Preface	vii
Acknowledgements	viii
Abbreviations and symbols	xviii
Bibliographical abbreviations	xviii
Assyriological abbreviations	xix
Astronomical abbreviations and symbols	xxi
Names of the planets, zodiacal signs, months, regnal years and units	xxv
1 Procedure texts	1
1.1 The corpus of mathematical astronomy	1
1.1.1 History	1
1.1.2 Purpose and applications	2
1.1.3 Discovery and historiography	3
1.2 Selection of the texts	5
1.3 Archaeological and archival aspects	6
1.3.1 Babylon	6
1.3.2 Uruk	8
1.4 Physical characteristics	10
1.5 Transmission and evolution	12
1.6 Approaching procedure texts	12
1.6.1 Translation issues	13
1.6.2 Procedure texts and ‘scientific discourse’	14
1.7 Didactical, rhetorical and comparative aspects	15
1.7.1 Rhetorical aspects	15
1.7.2 Other Mesopotamian instructional texts from the first millennium BC	16
2 Mathematical concepts – from numbers to computational systems	17
2.1 The sexagesimal place-value system	17
2.2 Arithmetical operations	19
2.2.1 Identity of quantities and symmetry of operations	19
2.2.2 Addition	19
2.2.2.1 ‘To add’	20
2.2.2.2 ‘To append’	21
2.2.2.3 ‘To accumulate’	21
2.2.3 Subtraction	22
2.2.3.1 ‘To tear out’	22
2.2.3.2 ‘To subtract’	22
2.2.3.3 ‘To diminish’	23
2.2.3.4 ‘To deduct’	24
2.2.4 Multiplication	24
2.2.4.1 ‘To go Q_1 times Q_2 ’	24

2.2.4.2	'To raise'	25
2.2.5	Division and reciprocals	25
2.2.6	The copula <i>u</i> , 'and', as a placeholder for arithmetical operations	26
2.2.7	Diachronic overview of arithmetical terms and a comparison with mathematical texts	26
2.3	Other elementary operations	27
2.3.1	Introducing initial data	27
2.3.2	Conditions	28
2.3.2.1	Conditions involving a threshold value	28
2.3.2.2	Conditions involving the change of a quantity or the relative position	28
2.3.3	Coordination	29
2.4	Additive and subtractive numbers	29
2.5	Coordinate systems	32
2.5.1	The event frame	32
2.5.2	Temporal coordinates	32
2.5.2.1	The calendar	32
2.5.2.2	Time degrees	32
2.5.2.3	Mean tithis	33
2.5.3	Angular coordinates	33
2.5.3.1	Zodiacal position (<i>B</i>)	33
2.5.3.2	Distance to the ecliptic (<i>E</i>)	34
2.6	Procedures and algorithms	35
2.6.1	Composite procedures and subprocedures	35
2.6.2	Initial and final statements of a procedure	35
2.6.3	Procedures as verbal representations of algorithms	36
2.6.3.1	Example-based and abstract formulation	36
2.6.3.2	Deficient procedures	37
2.6.4	Representing procedures, algorithms and functions	37
2.6.4.1	Columns, functions and parameters	37
2.6.4.2	Template procedures	37
2.6.4.3	Formulaic and graphical representations	38
2.6.4.4	Flow charts	39
2.6.5	Purposes of the algorithms	39
2.6.5.1	Computing or updating a function	39
2.6.5.2	Verification	40
2.6.5.3	Theoretically oriented procedures	40
2.6.6	The basic period relation of a function	40
2.6.7	Interpolation	40
2.6.8	Zigzag functions of the event number	42
2.6.8.1	Templates and algorithm	42
2.6.8.2	Period relations	44
2.6.8.3	Elementary steps	45
2.6.8.4	Net differences for intervals longer than 1 synodic cycle	46
2.6.8.5	Checking rule for function values on opposite branches	46
2.6.8.6	Empirical aspects and the construction of a zigzag function	46
2.6.9	Zigzag functions of the zodiacal position	47
2.6.10	Step functions for the synodic arc	47
2.6.10.1	Updating the zodiacal position with a step function for the synodic arc	48
2.6.10.2	Period relation and mean synodic arc	51
2.6.10.3	Elementary steps	51
2.6.10.4	Net displacements for intervals longer than 1 synodic cycle	52
2.7	Computational systems	54

