

Plenum

<i>H. Linke</i>	Begrüßung, Eröffnung	<i>Welcome, Opening</i>	3
<i>H. Winter, B.-R. Höhn</i>	Zahnräder – Stand der Technik	<i>Gears – State of the Art</i>	15
<i>F. Jarchow, W. Predki</i>	Forschungsergebnisse zur Tragfähigkeit von Wälzlagern	<i>Results of Research on Load Capacity of Roller Bearings</i>	33
<i>H. J. Peeken, P. W. Gold</i>	Kupplungen – Stand der Technik	<i>Couplings and Clutches – State of the Art</i>	47

Design/Calculation

<i>F. I. Litvin, J. S. Chen, I. H. Seol, D. Kim, J. Lu, X. Zhao, A. Egelja, A. G. Wang, R. F. Handschuh</i>	Computerized Design and Generation of Gear Drives with Localized Bearing Contact and Low Level of Transmission Errors		63
<i>H. Mitzutani, Y. Ishikawa</i>	Power Loss of Long Addendum Spur Gears		83
<i>M. Weigand, K. Ehrlenspiel</i>	Design to Cost in Gearing		97
<i>M. Dussac, D. Play, C. Bard, D. Rémond</i>	Design of Advanced Mechanical Systems, realistic Gear Dynamic Modelisation		115
<i>W. Predki, F. Jarchow, P. Haag</i>	Selbsthemmende Schneckengetriebe	<i>Self-locking Worm Gear Units</i>	129
<i>U. Häussler, K.-H. Hirschmann, G. Lechner</i>	Neuer Standard für die Verzahnungsberechnung – basierend auf allgemeinen Hüllflächen und objektorientierten Klassenbibliotheken	<i>Calculating Gear Tooth Geometry using Enveloping Surfaces and Object Libraries</i>	161
<i>J. Althaus</i>	Simulation of Load Amplification during Start-Up of Gear Compressors		175

B. M. Tschekin	Conception of Stress-deformed State Estimate of Gearing by the Drive Computer Simulation		187
M. S. Prabhu, D. D. R. Houser	A. Hybrid Finite Element Approach for Analyzing the Load Distribution and Transmission Error in Thin-rimmed Gears		201
V. Baumann, J. Börner, H. Linke, M. Senf	Genau und kostengünstige Berechnung der Last-, Pressungs- und Spannungsverteilung an Stirn- und Kegelradgetrieben	<i>Detailed Low-cost Calculation for Distribution of Load, Pressure and Root Stress at Cylindrical and Bevel Gears</i>	213
G. Miloju, G. Dobre, F. Vişa H. Vintilă	Optimal Design of Two Step Gear Units, regarding the Main Paramaters		227
H. Linke, U. Trempler	Verzahnungsbeanspruchung durch extrem hohe Umfangsgeschwindigkeiten und Temperaturdifferenzen	<i>Gear Loads at extremely high Surface Speed and Temperature Range</i>	245
R. Best, H. Klätschke	Belastungsanalyse manuell geschalteter Fahrzeuggetriebe – Voraussetzung zur beanspruchungsgerechten Dimensionierung	<i>Load Analysis of Manual Transmissions</i>	257
F. Jarchow, B. Naendorf, W. Predki	Dynamisches Verhalten von Industrieplanetengetrieben mit Stirnzahnradern	<i>Dynamic Behaviour of Industrial Gears with Toothed Wheels</i>	273
Th. Bayern, M. Butsch, Ch. Old	New Planetary Gears with Backlash – Design and Experimental Tryout		291
K. Arnaudow	Einfaches Verfahren zur Ermittlung des Übersetzungsverhältnisses zusammengesetzter Planetengetriebe	<i>Simple Method for the Gear Ratio of Combined Planetary Gear Units</i>	313

Load Capacity

B.-R. Höhn, P. Oster, S. Emmert	Micropitting in Case-Carburized Gears – FZG Micro-pitting Test		331
A. J. Goodwin, D. Walton, B. Duke	Some Characteristics of Dry-Running Steel Gears		345
K. Inoue, S. Lyu, G. Deng, M. Kato	Fracture Mechanics Based Evaluation of the Effect of Surface Treatments on the Strength of Carburized Gears		357
J. White, D. Walton	Performance Improvements in Non-Metallic Gears		371
P. Davoli, C. Gorla	Meshing Conditions of Loaded Plastic Gears: Numerical Analysis and Experimental Tests		383
H. Linke, J. Börner	Präzisierte Ergebnisse zur Spannungskonzentration am Zahnfuß	<i>Precise Results of Stress Concentrations in Toothings</i>	397
B.-R. Höhn, K. Neupert, K. Steingröver	Wear Load Capacity and Efficiency of Worm Gears		409
I. Dudas, G. Varga, K. Banyai	Bearing Pattern Localization of Worm Gearing		427
J. Hlebanja, I. Okorn	Investigation of Tooth Surface-durability of Non-involute Spur Gears		443

Industrial Gear Units

W. Zimmermann	Propeller Gearbox for High Altitude Experimental Aircraft STRATO 2C		453
Ch. Changenet, M. Denis, D. Nast	Thermal Study of Railway Reduction Gears		461
B. Somschor, R. Bürkle, S. Gandbhiri, H. Schulz	Konische Verzahnungen in einem neuen spielarmen Robotergetriebe	<i>Conical Gears in Planetary Gear Transmission for Industrial Robots</i>	473

