

Contents

Introduction	1
1 Affine Schubert varieties	3
1.1 Notations for the group	3
1.2 Schubert varieties	3
1.3 Affine Kac-Moody groups	4
1.4 MV-cycles	5
2 Buildings and galleries	6
2.1 Buildings	6
2.2 One-skeleton galleries	8
2.3 Minimal one-skeleton galleries	10
2.4 Positively folded galleries	11
2.5 Root operators	13
2.6 Characterization of simply-laced crystals	14
3 Bott-Samelson varieties	17
3.1 A Bott-Samelson type variety	17
3.2 Cells	19
3.3 Dimension of C_δ	20
4 Cells in type A	21
4.1 Cell dimension	21
4.2 Cells and MV-cycles I	24
5 Cell combinatorics in type A	29
5.1 The plactic monoid and bumping	29
5.2 Cells and MV-cycles II	30
Bibliography	45