3	Planets	55
3.1	Planetary phenomena	55
3.1.1	Apparent motion	55
3.1.2	Synodic phenomena	56
3.2	Composition of the tablets	58
3.3	Algorithms for the planets	58
3.3.1	Algorithms for the zodiacal position (B)	59
3.3.1.1	Updating B with the synodic arc (σ)	59
3.3.1.2	Total synodic arc (Σ)	59
3.3.1.3	Solar-distance principle	60
3.3.1.4	Period relations and mean synodic arc	60
3.3.1.5	Net displacements for various intervals	61
3.3.2	Algorithms for the time (T)	61
3.3.2.1	Updating T with the synodic time (τ)	61
3.3.3	Subdivision of the synodic cycle	63
3.3.3.1	Pushes and daily displacements	63
3.3.3.2	Subdivisions involving constant values of the daily displacement	65
3.3.3.3	Angular pushes between primary phenomena in type-A systems	67
3.3.3.4	Interpolation schemes for ν	67
3.3.4	Distance to the ecliptic	68
3.4	Mercury	68
3.4.1	Synodic cycle	68
3.4.2	System A_1	69
3.4.2.1	Updating B with the synodic arc	69
3.4.2.2	Updating T with the synodic time	69
3.4.2.3	Subdivision of the synodic cycle	70
3.4.2.4	Omitted phenomena	70
3.4.2.5	Net displacements for various intervals	71
3.4.3	System A_2	71
3.4.3.1	Updating B with the synodic arc	71
3.4.3.2	Updating T with the synodic time	72
3.4.3.3	Subdivision of the synodic cycle	72
3.4.3.4	Net displacements for various intervals	73
3.4.4	System A_3	73
3.4.4.1	Updating B with the synodic arc	73
3.4.4.2	Updating B with the net displacement for 3 cycles	74
3.4.4.3	Net displacements for other intervals	74
3.4.4.4	Updating T with the synodic time	75
3.4.4.5	Subdivision of the synodic cycle	75
3.4.5	Unidentified computational systems	75
3.5	Venus	75
3.5.1	Synodic cycle	75
3.5.2	System A_0	75
3.5.2.1	Updating B with the synodic arc	76
3.5.2.2	Updating T with the synodic time	76
3.5.2.3	Net displacements for various intervals	76
3.5.3	System A_3	76
3.5.3.1	Updating B with the synodic arc	76
3.5.3.2	Net displacements for various intervals	77
3.5.4	Systems A_1 and A_2	77
3.5.4.1	Updating B with the synodic arc	77
3.5.4.2	Net displacements for various intervals	78
3.5.4.3	Updating T with the synodic time	79
3.5.4.4	Subdivision of the synodic cycle	79
3.5.5	System C_3	79
3.5.5.1	Updating B and T	79
3.5.5.2	Subdivision of the synodic cycle	79

3.5.6	System C_4	80
3.5.6.1	Updating B and T	80
3.5.6.2	Subdivision of the synodic cycle	80
3.5.7	Unidentified computational systems	80
3.5.7.1	Subdivision of the synodic cycle	80
3.6	Mars	83
3.6.1	Synodic cycle	83
3.6.2	System A	83
3.6.2.1	Updating B with the synodic arc	83
3.6.2.2	Updating T with the synodic time	84
3.6.2.3	Subdivision of the synodic cycle	84
3.6.2.4	Net displacements for various intervals	88
3.6.3	System B	89
3.6.3.1	Updating B and T	89
3.7	Jupiter	89
3.7.1	Synodic cycle	89
3.7.2	System A	90
3.7.2.1	Composition of the tablets	90
3.7.2.2	Updating B with the synodic arc	90
3.7.2.3	Updating T with the synodic time	91
3.7.2.4	Net displacements for various intervals	91
3.7.2.5	Rising time at FA and setting time at LA	91
3.7.2.6	Subdivision of the synodic cycle	92
3.7.3	Systems A_1 and A_2	95
3.7.3.1	Updating B with the synodic arc	95
3.7.3.2	Subdivision of the synodic cycle	95
3.7.4	System A'	96
3.7.4.1	Updating B with the synodic arc	96
3.7.4.2	Updating T with the synodic time	96
3.7.4.3	Subdivision of the synodic cycle	97
3.7.4.4	Net displacements for various intervals	97
3.7.5	System A''	98
3.7.5.1	Updating B with the synodic arc	98
3.7.6	System A'''	98
3.7.6.1	Updating B with the synodic arc	99
3.7.6.2	Setting time at LA and rising time at FA	99
3.7.7	System A_6	99
3.7.7.1	Updating B with the synodic arc	99
3.7.7.2	Net displacements for various intervals	99
3.7.8	System B	100
3.7.8.1	Updating B with the synodic arc	100
3.7.8.2	Updating T with the synodic time	100
3.7.8.3	Algorithm involving τ and Π	101
3.7.9	System B'	101
3.7.9.1	Updating B with the synodic arc, T with the synodic time	101
3.7.9.2	Net differences for various intervals	102
3.7.10	Unidentified computational systems	102
3.7.10.1	Subdivision of the synodic cycle	102
3.7.10.2	Distance to the ecliptic	105
3.7.10.3	Procedures involving trapezoids	106
3.8	Saturn	106
3.8.1	Synodic cycle	106
3.8.2	System A	106
3.8.2.1	Updating B with the synodic arc	107
3.8.2.2	Updating T with the synodic time	107
3.8.2.3	Net displacements for various intervals	107
3.8.2.4	Subdivision of the synodic cycle	108

