Regular Papers

Automated Model-Based Left Ventricle Segmentation in Cardiac MR Images	3
<i>Sharath Gopal and Demetri Terzopoulos</i>	
Beyond the AHA 17-Segment Model: Motion-Driven Parcellation of the Left Ventricle	13
<i>Wenjia Bai, Devis Peressutti, Sarah Parisot, Ozan Oktay, Martin Rajchl, Declan O'Regan, Stuart Cook, Andrew King, and Daniel Rueckert</i>	
A Non-parametric Statistical Shape Model for Assessment of the Surgically Repaired Aortic Arch in Coarctation of the Aorta: How Normal Is Abnormal?	21
<i>Jan L. Bruse, Kristin McLeod, Giovanni Biglino, Hopewell N. Ntsinjana, Claudio Capelli, Tain-Yen Hsia, Maxime Sermesant, Xavier Pennec, Andrew M. Taylor, and Silvia Schievano</i>	
Towards Left Ventricular Scar Localisation Using Local Motion Descriptors	30
<i>Devis Peressutti, Wenjia Bai, Wenzhe Shi, Catalina Tobon-Gomez, Thomas Jackson, Manav Sohal, Aldo Rinaldi, Daniel Rueckert, and Andrew King</i>	
Traversed Graph Representation for Sparse Encoding of Macro-Reentrant Tachycardia	40
<i>Mihaela Constantinescu, Su-Lin Lee, Sabine Ernst, and Guang-Zhong Yang</i>	
Prediction of Infarct Localization from Myocardial Deformation	51
<i>Nicolas Duchateau and Maxime Sermesant</i>	
Parameterisation of Multi-directional Diffusion Weighted Magnetic Resonance Images of the Heart	60
<i>Bianca Freytag, Vicky Y. Wang, G. Richard Christie, Alexander J. Wilson, Gregory B. Sands, Ian J. LeGrice, Alistair A. Young, and Martyn P. Nash</i>	
Confidence Measures for Assessing the HARP Algorithm in Tagged Magnetic Resonance Imaging	69
<i>Hanne Kause, Aura Hernández-Sabaté, Patricia Márquez-Valle, Andrea Fuster, Luc Florack, Hans van Assen, and Debora Gil</i>	

Papillary Muscle Segmentation from a Multi-atlas Database: A Feasibility Study	80
<i>Benedetta Biffi, Maria A. Zuluaga, Sébastien Ourselin, Andrew M. Taylor, and Silvia Schievano</i>	
Electrophysiology Model for a Human Heart with Ischemic Scar and Realistic Purkinje Network	90
<i>Toni Lassila, Matthias Lange, Antonio R. Porras Perez, Karim Lekadir, Xènia Albà, Gemma Piella, and Alejandro F. Frangi</i>	
Patient Metadata-Constrained Shape Models for Cardiac Image Segmentation	98
<i>Marco Pereañez, Karim Lekadir, Xenia Albà, Pau Medrano-Gracia, Alistair A. Young, and Alejandro Frangi</i>	
Myocardial Infarct Localization Using Neighbourhood Approximation Forests.	108
<i>Héloïse Bleton, Jàn Margeta, Hervé Lombaert, Hervé Delingette, and Nicholas Ayache</i>	
Shape Challenge Papers	
Systo-Diastolic LV Shape Analysis by Geometric Morphometrics and Parallel Transport Highly Discriminates Myocardial Infarction	119
<i>Paolo Piras, Luciano Teresi, Stefano Gabriele, Antonietta Evangelista, Giuseppe Esposito, Valerio Varano, Concetta Torromeo, Paola Nardinocchi, and Paolo Emilio Puddu</i>	
Statistical Shape Modeling Using Partial Least Squares: Application to the Assessment of Myocardial Infarction	130
<i>Karim Lekadir, Xènia Albà, Marco Pereañez, and Alejandro F. Frangi</i>	
Classification of Myocardial Infarcted Patients by Combining Shape and Motion Features	140
<i>Wenjia Bai, Ozan Oktay, and Daniel Rueckert</i>	
Detecting Myocardial Infarction Using Medial Surfaces: LV Statistical Modelling Challenge: Myocardial Infarction	146
<i>Pierre Ablin and Kaleem Siddiqi</i>	
Left Ventricle Classification Using Active Shape Model and Support Vector Machine	154
<i>Nripesh Parajuli, Allen Lu, and James S. Duncan</i>	
Supervised Learning of Functional Maps for Infarct Classification.	162
<i>Anirban Mukhopadhyay, Ilkay Oksuz, and Sotirios A. Tsaftaris</i>	

Joint Clustering and Component Analysis of Spatio-Temporal Shape Patterns in Myocardial Infarction.	171
<i>Catarina Pinto, Serkan Çimen, Ali Gooya, Karim Lekadir, and Alejandro F. Frangi</i>	
Myocardial Infarction Detection from Left Ventricular Shapes Using a Random Forest	180
<i>Jack Allen, Ernesto Zacur, Erica Dall'Armellina, Pablo Lamata, and Vicente Grau</i>	
Combination of Polyaffine Transformations and Supervised Learning for the Automatic Diagnosis of LV Infarct	190
<i>Marc-Michel Rohé, Nicolas Duchateau, Maxime Sermesant, and Xavier Pennec</i>	
Automatic Detection of Cardiac Remodeling Using Global and Local Clinical Measures and Random Forest Classification	199
<i>Jan Ehrhardt, Matthias Wilms, Heinz Handels, and Dennis Säring</i>	
Automatic Detection of Myocardial Infarction Through a Global Shape Feature Based on Local Statistical Modeling.	208
<i>Mahdi Tabassian, Martino Alessandrini, Peter Claes, Luca De Marchi, Dirk Vandermeulen, Guido Masetti, and Jan D'hooge</i>	
Author Index	217