D. A. K. Rakhit	Development of a Star Epicyclic Gearbox for Reduced and Controllable Sub-synchronous Vibrations in Gas Turbogenerator Applications	491
-----------------	--	-----

Production/Heat treatment

F. Klocke, Chr. Escher, M. Vüllers	Dry Hobbing – Efficient and Ecological	509
H. Koga, K. Umezawa	Analysis of Plunge Shaving Process for Helical Gears with Tooth Modification	525
M. Berger	Verschleißschutz für Zahnräder mittels PVD-Verfahren	<i>Wear Protection for Gears by PVD coating</i> 539
P. Schäcke	Hartbearbeitung von Zahnradern – kostenoptimale Varianten	<i>Hard Finishing of Gears – Ideal Cost Variations</i> 545
A. Yoshida, Y. Ohue, I. Karasuno	Evaluation of Surface Durability of Induction-hardened Sintered Powder Metal Rollers and Gears	565
V. I. Goldfarb, V. M. Spiridonov	Design of the Two-Stage Spiroid Gear Units and Gear Motors	579

Reliability

R. Lenk, F. Küçükay	Praxisorientierte Zuverlässigkeitsmethodik in der Automatikgetriebeentwicklung	<i>Reliability Methods for the Automatic Transmission Development based on Practical Experience</i> 589
H. Thum	Lebensdauer, Zuverlässigkeit und Sicherheit von Zahnradpaarungen	<i>Lifetime, Reliability and Safety of Gearpairs</i> 603
Q. Yang	Cumulative Damage Hypotheses in Reliability Design of Gears	615

A. Gabelli, E. Ioannides, E. Miglietta	Increased Life Performance of Rolling Element Bearings in Gearboxes and Trans- missions		631
R. Och	Gear and Spline Measuring Abilities at the Shop Floor		647
E. Bauer, B. Metzner, R. Schaar	Qualitätsanforderungen für Schnellaufgetriebe – Erfah- rungen aus Schadensfällen	<i>Requirements for the Quality of High Speed Gear Units</i>	661
Vibration/Noise			
F. Pfeiffer	Gear Overloads by Genera- tor Short Circuit or Mal- Synchronization		689
Y. Kawasaki, M. Karube, T. Nishioka, A. Kubo, H. Drött	Development of 5th Gear Noise of Automotive Manual Transaxles under High Volume Production		705
F. Pfeiffer	Rattling in Gears – A Review		719
G. A. Matson, D. R. Houser	The Use of Ghost Noise as an Exciter for High Frequen- cy Gear System Dynamics		739
J. Theissen	Schwingsimulation zur Bestimmung der Betriebs- lasten in Achsantrieben von Schienenfahrzeugen für den Personenverkehr	<i>Vibration Simulation for the Development of Load Spectra in Drive Trains of Railways</i>	751
M. Kato, H. Zhou, K. Inoue, K. Shibata, M. Yasunami	Comments on Gearbox Housing Structure for Low Noise		765
K. Umezawa, H. Houjoh, S. Matsumura	Experimental Precise Identifi- cation of Dynamic Behaviour of a Helical Gear System		779
R. L. Platt, R. D. Leopold	A Study on Helical Gear Pla- netary Phasing Effects on Transmission Noise		793

M. Paul, G. Fittigauer, W. Riha	New Technologies on High Performance Low Noise Bevel and Hypoid Gears	809
E. Rigaud, J. Sabot	Effect of Elasticity of Shafts, Bearings, Casing and Coup- lings on the Critical Rota- tional Speeds of a Gearbox	833
J. Leitner, A. Wieser	Cylindrical Toothings with Optimized Stiffness Charac- teristics for Noise Reduction	847
M. Gradu, K. Langenbeck, B. Breunig	Planetary Gears with Improved Vibrational Behaviour in Automatic Transmissions	861

Metrology

M. Weck, Ch. Escher, K. Beulker	Simulation and Optimization of Generation of Tooth Flank Modifications	883
B. Križan	Optimal Gears Addendum Modification Coefficients based on the Friction Loss Minimum	897
Ph. Gagnon, C. Gosselin, L. Cloutier	Analysis of Spur, Helical and Straight Bevel Gear Teeth Deflection by the Finite Strip Method	909
G. K. Nikas	Load Sharing and Profile Modification of Spur Gear Teeth in the General Case of any Flank Geometry	923
W. Beyer, W. Pahl	Advanced Strategies for the Traceable Calibration of Cylindrical Gears and Bevel Gears at PTB	937
M. Sato, O. Kamada, H. Shiroishi	Analysis of Modified Tooth Profile by Crowning Method on Crossed Helical Gearpair	947

<i>H. J. Stadtfeld</i>	Flankenmodifikationen für Kegelräder mittels eines universellen Freiform-Konzepts – UMC	<i>Flank Modifications in Bevel Gears using a Universal Motion Concept</i>	957
<i>J. Yi, Ch. Chenwen</i>	The Effects of Geometry and Cutting Parameters upon Lubrication Performance of Hypoid Gears and Analysis of the Contact Geometry and Sliding Velocities during Meshing of Hypoid Gears		979
<i>G. Bär</i>	Dressing of Helicoids and Surfaces of Revolution		995
<i>K. Fukunaga</i>	Right- Angle Rear Reducer with Helical Gear produced Concave Lead		1005
Quality assurance			
<i>W. Lotze, H.-H. Rauth, F. Ertl</i>	Neue Wege und Systeme für die wirtschaftliche 3D-Verzahnungsprüfung	<i>New Ways and Equipments for Economic 3D Gear Inspection</i>	1021