3.8.3	System A'	108
3.8.4	Systems B, B' and B''	108
3.8.4.1	Updating B and T	109
4	Moon	111
4.1	Lunar phenomena	111
4.1.1	Apparent motion	111
4.1.2	Lunations	112
4.1.3	Eclipses	113
4.1.4	Lunar Six intervals	113
4.2	Lunar systems K, A and B	115
4.3	System K	116
4.3.1	Zodiacal position of the Moon (B)	116
4.3.2	Duration of the night (D)	117
4.3.3	The Moon's distance to the ecliptic? (E)	117
4.3.4	Duration of the synodic month (G)	117
4.3.5	Time of the lunation (M)	118
4.3.6	Lunar Six intervals	119
4.3.6.1	Step 1. Preliminary monthly difference d_1	119
4.3.6.2	Step 2. Optional subtractive correction d_2 corresponding to a shift by 1^d	120
4.3.6.3	Step 3. Correction d_3 involving M and D	121
4.3.6.4	Step 4. Correction d_4 involving E	121
4.4	System A	121
4.4.1	Composition of the tablets	122
4.4.2	Algorithms for lunar system A	123
4.4.2.1	Algorithms for the synodic tables, template tables and eclipse tables	123
4.4.2.2	Algorithms for the daily motion tables	124
4.4.2.3	Other algorithms for lunar system A	124
4.4.3	Duration of 223 synodic months (Φ)	125
4.4.4	Zodiacal position of the Moon (B)	128
4.4.5	Duration of day (C) and night (D)	130
4.4.6	Distance to the ecliptic (E)	133
4.4.7	Eclipse magnitude (Ψ)	139
4.4.8	Eclipse magnitude (Ψ')	141
4.4.9	The Moon's daily displacement along the zodiac (F)	143
4.4.10	The Sun's daily displacement along the zodiac ($v_{\odot}$)	145
4.4.11	Duration of the synodic month (G)	145
4.4.12	Duration of 6 synodic months (W)	152
4.4.13	Duration of 12 synodic months (Λ)	153
4.4.14	Zodiacal correction to G (J)	155
4.4.15	Zodiacal correction to W (Z)	156
4.4.16	Zodiacal correction to Λ (Y)	157
4.4.17	Monthly, 6-monthly and 12-monthly differences of the time of the lunation (K , $K^{(6)}$, $\tilde{K}$)	158
4.4.18	Time of the lunation (M , $M^{(6)}$, $\tilde{M}$)	159
4.4.19	Lunar Six intervals	161
4.4.19.1	Step 1. Time interval between lunation and Lunar Six event (N)	163
4.4.19.2	Step 2. Zodiacal displacement of the Moon ($\Delta B_{\odot}$) and the Sun ($\Delta B_{\odot}$)	165
4.4.19.3	Step 3. Elongation of the Moon (η)	166
4.4.19.4	Step 4. Zodiacal position of the Moon ($B'_{\odot}$) and the Sun ($B'_{\odot}$) at the Lunar Six event ...	167
4.4.19.5	Step 5. Coefficient 'for the zodiac' (q')	168
4.4.19.6	Step 6. Moon's distance to the ecliptic at the Lunar Six event (β')	169
4.4.19.7	Step 7. Coefficient 'for height and depth' (r')	170
4.4.19.8	Step 8. Contribution to Lunar Six resulting from Moon's distance to ecliptic (R)	172
4.4.19.9	Step 9. Contribution to the Lunar Six resulting from the lunar elongation (Q)	172
4.4.19.10	Step 10. Disk correction (Δ)	173
4.4.19.11	Step 11. Assembling the Lunar Six interval	174
4.4.19.12	Step 12. Optional renaming of $\check{S}U_2$, NA, ME or GI_6	175

