List of Symbols	VII
Abstract	XII
Zusammenfassung	XIV
1 Microstructural investigations	1
1.1 Design of experiments (DOE)	1
1.1.1 Introduction	1
1.1.2 Properties of a full factorial 3^3 experiment	2
1.1.3 Definition of chosen dependent and independent variables	3
1.1.4 Experimental setup	6
1.1.5 Factor effects	8
1.2 Analytical models of random pore phenomena	10
1.2.1 The logarithmic normal distribution	10
1.2.2 The beta distribution	13
1.3 Explanation attempts and conclusions	16
2 Ductile failure of porous materials	19
2.1 Introduction	19
2.2 Definition of damage	20
2.3 Setup of the GTN model	21
2.4 Parameter identification and results	24
2.5 Discussion	28
2.6 The damage evolution	29
2.7 Special considerations concerning the measurement of damage	30
2.8 Simulation of macrohardness tests	33
2.9 Outlook and conclusions	36
3 Characterization of green parts	37
3.1 Motivation	37
3.2 Applications of green strength properties	38
3.3 Green properties	39
3.4 Compaction and the Drucker-Prager yield criterion	42
3.5 Discussion and concluding remarks	43
4 Cyclic plasticity of sintered steels	46
4.1 Introduction	46
4.2 Specimen fabrication	47
4.3 Experimental work	49

4.3.1	Test setup	49
4.3.2	Machine effects	50
4.3.3	Cyclic stress-strain and corresponding strain life curves	51
4.3.4	Discussion	56
4.4	Computations	57
4.4.1	Identification of nonlinear kinematic hardening parameters	57
4.4.2	Simulation of stable hysteresis loops	60
4.4.3	Identification of isotropic hardening parameters	61
4.5	Verification experiments	63
4.6	Hardness evolution during the deformation	66
4.7	Conclusions	71
5	Multiaxial fatigue analysis of sintered iron	73
5.1	Introduction	73
5.2	Tubular specimen fabrication	74
5.3	Experiments	76
5.4	Lifetime prediction	80
5.4.1	Stress-based approaches	80
5.4.2	Strain-based approaches	82
5.4.3	Critical plane approaches	83
5.5	Fractography	87
5.6	Conclusions	89
6	Conclusions and outlooks	90
A	Appendix Chapter 1	93
A.1	Sintering conditions	94
A.2	DOE effects	95
B	Appendix Chapter 4	100
B.1	Stable hysteresis loops	101
B.2	Stabilization of hysteresis loops	107
B.3	Ratcheting strains	119
	Publication list	122
	Bibliography	123
