
Part I Software Engineering Meets Semantic Web: Concepts and Theories

1 Motivation and Introduction

Jeff Z. Pan , Yuting Zhao 3

2 Close Encounters of the Semantic Web and MDA Kinds

Dragan Djuric, Dragan Gasevic, Vladan Devedzic 13

3 Generating Model Transformations Using Ontology Engineering Space

Stephan Roser, Bernhard Bauer..... 31

Part II Realize Software Engineering by Semantic Web Technologies

4 Towards a Consistent Feature Model using OWL

Hai Wang , Yuan Fang Li , Jing Sun , Hongyu Zhang , Jeff Z. Pan ... 67

5 Using Semantic Web Technologies for Management Application Integration

Tilo Nitsche, Jishnu Mukerji, Dave Reynolds, Elisa Kendall 93

6 Semantic Web Enabled Software Analysis

Jonas Tappelet , Christoph Kiefer , Abraham Bernstein 109

7 Semantically Enabling Web Service Repositories

Marta Sabou , Maria Maleshkova, Jeff Z. Pan 139

8 ABC: A methodology for Semantic Web Application Development

Emanuele Della Valle , Irene Celino , Dario Cerizza , Catalina Mancas. 159

9 Model-driven Design Frameworks for Semantic Web Applications

Marco Brambilla , Christina Tziviskou 179

Part III Design Ontologies for Software Engineering

10 A Software Process Ontology and Its Application

Li Liao , Hareton K. N. Leung 207

11 Enriching SE Ontologies with Bug Quality

Philipp Schugert , Juergen Rilling , Philippe Charland 219

12 Learning Ontologies from Software Artifacts: Exploring and Combining Multiple Choices

Kalina Bontcheva 235
