

Contents

Preface.....	xiii
Acknowledgments.....	xv
CHAPTER 1. Introduction	1
1.1 Nanoscience and nanotechnology.....	2
1.1.1 Historical	4
1.1.2 Synthesis of nanoparticles	5
1.1.3 Characterization of nanomaterials: physicochemical approaches	14
1.1.4 Unique properties of nanoparticles.....	20
1.1.5 Application areas	20
1.1.6 Nanomedicine for health care.....	22
1.2 Building blocks of the human body system.....	23
1.3 Bio-chemical functions of organic matters.....	25
1.3.1 Proteins.....	25
1.3.2 Nucleic acids	28
1.3.3 Lipids.....	29
1.3.4 Carbohydrate	30
1.4 Cellular system of the human body	30
1.4.1 Tissues	31
1.5 Membranes	33
1.5.1 Mucous membrane	34
1.5.2 Serous membrane	34
1.5.3 Cutaneous membrane	34
1.5.4 Synovial membrane.....	35
1.5.5 Meninges	35
1.6 Cellular functions and metabolism	35
1.6.1 Creation	36
1.6.2 Movement/mobility.....	36
1.7 Organs, organ systems, and their level of organization	36
1.8 Nanomedicine	36
1.8.1 Nanomaterials.....	38
1.8.2 Nanoparticles as a drug delivery system	39
1.8.3 Analytical and diagnostic tools	41
1.9 Regenerative medicine.....	42
1.10 Current challenges	43
1.10.1 Toxicity	43
1.11 Regulatory and risk issues	47

1.12 Future outlook.....	48
References.....	48

CHAPTER 2. Nano-based Drug Delivery and Diagnostic Systems..... 53

2.1 Introduction.....	54
2.2 Nanoparticles-based drug delivery system	56
2.2.1 Types of nanoparticles	56
2.2.2 Remotely triggered delivery systems.....	63
2.2.3 Other processes.....	67
2.3 Delivery of RNA/DNA	70
2.3.1 Chitosan-coated PLGA nanoparticles for DNA/RNA delivery	71
2.3.2 Polymer siRNA for enhanced RNA delivery.....	71
2.4 <i>In vitro</i> effects of particle size and shape of nanocarrier particles on drug delivery.....	72
2.5 Pharmacokinetic of nanoparticles (NPs)	75
2.5.1 Distribution.....	75
2.6 Physicochemical characteristics of NPs	77
2.6.1 Interaction between NPs and bio microenvironment.....	78
2.7 Organ clearance of nanomaterials.....	78
2.7.1 Lung.....	79
2.7.2 Liver.....	80
2.7.3 Renal clearance.....	82
2.8 Nanodiagnostic tools	83
2.8.1 Molecular diagnostics.....	85
2.8.2 Nanophotonics for diagnostics	89
2.8.3 Bio-imaging.....	92
References.....	98

CHAPTER 3. Nanomedicine for Neurological Disorder 109

3.1 Introduction.....	110
3.1.1 Cells of the nervous system	112
3.1.2 The nerve impulse	114
3.1.3 Neurotransmitters in action	115
3.2 Chemistry of nanotransmitters and modulators.....	117
3.3 Neurological diseases	121
3.3.1 Alzheimer's disease (AD).....	122
3.3.2 Amyotrophic lateral sclerosis (ALS).....	123
3.3.3 Anxiety	123

3.3.4	Attention deficit hyperactivity disorder (ADHD)	123
3.3.5	Brain injuries (BI)	123
3.3.6	Brain tumor (BT)	124
3.3.7	Dementia	124
3.3.8	Depression	124
3.3.9	Fibromyalgia syndrome (FS)	124
3.3.10	Huntington's disease (HD)	125
3.3.11	Insomnia	125
3.3.12	Memory	125
3.3.13	Migraine	125
3.3.14	Multiple sclerosis (MS)	126
3.3.15	Myasthenia gravis (MG)	126
3.3.16	Narcolepsy	126
3.3.17	Neuralgia	126
3.3.18	Panic disorder	127
3.3.19	Parkinson's disease (PD)	127
3.3.20	Restless legs syndrome (RLS)	127
3.3.21	Schizophrenia	128
3.3.22	Stress	128
3.3.23	Stroke	128
3.4	Diagnostic test for neurological disorder	128
3.4.1	Laboratory screening tests	129
3.4.2	Neurological examination	129
3.4.3	Specific diagnostic tests for neurological disorders	130
3.5	Therapies for neurological disorders	137
3.6	Nanomedicine for neurological disorders	137
3.6.1	Small molecules and RNAs	139
3.6.2	Applications of nanotechnology in neurological sciences	139
3.6.3	Alternative nanotechnology routes for drug delivery systems	144
3.6.4	Nanotechnology for imaging diagnosis of neurological disorders	150
3.6.5	Molecular diagnostics	154
3.6.6	Neural prosthetics	157
3.7	Challenges and future prospective	162
3.7.1	Alzheimer's disease (AD)	163
3.7.2	Parkinson's disease (PD)	165
3.7.3	Nerve repair	168
	References	170

