List of Participants	V
Preface: Two decades of international workshops and research in aquatic microbial ecology (M. SIMON)	VIII

Identification of microbes by novel techniques

ERNST, A., POSTIUS, C. & BÖGER, P.: Glycosylated surface proteins reflect genetic diversity among <i>Synechococcus</i> species of Lake Constance (with 3 figures and 1 table)	1– 6
DONNER, G., SCHWARZ, K., HOPPE, H.-G. & MUYZER, G.: Profiling the succession of bacterial populations in pelagic chemoclines (with 6 figures)	7– 14
WITTKÉ, R., PEIFFER, S. & KLEINER, D.: Isolation, identification and characterization of bacterial strains capable of heterotrophic sulfur oxidation (with 1 figure and 3 tables)	15– 20

Microbial food webs

ROTHHAUPT, K.O. & GÜDE, H.: Influence of metazoan zooplankton on the microbial community before and after the onset of the spring clear-water phase in Lake Constance (Bodensee) (with 5 figures and 2 tables)	21– 30
RECHE, I., PUGNETTI, A., CRUZ-PIZZARO, L. & CARRILLO, P.: Relationship between bacteria and phytoplankton in a high-mountain lake: Importance of the organic carbon released by pelagic algae for bacterioplankton (with 4 figures and 2 tables)	31– 38
HOPPE, H.G., GÖCKE, K. & ALCÂNTARA, F.: Shifts between autotrophic and heterotrophic processes in a tidal lagoon (Ria de Aveiro, Portugal) (with 3 figures and 3 tables)	39– 52
MEILI, M., KLING, G.W., FRY, B., BELL, R.T. & AHLGREN, I.: Sources and partitioning of organic matter in a pelagic microbial food web inferred from the isotopic composition ($\delta^{13}\text{C}$ and $\delta^{15}\text{N}$) of zooplankton species (with 1 figure and 1 table)	53– 61
MÜLLER, H.: Selective feeding of a freshwater chrysomonad, <i>Paraphysomonas</i> sp., on chroococcoid cyanobacteria and nanoflagellates (with 3 figures and 3 tables) ..	63– 71
CHRISTOFFERSEN, K., BERNARD, C. & EKEBOM, J.: A comparison of the ability of different heterotrophic nanoflagellates to incorporate dissolved macromolecules (with 5 figures and 2 tables)	73– 84
ZIMMERMANN, H. & KAUSCH, H.: Microaggregates in the Elbe Estuary: structure and colonization during spring (with 5 figures)	85– 92
CALLIERI, C., BERTONI, R., AMICUCCI, E., PINOLINI, M.L. & JASSER, I.: Growth rates of freshwater picocyanobacteria measured by FDC: problems and potentials for the estimation of picoplankton organic carbon synthesis (with 3 figures and 4 tables)	93–103
ČOMIĆ, L., RANKOVIĆ, B. & BARBIĆ, F.: Community of fungi in Gruža Reservoir, Yugoslavia (with 2 figures and 2 tables)	105–111

Bacterioplankton growth and nutrient dynamics

BITTL, T. & BABENZIEN, H.D.: Microbial activity in an artificially divided acidic lake (with 7 figures and 2 tables)	113–121
--	---------

EDLING, H. & TRANVIK, L.J.: Effects of pH on β -glucosidase activity and availability of DOC to bacteria in lakes (with 4 figures and 1 table)	123–132
BERTILSSON, S. & ALLARD, B.: Sequential photochemical and microbial degradation of refractory dissolved organic matter in a humic freshwater system (with 4 figures)	133–141
SALA, M.M. & GÜDE, H.: Influence of algae and crustacean zooplankton on patterns of microbial hydrolytic enzyme activities – an experimental approach (with 5 figures and 5 tables)	143–154
SIUDA, W. & GÜDE, H.: Evaluation of dissolved DNA and nucleotides as potential sources of phosphorus for plankton organisms in Lake Constance (with 4 figures)	155–162
BERTONI, R., CALLIERI, C. & CAMPAGNOLI, A.: Coupling of organic carbon synthesis and mineralization from in situ variations in DOC and POC (with 2 figures and 2 tables)	163–170
BAÑERAS, L. & GARCIA-GIL, L.J.: Role of photosynthetic microbial populations in the phosphorus exchange through the oxic-anoxic boundary in a meromictic eutrophic lake (with 9 figures)	171–181
VILA, X., DOKULIL, M., GARCIA-GIL, L.J., ABELLA, C.A., BORREGO, C.M. & BAÑERAS, L.: Composition and distribution of phototrophic bacterioplankton in the deep communities of several central European lakes: The role of light quality (with 8 figures and 1 table)	183–196

Microbes and their activities in sediments

GOEDKOOP, W. & TÖRNBLOM, E.: Seasonal fluctuations in the benthic bacterial production and abundance in Lake Erken: The significance of major abiotic factors and sedimentation events (with 2 figures and 1 table)	197–205
TÖRNBLOM, E.: Bacterial production and total community metabolism in sediments of a eutrophic lake (with 4 figures and 2 tables)	207–216
TULONEN, T., KANKAALA, P. & OJALA, A.: Production of bacteria in the littoral zone of two experimental mesohumic ponds (with 3 figures and 3 tables)	217–225
LEE, G.H., CHOI, G.G. & BAEK, C.B.: Distribution of aerobic/anaerobic saprophytic bacteria in the sediments of the Yellow Sea near Kunsan, Korea (with 4 figures)	227–232
JEONG, W.H., MIN, S.H. & AHN, T.Y.: Nitrate transformation in the sediment of Lake Soyang, Korea (with 6 tables)	233–240
SASS, H., CYPIONKA, H. & BABENZIEN, H.D.: Sulfate-reducing bacteria from the oxic sediment layers of the oligotrophic Lake Stechlin (with 3 figures and 1 table)	241–246
BABENZIEN, H.D. & SASS, H.: The sediment-water interface – habitat of the unusual bacterium <i>Achromatium oxaliferum</i> (with 3 figures)	247–251
CASPER, P.: Methane production in littoral and profundal sediments of an oligotrophic and a eutrophic lake (with 4 figures and 2 tables)	253–259
PEINE, A. & PEIFFER, S.: Neutralisation processes in acid mine lake sediments (with 3 figures and 1 table)	261–267
BOETIUS, A. & LOCHTE, K.: High proteolytic activities of deep-sea bacteria from oligotrophic polar sediments (with 3 figures and 1 table)	269–276
