

Table of Contents

Summary	i
Zusammenfassung	ii
1 Introduction	1
1.1 Skin: structure and functions	1
1.2 Cutaneous wound healing and cutaneous fibrosis	3
1.2.1 Cutaneous wound healing	3
1.2.1.1 Inflammatory phase	4
1.2.1.2 Tissue regenerative phase/Proliferative phase.....	5
1.2.1.3 Tissue maturation phase.....	5
1.2.1.4 Importance of the early pro-inflammatory and late anti-inflammatory phase for normal wound repair	6
1.2.2 Cutaneous fibrosis	8
1.3 Role of macrophages and fibroblasts in tissue repair, fibrosis and extracellular matrix production	9
1.4 TGFβ1-TGFβRII signaling	10
1.4.1 The role of TGF- β 1 and TGF- β 1 signaling in tissue repair and fibrosis	11
1.4.2 The role of TGF β 1-TGF β RII mediated functions in macrophages	12
1.5 Cre-LoxP system and LysMCre mouse strain	15
2 Aims	16
3 Results	17
3.1 Generation of myeloid cell specific TGFβRII deficient mice	17
3.1.1 Myeloid cell specific deletion of TGF β RII.....	17
3.1.2 Loss of TGF β 1-TGF β RII signaling in TGF β RII ^{Δ/Δ} LysMCre macrophages	19
3.2 Effect of TGFβRII deletion in myeloid cells on thioglycollate induced peritonitis and <i>in vitro</i> macrophage chemotaxis	20
3.2.1 Abolishment of anti-inflammatory effect in TGF β RII ^{Δ/Δ} LysMCre mice during an inflammatory model of thioglycollate induced peritonitis.....	20
3.2.2 Impact of TGF β RII deficiency on <i>in vitro</i> random migration of macrophages	21
3.3 Impact of TGFβRII deficiency in macrophages on the repair process	22
3.3.1 TGF β RII deficiency does not impair kinetics of wound closure but delays wound contraction.....	22
3.3.2 Impaired myofibroblast differentiation and impaired deposition of collagen at the wound site of TGF β RII ^{Δ/Δ} LysMCre mice.....	24
3.3.3 Similar expression of TGF- β 1 in the wounds of control and TGF β RII ^{Δ/Δ} LysMCre mice	28
3.3.4 Loss of TGF β RII in macrophages does not impact neo-angiogenesis.....	28
3.3.5 Loss of TGF β RII in macrophages does not impact infiltration of macrophage into the wound site.....	29

3.3.6	Loss of TGFβRII in macrophages has no influence on inflammatory cytokine induction.....	32
3.3.7	Loss of TGFβRII in macrophages does not impact pro-fibrotic, pro-inflammatory and pro-angiogenic cytokine regulation in isolated wound macrophages.....	32
3.4	Impact of loss of TGFβRII signaling in macrophages on bleomycin induced fibrosis.....	35
3.4.1	Abrogation of TGFβRII in macrophages results in reduced bleomycin induced fibrosis.....	35
3.4.2	Abrogation of TGFβRII in macrophages results in impaired collagen deposition in bleomycin induced fibrosis.....	37
3.4.3	TGFβRII deficiency does not affect the number of myofibroblast and endothelial cells in bleomycin induced fibrosis.....	38
3.4.4	Possible mechanisms involved in the reduced bleomycin induced fibrosis of TGFβRII ^{0/0} LysMCre mice.....	39
3.4.4.1	Reduced infiltration of myeloid cells in bleomycin induced fibrotic skin of TGFβRII ^{0/0} LysMCre mice.....	39
3.4.4.2	Altered dermal inflammatory cytokine profile in bleomycin induced fibrotic skin of TGFβRII ^{0/0} LysMCre mice.....	41
3.4.4.3	Similar expression of pro-fibrotic factors in control and TGFβRII ^{0/0} LysMCre fibrotic dermis.....	44
3.4.4.4	TNF-α expression in fibrotic skin direct correlates with TNF-α expression in TGFβRII deficient macrophage isolated from fibrotic skin.....	46
3.4.4.5	Possible mechanisms of reduced fibrosis and less extracellular matrix deposition in TGFβRII ^{0/0} LysMCre mice.....	46
4	Discussion.....	50
4.1	Macrophage specific deficiency of TGFβRII results in context-dependent effect on cell migration under <i>in vitro</i> and <i>in vivo</i> condition.....	50
4.2	Effect of TGFβRII mediated signaling in macrophage on tissue repair.....	51
4.2.1	TGFβRII mediated signaling in macrophage is involved in wound contraction.....	51
4.2.2	TGFβRII mediated signaling in macrophage does not impact cell recruitment in wound tissue.....	53
4.3	Impact of TGFβRII mediated signaling in macrophage on fibrosis.....	54
4.3.1	TGFβRII mediated signaling in macrophage generates fibrotic response.....	54
4.3.2	TGFβRII mediated signaling in macrophages results in reduced expression of pro-inflammatory factors.....	55
4.3.3	Loss of TGFβRII mediated signaling in macrophage results in reduced expression of TNF-α.....	57
4.4	Hypothetical model for fibrosis mediated by TGFβRII signaling in macrophages.....	59

