SLAYMAKER, O.: Geomorphology and Global Sustainability – with an example from the Canadian Cordillera (with 1 figure)	1– 11
JAKOB, M. & M.J. BOVIS: Morphometric and geotechnical controls of debris flow activity, southern Coast Mountains, British Columbia, Canada (with 4 figures and 4 tables)	13– 26
CAINE, N.: Streamflow patterns in the alpine environment of North Boulder Creek, Colorado Front Range (with 6 figures and 5 tables)	27– 42
HAEBERLI, W. & D. VONDER MÜHLL: On the characteristics and possible origins of ice in rock glacier permafrost (with 5 figures and 1 table)	43– 57
ZICK, W.: Bewegungsmessungen 1965–1994 am Blockgletscher Macun I (Unterengadin/Schweiz) – neue Ergebnisse (mit 3 Abbildungen und 6 Tabellen)	59– 71
KING, L.: Dauerfrostboden im Gebiet Zermatt – Gornergrat – Stockhorn: Verbreitung und permafrostbezogene Erschließungsarbeiten (mit 12 Abbildungen und 3 Tabellen)	73– 93
HOLZHAUSER, H. & H.J. ZUMBÜHL: To the history of the Lower Grindelwald Glacier during the last 2800 years – paleosols, fossil wood and historical pictorial records – new results (with 11 plates, 2 maps, 6 figures and 6 tables)	95–127
DE GRAAFF, L.W.S.: The fluvial factor in the evolution of alpine valleys and of ice-marginal topography in Vorarlberg (W-Austria) during the Upper Pleistocene and Holocene (with 14 figures)	129–159
SCHROTT, L.: Some geomorphological-hydrological aspects of rock glaciers in the Andes (San Juan, Argentina) (with 4 figures and 2 tables)	161–173
TROMBOTTO, D.: Fossiler kryogener Formenschatz des südlichen Südamerika (mit 9 Photos und 2 Abbildungen)	175–186
HEINE, K.: The extent of the last glaciation in the Bolivian Andes (Cordillera Real) and paleoclimatic implications (with 6 figures and 2 tables)	187–202
