Preface

v

Section 1: Introductory Text and Sources of Stem Cells for Skeletal Tissue

- 1. Endothelial Progenitor Cell-based Therapy for Orthopaedic Regenerative Medicine** 3
Ru Li, Aaron Nauth, Nizar Mahomed, Darrell Ogilvie-Harris and Emil Schemitsch
- 2. Transplanted Bone Marrow Stromal Cells and Bone Tissue Regeneration** 22
Qisheng Tu and Jake Chen
- 3. Isolation and Purification Methods for Mesenchymal Stem Cells** 44
Kristen P. McKenzie, Dana C. Mayer and Jane E. Aubin
- 4. The Human Nose Offers a New Stem Cell Source for Bone Injuries** 64
Pierre Layrolle, Bruno Delorme, Francois Feron and Emmanuel Nivet
- 5. Multipotential Mesenchymal Stromal/Stem Cells in Skeletal Tissue Repair** 82
Agnieszka Arthur, Andrew Zannettino and Stan Gronthos
- 6. Adipose-derived Stem Cells (ASCs) and Bone Repair: An Overview in Regenerative Medicine** 103
Natalina Quarto and Michael T. Longaker

Section 2: Cellular and Molecular Aspects

- 7. The Modulation of Skeletal Stem Cell Function Through Nanoscale Topography**
 Manus J.P. Biggs and Laura E. McNamara

125
- 8. Myostatin (GDF-8) Signaling in Progenitor Cells and Applications to Bone Repair**
 Moataz N. Elkasrawy and Mark W. Hamrick

145
- 9. c-Jun-centred Regulatory Network of Signalling Pathways in Bone Stem Cells and Applications to Bone Repair**
 Jon Fernández-Rueda, Emma Jakobsson, Akaitz Dorronsoro and César Trigueros

161
- 10. Endothelial Progenitor Cells, Lnk and Bone Fracture Healing**
 Tomoyuki Matsumoto and Takayuki Asahara

180
- 11. Stromal Cell-derived Factor 1/CXCR4 Signaling, Stem Cells, and Fractures**
 Hiromu Ito

200
- 12. Chromatin Remodeling and Transcriptional Control of Mesenchymal Cells Towards the Osteogenic Pathway**
 Marom R. and Benayahu D.

214

Section 3: Conditions, Applications, Treatments and Repairs

- 13. Use of Chondrogenic Progenitor Cells in Osteoarthritis**
 Boris Schminke, Nicolai Miosge and Hayat Muhammad

231
- 14. Allogeneic Mesenchymal Stem Cells for Bone Tissue Engineering: Clinical and Basic Research on Perinatal Hypophosphatasia**
 Hiroe Ohnishi, Yoshihiro Katsube, Mika Tadokoro, Shunsuke Yuba and Hajime Ohgushi

245
- 15. Haematopoietic Stem Cell Transplantation in Autosomal Recessive Osteopetrosis**
 Anna Teti and Ansgar S. Schulz

267
- 16. Human Fetal Stem Cells and Osteogenesis Imperfecta: Rodent Studies**
 Gemma N. Jones and Pascale V. Guillot

289

17. G-CSF-mobilized Haploidentical Peripheral Blood Stem Cell Transplantation in Childhood Osteopetrosis	307
Fikret Arpacı and Asli Selmin Ataerğın	
18. Combining Osteochondral Stem Cells and Biodegradable Hydrogels for Bone Regeneration	326
Matilde Bongio, Wanxun Yang, Fang Yang, Sanne K. Both, Sander C.G. Leeuwenburgh, Jeroen J.J.P. van den Beucken and John A. Jansen	
19. Rabbit Adipose-derived Stem Cells and Tibia Repair	349
Elena Arrigoni, Stefania Niada and Anna T. Brini	
20. Transplantation of Human Adipose-derived Stem Cells for Fracture Healing: Multi-lineage Differentiation Potential and Paracrine Effects	369
Taro Shoji, Masaaki Ii and Takayuki Asahara	
<i>Index</i>	389
<i>About the Editors</i>	395
<i>Color Plate Section</i>	397
