

## Table of Contents

<b>Abstract</b> . . . . .	ii
<b>Acknowledgements</b> . . . . .	iv
<b>Dedication</b> . . . . .	v
<b>1. Introduction and short summary of each chapter</b> . . . . .	1
<b>2. PART I- Protein synthesis-degradation a stochastic approach</b> . . . . .	6
2.1. Introduction . . . . .	6
2.2. A general stochastic model of protein synthesis-degradation . . . . .	8
2.3. Generating function technique . . . . .	9
2.4. Two state model . . . . .	10
2.4.1. Describing the model . . . . .	10
2.4.2. Equations which describe the birth death process of the two pro- tein types in steady state . . . . .	11
2.4.3. RESULTS . . . . .	14
2.5. Three state model . . . . .	15
2.5.1. Describing the model . . . . .	15
2.5.2. Equations which describe the birth death process of the 2 types I and II in steady state . . . . .	16
2.5.3. RESULTS: . . . . .	23

2.6. Discussions and conclusions . . . . .	25
2.7. References . . . . .	26
<b>3. Inheritance of Epigenetic Chromatin Silencing . . . . .</b>	<b>29</b>
3.1. Introduction . . . . .	29
3.1.1. Chromatin modifications and the impact on aging . . . . .	29
3.1.2. Chromatin modifications and epigenetic processes . . . . .	30
3.2. A general stochastic model of epigenetic inheritance . . . . .	32
3.2.1. The model . . . . .	32
3.3. Mean field theory . . . . .	34
3.4. Two state model . . . . .	36
3.5. Three state model . . . . .	41
3.6. Conclusion . . . . .	44
<b>References . . . . .</b>	<b>47</b>

4.	PART II- Quantitative transcriptional analysis of aging <i>C.elegans</i>	
4.1	Introduction.....	54
4.2.	Transcriptional profiling to characterize aging and identify genes that might impact healthspan .....	57
4.3.	A search for mid-life gene expression changes that might influence healthspan - Experimental design .....	65
4.4	Identifying the 2000 genes that show greatest variance over time points .....	67
4.5.	Clustering results and interpretation .....	71
4.6.	Specific group of genes analysis-Supervised analysis .....	106
4.7.	Concluding remarks .....	128
4.8.	References.....	129
5.	In the search of molecular signature of sarcopenia in <i>C. elegans</i>	
5.1.	Introduction .....	133
5.2.	Experimental design .....	134
5.3.	Data analysis .....	135
5.4.	Results .....	138
5.4.1.	Sarcopenia signature .....	138
5.4.2.	Gene ontology list .....	151
5.4.3.	Analysis of genes expressed in young muscle .....	161
5.4.4.	Mamalian muscle homologies genes .....	182
5.5.	Conclusions .....	184

References .....	200
App chapters 4 and 5.....	187&202
