<b>Introduction</b>	<b>1</b>
<b>1 France, a particular “place” at a particular point in time</b>	<b>5</b>
1.1 The French automobile industry in crisis	5
1.2 Do French customers accept vehicle electrification?	6
1.3 A short history of policy efforts	8
1.4 New policy departures in the early 2000s	10
<b>2 Firms as major agents in pathways to electric drive technologies</b>	<b>13</b>
2.1 Car makers: technological choices of incumbents and newcomers	13
2.1.1 The development of battery electric vehicles (BEVs)	14
2.1.2 Hybridisation of the ICE – another path to the electric vehicle	20
2.2 Agents in the development of battery technologies	24
2.2.1 The trajectory of battery technologies in France	25
2.2.2 Partnerships in battery technologies	29
2.2.3 A renewed research base for electric drive technologies: major public players in battery R&D	31
2.3 The indispensable role of other (than battery) suppliers in innovation and electrification	34
<b>3 Framing an emerging market for electric vehicles</b>	<b>36</b>
<b>4 Conclusions</b>	<b>40</b>
4.1 The traits of a “French” trajectory in the electrification of vehicles	40
4.2 Is this “French” trajectory sustainable?	42
4.3 French players embedded in global linkages	44
<b>Bibliography</b>	<b>47</b>
<b>Annex</b>	
Annex 1: Some recent regional projects testing the application of electric vehicles	53
