FOREWORD	xv
PREFACE	xvii

SECTION ONE HYBRID BIONIC SYSTEMS

EMG-Based and Gaze-Tracking-Based Man–Machine Interfaces

FEDERICO CARPI AND DANILO DE ROSSI

I. Introduction	4
II. EMG-Based Interfaces	5
III. Gaze-Tracking-Based Interfaces	12
IV. Final Remark	19
References	19

Bidirectional Interfaces with the Peripheral Nervous System

SILVESTRO MICERA AND XAVIER NAVARRO

I. Introduction	24
II. Organization and Function of the PNS	25
III. Nerve Electrodes: Types and Applications	28
IV. Stimulation and Recording Neural Signals	31
V. Biomedical Applications	33
References	35

Interfacing Insect Brain for Space Applications

GIOVANNI DI PINO, TOBIAS SEIDL, ANTONELLA BENVENUTO,
FABRIZIO SERGI, DOMENICO CAMPOLO, DINO ACCOTO,
PAOLO MARIA ROSSINI, AND EUGENIO GUGLIELMELLI

I. Introduction	40
II. Interfaces	41
III. Sensory and Motor Mapping	44
IV. Proposing a Model of Hybrid Control Architecture	45

V. Conclusions and Outlook.....	46
References.....	47

SECTION TWO **MEET THE BRAIN**

Meet the Brain: Neurophysiology

JOHN ROTHWELL

I. Introduction.....	52
II. How Do Neurons Transmit Information?.....	53
III. Synapses.....	55
IV. The Motor Areas of the Cerebral Cortex.....	57
V. Plasticity of Primary Motor Cortex.....	63
VI. Conclusions.....	64
References.....	65

Fundamentals of Electroencefalography, Magnetoencefalography, and Functional Magnetic Resonance Imaging

CLAUDIO BABILONI, VITTORIO PIZZELLA, COSIMO DEL GRATTA,
ANTONIO FERRETTI, AND GIAN LUCA ROMANI

I. Introduction to Electroencephalography and Magnetoencephalography.....	68
II. Physiological Generation of EEG/MEG Signals.....	69
III. EEG and MEG Techniques Allow the Study of Brain Rhythms.....	73
IV. Functional Magnetic Resonance Imaging.....	74
V. Physiological Generation of Blood Oxygen Level-Dependent Signal.....	75
VI. Typical fMRI Experimental Designs.....	77
VII. BOLD-fMRI Techniques in Clinical Environment.....	77
References.....	78

Implications of Brain Plasticity to Brain–Machine Interfaces Operation: A Potential Paradox?

PAOLO MARIA ROSSINI

I. Introduction.....	82
II. Brain Plasticity.....	83
III. Brain Plasticity and BMI Systems.....	87
IV. Monitoring Plasticity During BMI Control.....	88
V. Conclusions.....	89
References.....	89

SECTION THREE

BRAIN MACHINE INTERFACES, A NEW BRAIN-TO-ENVIRONMENT COMMUNICATION CHANNEL

An Overview of BMIs

FRANCISCO SEPULVEDA

I. Introduction	94
II. Main Elements in a BMI	96
III. BMI Types	99
IV. BMIs and the User's Ability	102
V. Conclusion	104
References	104

Neurofeedback and Brain-Computer Interface: Clinical Applications

NIELS BIRBAUMER, ANDER RAMOS MURGUIALDAY, CORNELIA WEBER,
AND PEDRO MONTOYA

I. Introduction	108
II. Functional Magnetic Resonance Imaging: fMRI-BMI	109
III. BMI in Locked-in Syndrome	110
IV. BMI in Stroke and Spinal Cord Injury	112
V. Conclusion	114
References	115

Flexibility and Practicality: Graz Brain-Computer Interface Approach

REINHOLD SCHERER, GERNOT R. MÜLLER-PUTZ, AND GERT PFURTSCHELLER

I. Introduction	120
II. Graz BCI	120
III. Applications	122
IV. Discussion	127
References	129

On the Use of Brain-Computer Interfaces Outside Scientific Laboratories: Toward an Application in Domotic Environments

F. BABILONI, F. CINCOTTI, M. MARCIANI, S. SALINARI, L. ASTOLFI,
F. ALOISE, F. DE VICO FALLANI, AND D. MATTIA

I. Introduction	134
II. Methodology	135

III. Results.....	142
IV. Discussion	144
References.....	146

Brain–Computer Interface Research at the Wadsworth Center: Developments in Noninvasive Communication and Control

DEAN J. KRUSIENSKI AND JONATHAN R. WOLPAW

I. Introduction.....	147
II. Sensorimotor Rhythm-Based BCI Control.....	149
III. P300-Based BCI Control.....	152
IV. Current and Future Directions.....	154
V. Conclusion	155
References.....	155

Watching Brain TV and Playing Brain Ball: Exploring Novel BCI Strategies Using Real-Time Analysis of Human Intracranial Data

KARIM JERBI, SAMSON FREYERMUTH, LORELLA MINOTTI, PHILIPPE KAHANE,
ALAIN BERTHOZ, AND JEAN-PHILIPPE LACHAUX

I. Introduction.....	160
II. Materials and Methods	161
III. Results.....	161
IV. Discussion	166
References.....	167

SECTION FOUR **BRAIN-MACHINE INTERFACES AND SPACE**

Adaptive Changes of Rhythmic EEG Oscillations in Space: Implications for Brain–Machine Interface Applications

G. CHERON, A. M. CEBOLLA, M. PETIEAU, A. BENGOTXEA,
E. PALMERO-SOLER, A. LEROY, AND B. DAN

I. Introduction.....	172
II. Spontaneous EEG Fluctuations: Where is the Baseline?	172
III. How to Manage Alpha and Mu Oscillations in Space	173
IV. From the Identification Process to the Exploitation of Brain Oscillations in Space	174
V. The Influence of “Top-Down” Dynamics on BCI Approach	176
VI. Gamma EEG Oscillations: A Window into Cognition, Perception, Attention, Binding, or Microsaccadic Eye Movements	179
VII. The Gating of the Somatosensory-Evoked Potentials as a New Tools for BCI.....	179
References.....	183

Validation of Brain-Machine Interfaces During Parabolic Flight

JOSÉ DEL R. MILLÀN, PIERRE W. FERREZ, AND TOBIAS SEIDL

I. Introduction	189
II. Methods	190
III. Experimental Results	193
IV. Discussion	196
References	197

Matching Brain-Machine Interface Performance to Space Applications

LUCA CITI, OLIVER TONET, AND MARTINA MARINELLI

I. Introduction	200
II. Methods: Performance Measures of HBSs	201
III. Materials	202
IV. Results: Matching Interfaces and Devices	205
V. Possible Demonstrators	208
VI. Conclusions	209
References	210

Brain-Machine Interfaces for Space Applications—Research, Technological Development, and Opportunities

LEOPOLD SUMMERER, DARIO IZZO, AND LUCA ROSSINI

I. Introduction	214
II. An Outlook on BMI Research Trends	215
III. Future Manned Space Programs—Planned or Envisioned	217
IV. Next Steps Toward BMIs for Space Applications	220
V. Conclusion	221
References	221
INDEX	225
CONTENTS OF RECENT VOLUMES	231