4.4.19.13	Step 13. Optional shift of the Lunar Six event by 1^d	178
4.5	System B	178
4.5.1	Composition of the tablets	178
4.5.2	Algorithms for lunar system B	179
4.5.2.1	Algorithms for synodic tables, template tables and eclipse tables	179
4.5.2.2	Algorithms for the daily motion tables	179
4.5.2.3	Other algorithms	180
4.5.3	Synodic arc of the Moon and the Sun (A)	180
4.5.4	Zodiacal position of the Moon (B) and the Sun ($B_{\odot}$)	181
4.5.5	Duration of daylight (C) and night (D)	182
4.5.6	The Moon's distance to the ecliptic (E)	183
4.5.7	Eclipse magnitude (Ψ'')	183
4.5.8	Monthly difference of eclipse magnitude ($\Delta\Psi'$)	185
4.5.9	Eclipse magnitude (Ψ')	186
4.5.10	The Moon's displacement along the zodiac per day (F) or time degree (F')	188
4.5.11	The Sun's daily displacement along the zodiac ($v_{\odot}$)	189
4.5.12	Duration of the synodic month (G)	190
4.5.13	Monthly difference of J (H)	191
4.5.14	Correction to the synodic month (J)	192
4.5.15	Corrected duration of the synodic month (K)	193
4.5.16	Time of the lunation with respect to the preceding midnight (L)	193
4.5.17	Time of the lunation with respect to sunrise or sunset (M)	194
4.5.18	Lunar Six intervals	195
4.5.18.1	Step 1. Time interval between lunation and Lunar Six event (N)	196
4.5.18.2	Step 2. Zodiacal displacement of the Moon (ΔB_{p}) and the Sun ($\Delta B_{\odot}$)	198
4.5.18.3	Step 3. Corrected elongation of the Moon (O)	199
4.5.18.4	Step 4. Zodiacal position of the Moon (B'_{p}) and the Sun ($B'_{\odot}$) at the Lunar Six event	199
4.5.18.5	Step 5. Coefficient 'for the zodiac' (q)	200
4.5.18.6	Step 6. Moon's distance to the ecliptic (β')	200
4.5.18.7	Step 7. Coefficient 'for height and depth' (r)	200
4.5.18.8	Step 8. Contribution to Lunar Six resulting from Moon's distance to ecliptic (R)	201
4.5.18.9	Step 9. Contribution to Lunar Six resulting from the Moon's elongation (Q)	201
4.5.18.10	Step 11. Assembling the Lunar Six interval	201
4.5.18.11	Step 12. Optional renaming of ŠU_2 , NA, ME or GI_6	202
4.5.18.12	Step 13. Optional shift of the Lunar Six event by 1^d	202

No. 80	Computations involving eclipse magnitude	465
No. 81	(ACT 207e) Computing Λ from Φ	466
No. 82	(‘Saros Text’) Various procedures involving Φ and G	470
No. 83	Computations involving F	478
No. 84	Computing G from Φ	481
No. 85	Computing G from Φ	482
No. 86	Various procedures	483
No. 87	Computing Λ from Φ	484
No. 88	(ACT 207) Computing W from Φ	486
No. 89	Computing W from Φ	487
No. 90	Computing W from Φ	488
No. 91	Interpolation scheme	489
No. 92	Various procedures	490
5.3.3	System B	492
No. 93	(ACT 202) Various procedures	492
No. 94	(ACT 221) Computations involving F^*	495
No. 95	(ACT 210) Various procedures for the Moon, Jupiter (?) and Saturn	496
No. 96	(ACT 211) Various procedures	502
No. 97	Various procedures	506
5.3.4	Unidentified systems	512
No. 98	(ACT 200h) Eclipses	512
No. 99	(ACT 200g) Eclipses	513
No. 100	Eclipses	515
No. 101	Computations involving a solar quantity	517
No. 102	Various procedures	518
Appendices		523
A	Other instructional texts from the first millennium BC	523
B	Mean values of the synodic time and the synodic arc for the Moon and the planets	525
C	Multiple transitions of the zonal boundaries of a step function for the synodic arc	527
D	Interpolation schemes for lunar system A	529
D.1	Interpolation scheme for computing W from Φ	529
D.2	Interpolation scheme for computing Λ from Φ	531

E	Rising and setting times	533
E.1	Rising or setting time of a short arc near the ecliptic	533
E.2	Effects of refraction and use of disk rims on rising and setting times	535
E.3	Contributions to the disk correction in lunar system A	535
E.4	Temporal order of the Lunar Six intervals near Full Moon	537
F	Photographs of the cuneiform tablets	539
Glossary		595
	Akkadian glossary	595
	Sumerograms and Akkadian abbreviations	599
Bibliography		603
Indices		609
	Index of tablets and fragments	609
	Concordance with <i>ACT</i>	610
	Name index	611
	Subject index	612