5	Materials and Methods	60
5.1	Materials	60
5.1.1	Buffers used	60
5.1.2	Chemicals and reagents	61
5.1.3	Commercial Kits	62
5.1.4	Recombinant proteins and enzymes	62
5.1.5	Technical equipments and softwares	62
5.1.6	Other materials	63
5.1.7	Primary antibodies	64
5.1.8	Secondary antibodies	65
5.1.9	Oligonucleotides	65
5.2	Methods	67
5.2.1	Flow cytometry	67
5.2.1.1	Single cell suspension	67
5.2.1.1.1	Isolation of peritoneal cells	67
5.2.1.1.2	Isolation of skin cells from wound tissue and bleomycin fibrotic tissue	67
5.2.1.1.3	Blood leukocyte isolation	67
5.2.1.2	FACS staining and analysis	67
5.2.2	Isolation of genomic DNA	68
5.2.3	Polymerase chain reaction (PCR)	68
5.2.4	RNA extraction, reverse transcription PCR and quantitative real time PCR	68
5.2.5	Separation of epidermis and dermis	69
5.2.6	Culture and maintenance of peritoneal macrophages	69
5.2.7	<i>In vitro</i> random migration and analysis	70
5.2.8	Southern blot	70
5.2.8.1	DNA digestion	70
5.2.8.2	Transfer of DNA on nitrocellulose membrane and pre-hybridization	70
5.2.8.3	Generation of TGF β RII specific probe and purification	71
5.2.8.4	Radioactive probe labeling and purification	72
5.2.8.5	Hybridization and detection	72
5.2.9	Western blot	72
5.2.9.1	Sample preparation and SDS-PAGE (Sodiumdodecyl-sulphate-polyacrylamide-gel electrophoresis)	72
5.2.9.2	Protein-transfer and detection	73
5.2.10	Histology	73
5.2.10.1	Histochemistry, Sirius red and Giemsa staining	73
5.2.10.2	F4/80 staining on cryosections	74
5.2.10.3	α -SMA/CD31 staining	74
5.2.10.4	Gr-1 staining	74
5.2.11	Morphometric analysis	75
5.2.11.1	Quantification of wound healing parameters and bleomycin induced fibrosis	75
5.2.11.2	Quantification of histochemical stainings	75
5.2.11.3	Quantification of immunohistochemical stainings	75
5.2.12	<i>In situ</i> zymography	75
5.2.13	<i>In vivo</i> experiments	76
5.2.13.1	Mouse strains	76
5.2.13.2	Genotyping	76
5.2.13.3	Thioglycollate-induced peritonitis and peritoneal cell harvest	77
5.2.13.4	Wounding	77
5.2.13.5	Bleomycin induced fibrosis	77

5.2.14	Statistical analysis.....	78
6	References.....	79
7	Abbreviations.....	85
8	Acknowledgments	88
9	Erklärung.....	89
10	Curriculum Vitae.....	90
