1.3 MST Baseband at a glance	20
2.2 Philips Semiconductors / NXP Semiconductors in China	21
2.3 3G in China and NXP's relationship.....	23
2.4 NXP Semiconductors, BU M&P China strategy – a snapshot	23
2.4.1 Mission / Vision / Strategy of BL Cellular Systems	25
2.4.1.1 Mission	25
2.4.1.2 Aspirations	25
2.4.1.3 Strategy.....	25
2.4.2 Enablers and success factors	25
2.4.3 Market and competitor situation	28
2.4.4 Mobile market in China	30
2.5 Conclusions	31
3 Philips / NXP and MST BB specific R&D situation in China.....	32
3.1 Introduction.....	32
3.2 Theoretical framework	34
3.2.1 Main literature	34
3.2.2 Strategy framework	36
3.2.3 Assessment of competitive advantage of resources.....	38
3.2.4 Assessment of capacity expansion	38
3.2.5 Assessment of R&D network model.....	40
3.2.6 Assessment of strategic papers related to R&D China strategy ...	43
3.3 Survey on Chinese R&D unit	44
3.3.1 R&D site related questions.....	45
3.3.1.1 Character of the knowledge network	45
3.3.1.2 Research and development activities	45
3.3.1.3 Facility age	45
3.3.1.4 Facility size.....	45
3.3.1.5 Facility growth	46

3.3.2	Know-how and technology transfer.....	46
3.3.2.1	Gained know-how in China applied elsewhere.....	46
3.3.2.2	Applied technologies developed in China elsewhere.....	46
3.3.2.3	Transferred technologies developed in China elsewhere.....	46
3.3.2.4	Benefit from know-how brought in by Chinese partners.....	47
3.3.3	Entry mode.....	47
3.3.3.1	Key drivers for the location choice.....	48
3.3.3.2	Character of location decision.....	49
3.3.3.3	Entry mode choice.....	49
3.3.3.4	Facility size at entry.....	49
3.3.3.5	Entry Mission.....	49
3.3.3.6	Entry Motive.....	49
3.3.4	Open questions related to China strategy.....	51
3.3.5	Concluding remarks on the survey.....	52
3.4	Summary and concluding remarks.....	52
4	R&D in China and its implications on domestic R&D centres.....	54
4.1	Theoretical background.....	54
4.2	Cultural variations in knowledge transfer.....	59
4.3	Survey Chinese R&D unit.....	60
4.3.1	Engagement in Chinese R&D unit.....	61
4.3.1.1	Knowledge and information.....	61
4.3.1.2	Preparation by whom and cultural awareness.....	61
4.3.1.3	Perception.....	62
4.3.1.4	Open questions related to China R&D engagement.....	63
4.3.2	Know-how and technology transfer.....	64
4.3.2.1	Benefit from know-how brought in by Chinese partners.....	64
4.3.2.2	One-way technology and know-how transfer.....	64
4.3.3	Entry mode.....	64
4.3.4	Management confidence.....	65
4.3.5	One-Company approach: sharing of information and IP.....	65
4.3.5.1	One company approach – no need for protection against know-how loss.....	65
4.3.5.2	Monitoring the know-how and technology transfer to China.....	65
4.3.5.3	Open questions related to protection or infringement.....	65
4.3.6	What statistics tells us.....	66
4.4	Summary and concluding remarks.....	67
5	Intellectual property rights.....	68
5.1	Introduction.....	68
5.2	IP infringement and procedural aspects.....	70
5.3	Diffusion of proprietary knowledge.....	71
5.4	A thought about ethics.....	72
5.5	Survey on IP protection and infringement.....	75
5.5.1	Protection against know-how loss in production processes.....	75
5.5.2	Protection against know-how loss in technology.....	75
5.5.3	Piracy.....	75
5.5.4	Monitoring the know-how transfer to China.....	75
5.5.5	Successful protection of patent rights.....	75
5.5.6	Open questions related to IP protection or infringement.....	76
5.6	General recommendations.....	77
5.7	Summary and concluding remarks.....	78
6	How to manage a Chinese R&D subsidiary.....	79
6.1	Introduction.....	79

6.2	On completeness of leaders	80
6.3	On portability of leaders	81
6.4	On distance	82
6.5	On expatriates' related issues	83
6.6	On cultural challenges	85
6.7	Survey on HR and management related topics	86
6.7.1	Proportion of expatriates	87
6.7.2	Proportion of Chinese with abroad education	87
6.7.3	Proportion of Chinese with home country education	87
6.7.4	Fluctuation rate	87
6.7.5	Managerial nationality	87
6.7.6	Nationality of senior technical expert	88
6.7.7	Open questions related to HR in China	88
6.7.8	Concluding remarks	90
6.8	Summary and concluding remarks	90
7	KPIs and recommendations	92
7.1	KPI related to soft aspects of R&D developments in China	92
7.1.1	KPI related to political, institutional and financial aspects	92
7.1.2	KPI related to economy opening and financial aspects	94
7.1.3	KPI related to consumer aspects	95
7.1.4	KPI related to cultural aspects	96
7.1.5	KPIs related to risk aspects	97
7.1.6	KPI related to technology	98
7.2	KPI related to strategic questions and R&D manager survey	98
7.2.1	KPI and recommendations related to strategy development and assessment	99
7.2.2	KPI related to communication	100
7.2.3	KPI related to managerial feedback on R&D survey	101
7.2.3.1	KPI related to R&D activities	101
7.2.3.2	KPI related to know-how and technology transfer	102
7.2.3.3	KPI key drivers for the location choice	103
7.2.3.4	KPI related to entry mode	103
7.2.3.5	KPI related to know-how protection	104
7.3	KPI related to intellectual property rights and ethics	105
7.4	KPI and recommendations related to HR and managerial aspects	106
7.5	Concluding remarks	107
8	Summary and recommendations	108
8.1	Summary of results	108
8.2	Recommendations	109
9	Bibliography	112
10	Annex A: Survey on Chinese R&D unit and its relations	118
10.1	Chinese R&D unit	118
10.1.1	Character of the knowledge network	118
10.1.2	Research and development activities	118
10.1.3	Facility age	119
10.1.4	Facility size	119
10.1.5	Facility growth	119
10.2	Know-how and technology transfer	119
10.2.1	Gained know-how in China applied elsewhere	119
10.2.2	Applied technologies developed in China elsewhere	120
10.2.3	Transferred technologies developed in China elsewhere	120
10.2.4	Benefit from know-how brought in by Chinese partners	120
10.3	Entry mode	120
10.3.1	Key drivers for the location choice	120

