

Contents

Part I The Poor Agreement Between Observed and Predicted Frequencies	
Stellar Pulsations and Stellar Evolution: Conflict, Cohabitation, or Symbiosis?	3
Achim Weiss	
2D Simulations of the Interaction Between Radial Pulsation and Convection	11
Chris Geroux and Robert G. Deupree	
Vibrational Instability of Metal-Poor Low-Mass Main-Sequence Stars	17
Takafumi Sonoï and Hiromoto Shibahashi	
Non-radial Pulsation and Magnetic Fields of OB Stars	23
Natallia Sudnik and Alexander Kholtygin	
Pulsations in Hot Massive Stars	27
C.C. Lovekin and J.A. Guzik	
On the Origin of the Dense Frequency Spectra of Space Observed Intermediate Mass Pulsating Stars	33
J. Pascual-Granado, A. Grigahcène, D. Díaz-Fraile, M. Gruberbauer, R. Garrido, P. Amado and J. C. Suárez	
The Spectroscopic Observations of CoRoT Asteroseismic Targets with HARPS	39
Poretti, E., Rainer, M., Mantegazza, L., Floquet, M., Mathias, Ph., Amado, P., Aerts, C., Uytterhoeven, K., and the CoRoT Seismology Ground-Based Working Group	

Recent Progress and Open Questions in Rapidly Rotating Star Seismology	43
F. Lignières	
Low-Frequency Modes in Rotating Stars and A Working Hypothesis About Episodic Mass Loss in Be Stars	49
Hiramoto Shibahashi and Hiroyuki Ishimatsu	
Modelling Stellar Convection and Pulsation in Multidimensions Using the ANTARES Code	53
Eva Mundprecht and Herbert J. Muthsam	
Regular Modes in Rapidly Rotating Stars	57
Mickael Pasek, Bertrand Georgeot, François Lignières and Daniel R. Reese	
Periodicities Within the Frequency Spectra of δ Scuti Stars Observed by <i>Kepler</i>	61
A. García Hernández, J. Pascual-Granado, A. Grigahcène, K. Uytterhoeven, A. Moya, R. Garrido, J.C. Suárez, J. Gutiérrez-Soto, and S. Martín-Ruiz	
Oscillation Frequency Spectra at Rapid Rotation	67
Fernando Pena, Robert Deupree, and Wilfried Beslin	
Part II Giant Stars	
Frequency Dependence of $\Delta\nu$ of Solar-Like Oscillators Investigated: Influence of HeII Ionization Zone	73
S. Hekker, Sarbani Basu, Y. Elsworth, and W.J. Chaplin	
Some Thoughts About the Blazhko Effect for RR Lyrae Variable Pulsations	77
Arthur N. Cox	
Period Doubling in <i>Kepler</i> RR Lyrae Stars	81
R. Szabó, Z. Kolláth, L. Molnár, K. Kolenberg, D.W. Kurtz, and WG#13 members	
First Detection of Period Doubling in a BL Herculis Type Star: Observations and Theoretical Models	85
R. Smolec, I. Soszyński, P. Moskalik, A. Udalski, M.K. Szymański, M. Kubiak, G. Pietrzyński, Ł. Wyrzykowski, K. Ulaczyk, R. Poleski, S. Kozłowski, and P. Pietrukowicz	
The Projection Factor of Cepheids	91
N. Nardetto, J. Storm, W. Gieren, A. Fokin, and D. Mourard	
New Links Between Pulsation and Stellar History	95
Nancy Ramage Evans	

