

Table of Contents

Preface	iii
Introduction	
Leen Breure	1
I. Applications of OCR on Historical Sources	
Historical OCR Projects in Norway	
Gunnar Thorvaldsen	5
The Bakunin Project and Optical Character Recognition	
Bernedine Bos and Anke van der Moer	11
Optical Frisian Character Recognition	
Jogchum Reitsma	17
The Irish Database Project: a Case for OCR ?	
Ann Mc Veigh	29
II. Recognition of Handwritten Material	
Off-line and On-line Handwritten Recognition	
Eric Helsper and Lambert Schomaker	39
An Interactive System for Recognition of Manuscripts	
Susan Laffin	53
A Recurrent Network Approach to the Automatic Reading of Handwriting	
Andrew Senior	59
Computerized Script Analysis and Classification: Some Directions for Research	
John B. Friedman	67
III. Pre- and Post-Processing in the Conversion Process	
Pre- and Post-Processing in the Conversion Process for Optical Character Recognition	
Harold C. Ogg	83
Scanning, Keyboarding, and Data Verification: Factors in Selecting Data Collection Technologies	
Mark Olsen	93
Symbol Correspondence for Integrating Multiple OCR Outputs	
Vincente P. Concepcion and Donald P. D'Amato	113
Converting the Historical Dictionary of Dutch to Electronic Form	
Truus Kruijt and John van der Voort van der Kleij	131

IV. Recognition of non-Latin Fonts

Applications of OCR in Russian Historical Sources: a Comparison of Various Programs

Leonid Borodkin, Valery Lazarev and Evgeny Zlobin139

Optical Recognition of Music

William McGee and Paul Merkley147

Pattern Recognition of Gothic Fonts

René van Horik155