10.3.2	Character of location decision.....	121
10.3.3	Entry mode choice	121
10.3.4	Facility size at entry	121
10.3.5	Entry Mission	122
10.3.6	Entry Motive.....	122
10.4	IP Protection and Infringement	122
10.4.1	Protection against know-how loss in production processes.....	122
10.4.2	Protection against know-how loss in technology	123
10.4.3	Piracy	123
10.4.4	Monitoring the know-how transfer to China	123
10.4.5	Successful protection of patent rights	123
10.4.6	Open questions related to IP protection or infringement.....	124
10.5	HR related topics	124
10.5.1	Proportion of expatriates	124
10.5.2	Proportion of Chinese with higher education gained outside of China	125
10.5.3	Proportion of Chinese with home country education	125
10.5.4	Fluctuation rate.....	125
10.5.5	Managerial nationality	125
10.5.6	Nationality of senior technical expert.....	125
10.5.7	Open questions related to HR in China	126
10.6	Open questions related to China strategy.....	126
10.7	Summary of statistical data for manager survey	127
11	Annex B: Survey on cooperating with Chinese R&D subsidiary	129
11.1	Engagement in Chinese R&D unit	129
11.1.1	Knowledge and information.....	129
11.1.2	Preparation by whom	129
11.1.3	Perception	130
11.1.4	Open questions related to China R&D engagement.....	131
11.2	Know-how and technology transfer.....	131
11.2.1	Benefit from know-how brought in by Chinese partners	131
11.2.2	One-way technology and know-how transfer.....	132
11.3	Entry mode.....	132
11.3.1	Why did our organisation choose to engage in China?	132
11.3.2	Management confidence.....	132
11.4	One-Company approach: sharing of information and IP	133
11.4.1	One company approach – no need for protection against know-how loss	133
11.4.2	Monitoring the know-how and technology transfer to China	133
11.4.3	Open questions related to protection or infringement.....	133
11.5	Summary of statistical data for employee survey	134
11.6	Correlation data for employee survey	134
12	Annex C.....	136

List of Figures

Figure 1:	Simplified graphical representation of the table of contents and its linkages. Solid lines refer to a content linkage and dashed lines refer to KPI or recommendation linkages.	iv
Figure 2:	Governmental system of PRC, adapted from Spiegel_06a.	4
Figure 3:	H205 sales of NXP Semiconductors across its business units.	16
Figure 4:	H206 sales of NXP Semiconductors across geographic regions.	17
Figure 5:	NXP Semiconductor organizational chart with emphasis on BU Mobile and Personal.	18
Figure 6:	Nexperia roadmap: upgradeable solution from low-end to smart phones.	19
Figure 7:	Organizational Chart of MST Baseband, main focus on Zurich and Shanghai.	21
Figure 8:	NXP manufacturing businesses in China, including joint ventures (JV).	22
Figure 9:	Possible cause linkage diagram of BL Cellular System, based on input from BL Cellular Systems One-Page Strategy.	27
Figure 10:	One-Page Strategy of BL Cellular Systems in 2006.	28
Figure 11:	Process and tools of strategic planning, adapted from Grünig_02.	36
Figure 12:	Proposed assessment of target and actual strategy, seen as part of box 5 in previous figure and associated with the respective feedback loop.	37
Figure 13:	Possible value chain with required resource level which create a cellular phone with advance features at required margin.	38
Figure 14:	R&D capacity expansion decision tree, modified from Porter_98.	39
Figure 15:	Organizational possibilities of international R&D networks, modified from Gassmann_97.	41
Figure 16:	Proposed configuration for global R&D network.	42
Figure 17:	Cost comparison and break-even calculation of European and Chinese R&D centre per employee.	50
Figure 18:	The y-axis shows the ratio of the salary sum of the management divided by the salary sum of the R&D staff. The x-axis assumes values between 1 (being the mean R&D staff salary) and 20 (being the maximum salary paid in the company). The underlying assumption is that management salaries spread linearly between the mean R&D salary and the maximum company salary. Reading the example of the solid line (80% of staff are R&D workers and 20% are management, e.g. Lear_04): The total salary sum of the 20% management crew equals the total salary sum of the 80% R&D staff if the maximum salary paid in the company is 7 fold the average salary paid to R&D.	58
Figure 19:	From knowledge to diffusion, modified from Grant_02.	68
Figure 20:	Questions related to research and development activities, comparison between NXP and literature.	102
Figure 21:	Questions related to know-how and technology transfer; comparison between NXP and literature.	102
Figure 22:	Questions related to key drivers for the location choice; comparison between NXP and literature.	103
Figure 23:	Questions related to entry mode; comparison between NXP and literature.	104
Figure 24:	Questions related to know-how protection; comparison between NXP and literature.	104
Figure 25:	Statistical data of manager survey.	128
Figure 26:	Statistical data of employee survey.	134
Figure 27:	Bravais-Pearson correlation on the rank data of the employee survey.	135
