

# Contents

## Part I Gene Regulation and Cancer

- 1 Steroid Receptor Coactivators (SRCs) as Integrators of Multiple Signaling Pathways in Cancer Progression.....** 3  
Weiwen Long and Bert W. O'Malley
- 2 Role of Alteration/Deficiency in Activation (ADA) Complex in Cell Cycle, Genomic Instability and Cancer .....** 33  
Shakur Mohibi, Shashank Srivastava, Hamid Band, and Vimla Band
- 3 RUNX2 Transcriptional Regulation in Development and Disease.....** 57  
Jessica L. Brusgard and Antonino Passaniti
- 4 Epigenetic Mechanisms of Cancer Metastasis .....** 87  
Jing Liang and Yongfeng Shang

## Part II Signaling Pathway and Cancer

- 5 Regulatory Effects of Arsenic on Cellular Signaling Pathways: Biological Effects and Therapeutic Implications .....** 107  
Elspeth M. Beauchamp, Ruth Serrano, and Leonidas C. Platanias
- 6 Nuclear Factors Linking Cancer and Inflammation.....** 121  
Kunzang Chosdol, Mohita Bhagat, Bhawana Dikshit, Evanka Madan, Parthaprasad Chattopadhyay, and Subrata Sinha
- 7 Regulation of the Jak/STATs Pathways by Histone Deacetylases.....** 155  
David M. Woods, Maritza Lienlaf-Moreno, Eduardo Sotomayor, Edward Seto, and Alejandro Villagra