CHAPTER 4. Nanomedicine for Cancer Treatment..... 177

4.1	Introduction.....	178
4.2	Causes and mechanisms for occurrence of cancer	179
4.2.1	Cellular approach.....	179
4.2.2	Genetic.....	181
4.2.3	Active model for cancer.....	184
4.2.4	Metabolic profiling: role of glycine in rapid cancer cell proliferation	185
4.2.5	Free radical: the main cause of cancer	185
4.3	Viruses and cancer	188
4.4	Angiogenesis in cancer	188
4.5	Classification of cancer	189
4.6	Detection and diagnosis of cancer	190
4.7	Modalities for cancer treatment.....	192
4.7.1	Traditional therapies	192
4.7.2	Newly emerging therapies	192
4.7.3	Cancer prevention.....	195
4.8	Nanomedicine for the treatment of cancer.....	195
4.8.1	Nanotherapeutics: prevention and control of the disease.....	196
4.8.2	Nanodrug carriers for cancer drug delivery.....	198
4.8.3	Enhanced tumor targeting.....	207
4.8.4	Stem cell therapy	208
4.8.5	Nanotechnology for molecular level testing of cancer	208
4.8.6	Diagnostic imaging.....	212
4.8.7	Cancer theranostics cancer	216
4.9	Shell cross-linked KNEDEL-LIKE nanoparticles (SCKs) as emerging drug carriers.....	235
	References.....	239

CHAPTER 5. Nanomedicine for Treatment of Cardiovascular Diseases and Stroke..... 247

5.1	Introduction.....	248
5.1.1	Cardiovascular system and its functions.....	249
5.1.2	Predominant cardiovascular diseases	252
5.2	Diagnostic and treatment of CVDs.....	254
5.2.1	Diagnosis	254
5.2.2	Pharmacological treatment of AMI	260
5.2.3	Treatment of complications-arrhythmias.....	262

5.3	Nanomedicine in diagnosis and treatment of cardiovascular diseases (CVD)	263
5.3.1	Diagnosis	264
5.3.2	Imaging	268
5.3.3	Therapeutics for cardiovascular diseases	276
5.3.4	Nanoagents for use in the detection of transplant rejection	282
5.4	Stem cell therapy	283
5.4.1	Molecular imaging and tracking of stem cells	284
5.4.2	Multimodality imaging	284
5.4.3	Three-dimensional (3D) nanostructures in stem cell tissue engineering	285
5.4.4	Controlled presentation and delivery of differentiation factors	287
5.5	Cardiac graft	290
	References	291

CHAPTER 6. Human Immunodeficiency Virus (HIV) and Acquired Immunodeficiency Syndrome (AIDS) 299

6.1	Introduction	300
6.2	HIV pathology	301
6.2.1	Recognition and binding	303
6.2.2	Reverse transcription	304
6.2.3	Integration	304
6.2.4	Transcription	305
6.2.5	Assembly	305
6.2.6	Budding	305
6.3	HIV infection and the body's response	306
6.3.1	Treatment	306
6.3.2	Immunological staging infections	310
6.3.3	AIDS risk factors	311
6.3.4	Common symptoms of HIV and AIDS	311
6.3.5	Pathogenesis of AIDS (how does HIV cause AIDS)	312
6.4	Mechanism of infection	313
6.4.1	CD4 count	314
6.5	Diagnosis of HIV and AIDS	315
6.5.1	Tests for HIV	315
6.5.2	Diagnosing AIDS	316
6.5.3	Treatment for HIV and AIDS	317

6.6	Prevention, cure, and current treatment for HIV/AIDS.....	317
6.6.1	Prevention and cure	317
6.6.2	Prevention of opportunistic infections.....	318
6.6.3	Current treatment.....	319
6.6.4	Treatment-related issues	321
6.7	Nanotechnology for treatment of HIV/AIDS	321
6.7.1	Antiretroviral (ARV) drug delivery	322
6.7.2	Nanomaterials as therapeutic agents	325
6.7.3	Gene therapy for HIV/AIDS.....	325
6.7.4	Immunotherapeutic nanomedicine for HIV/AIDS	328
6.8	HIV protection	334
6.8.1	Vaccination	334
6.8.2	Microbicides	336
	References.....	339

CHAPTER 7. Nanomedicine for Gastrointestinal

	Diseases.....	347
7.1	Introduction.....	348
7.1.1	GI tract.....	348
7.1.2	Accessory organs.....	356
7.2	GI disorder	358
7.2.1	Excessive intestinal gas	358
7.2.2	Acid reflux	359
7.2.3	Irritable bowel syndrome (IBS).....	359
7.3	Gastrointestinal disease caused by internal permeability	359
7.3.1	Crohn's disease	361
7.3.2	Celiac disease	363
7.3.3	Food allergy	364
7.3.4	Pancreatitis.....	364
7.3.5	Chronic pancreatitis.....	364
7.3.6	Liver disease.....	365
7.3.7	Intestinal permeability	365
7.3.8	<i>Helicobacter pylori</i> infection and related gastrointestinal disorders	366
7.4	Gastrointestinal stromal tumor (GIST).....	368
7.5	Gastroparesis.....	368
7.6	Nanomaterials for treatment of gastrointestinal disease.....	369

7.6.1	High surface area-to-volume ratio	370
7.6.2	Nanoparticles as a drug carrier for gastroenterology: the challenging conditions and vectorization	370
7.6.3	Barriers to NM interaction with cells	371
7.6.4	Strategies for NP delivery in the digestive system	371
7.7	Application of nanomedicine in gastroenterology; specific examples	373
7.7.1	Inflammatory bowel disease	373
7.7.2	Implication of IBD drugs going nano.....	374
7.7.3	Nanomaterials used as a theragnostic	379
7.7.4	Tissue engineering.....	380
7.7.5	Specific imaging and therapeutic in colon cancer	381
7.8	Nanotechnology and gastrointestinal endoscopy: nanopowder as hemostatic agent in gastric ulcer bleed.....	382
7.8.1	Nanopowder as hemostatic agent in gastric ulcer.....	382
7.8.2	Prevention of clogging of plastic stents.....	382
7.8.3	Nano-based capsule-endoscopy.....	383
	References.....	383

Index.....	391