Evidence for Pulsation-Driven Mass Loss from δ Cephei	99
M. Marengo, N.R. Evans, L.D. Matthews, G. Bono, P. Barmby, D.L. Welch, M. Romaniello, K.Y.L. Su, G.G. Fazio, and D. Huelsman	
Multi-periodic Oscillations in Cepheids and RR Lyrae-Type Stars	103
P. Moskalik	
RR Lyrae Studies with <i>Kepler</i>	109
Katrien Kolenberg and KASC WG13 (RR Lyrae working group)	
The Nature of Variability in M Supergiants: The Forgotten Type C Semiregulars	115
D.G. Turner, K.E. Moncrieff, C.I. Short, and R.F. Wing	
Pulsational Light Variability in Post-AGB Stars in the Milky Way Galaxy and the Magellanic Clouds	121
Bruce J. Hrivnak, Wenxian Lu, and Kristie A. Shaw	
A Testimator Approach to Detecting Heteroskedasticity in the Cepheid PL Relation	127
S.M. Kanbur, A. Nanthakumar, and C.C. Ngeow	
Synthetic Cepheid Period–Luminosity and Period–Color Relations in <i>Spitzer’s</i> IRAC Bands	131
C.-C. Ngeow, M. Marconi, I. Musella, M. Cignoni, M. Marengo, and S.M. Kanbur	
 Part III New Instrumentation from the Ground and Space	
New Ground-Based Observational Methods and Instrumentation for Asteroseismology	139
Pedro J. Amado	
Impact of High Precision Photometry from Space: Do the Results Meet the Expectations?	145
Eric Michel	
Long-Baseline Interferometric Observations of Cepheids	151
P. Kervella, A. Mérand, and A. Gallenne	
Programs and Perspectives of Visible Long Baseline Interferometry VEGA/CHARA	155
D. Mourard, N. Nardetto, R. Ligi, and K. Perraut	
Spectro-Interferometry Studies of Velocity-Related Phenomena at the Surface of Stars: Pulsation and Rotation	159
Antoine Mérand, Fabien Patru and Jason Aufdenberg	

The VISTA Variables in the Vía Láctea Survey: A First Glance on Stellar Variability	165
I. Dékány, M. Catelan, D. Minniti, and the VVV Collaboration	
Solar-Like Stars Observed by Kepler: An Incredible Adventure	171
R.A. García	
 Part IV Mode Identification	
Identification of Pulsation Modes in Main Sequence Stars: Potentials and Limits	179
J. Daszyńska-Daszkiewicz and A.A. Pamyatnykh	
Uncovering Hidden Modes in RR Lyrae Stars	185
L. Molnár, Z. Kolláth, and R. Szabó	
Stellar Activity Cycles and Contribution of the Deep Layers Knowledge	191
P. Walczak, W. Szewczuk, and J. Daszyńska-Daszkiewicz	
Rotation Effects as Possible Responsible for the Surface Effects on the Sun and Solar-Type Stars	197
J.C. Suárez, M.J. Goupil, D.R. Reese, R. Samadi, F. Lignières, M. Rieutord, and J. Lochard	
Theoretical Approach to Mode Identification	201
Joyce Ann Guzik	
Towards Precise Asteroseismology of Solar-Like Stars	209
A. Grigahcène, M.-A. Dupret, S.G. Sousa, M.J.P.F.G. Monteiro, R. Garrido, R. Scuflaire, and M. Gabriel	
 Part V Oscillations Versus Activity Plus Planet Transits	
Current State of the Modelling of Photospheric Activity	215
A.F. Lanza	
Pulsating Stars Harbouring Planets	221
A. Moya	
Successful Asteroseismology for a Better Characterization of the Exoplanet HAT-P-7b	227
M. Oshagh, A. Grigahcène, O. Benomar, M.-A. Dupret, M. J. P. F. G. Monteiro, R. Scuflaire, and N. C. Santos	
The New Kepler Picture of Variability Among A and F Type Stars	231
K. Uytterhoeven and KASC WG#10	

Stellar Activity Cycles and Contribution of the Deep Layers

Knowledge	237
S. Mathur	

**Part VI Early Type Stars. Oscillations Versus Other Agents,
Mainly Regular/Rotational Variations of B Stars**

Rotational Modulation in Be Stars	247
L.A. Balona	

Be Stars: Rapidly Rotating Pulsators	253
Th. Rivinius	

A Pulsational Study of a Sample of <i>CoRoT</i> Faint Be Stars	261
T. Semaan, J. Gutiérrez-Soto, Y. Frémat, A.M. Hubert, C. Martayan, and J. Zorec	

Mode Identification for Subdwarf B Stars Using Period Spacings in <i>Kepler</i> Data	265
M.D. Reed	

Pulsating Pre-Main Sequence Stars in NGC 2264 Discovered by the <i>MOST</i> and <i>CoRoT</i> Satellites	269
K. Zwintz, L. Fossati, T. Ryabchikova, and T.G. Barnes	

Constraints on Pasta Structure of Neutron Stars	273
Hajime Sotani	

Whole Earth Telescope Observations of the DAV EC14012-1446	277
J.L. Provencal and The WET Team	

Part VII Conference Closing Remarks

Closing Summary: Twentieth Stellar Pulsation Conference	283
Joyce Ann Guzik	

Part VIII Poster Contributions

The poster contributions are presented as electronic
supplementary material.

List of Poster Contributions	291
