

Optimality-Theoretic Syntax, Semantics, and Pragmatics

From Uni- to Bidirectional Optimization

Edited by
GÉRALDINE LEGENDRE,
MICHAEL T. PUTNAM,
HENRIËTTE DE SWART,
AND ERIN ZAROUKIAN

<i>General preface</i>	ix
<i>List of abbreviations</i>	x
<i>List of contributors</i>	xiii
1 Introduction	1
<i>Géraldine Legendre, Michael T. Putnam, Henriëtte de Swart, and Erin Zaroukian</i>	
1.1 Optimality effects in natural language	2
1.2 Optimality Theory as the basic architecture of the grammar	10
1.3 From unidirectional to bidirectional OT	18
1.4 Content of the volume	26
Part I. Issues in Optimality-Theoretic Syntax	33
2 Intersecting constraints: Why certain constraint-types overlap while others don't	35
<i>Marc van Oostendorp, Michael T. Putnam, and Laura Catharine Smith</i>	
2.1 Introduction	35
2.2 The argument(s) for a parallel, overlapping system	37
2.3 Syntax-prosody interactions and intersecting alphabets	39
2.4 The syntax-phonology interface: An imperfect match	47
2.5 Conclusion	53
3 Optimal constructions	55
<i>Ralf Vogel</i>	
3.1 Variable argument linking	55
3.2 Construction grammar: Argument fusion	61
3.3 Analysis	65
3.4 Syntactic ambiguity	69
3.5 Fusion or representational economy?	71
3.6 Constructionist OT?	73
3.7 Conclusion	76
4 On accelerating and decelerating movement: From Minimalist preference principles to harmonic serialism	78
<i>Fabian Heck and Gereon Müller</i>	
4.1 Introduction	78
4.2 Move vs Agree: A constraint on ergative movement	81

4.3	Accelerating Move: A constraint on dative movement in accusative systems	92
4.4	Decelerating Move: Mobility of lexical/oblique arguments in ergative systems	100
4.5	Conclusion and outlook	107
5	Two types of portmanteau agreement: Syntactic and morphological <i>Ellen Woolford</i>	111
5.1	Morphological portmanteau agreement	114
5.2	Syntactic portmanteau agreement	130
5.3	Conclusion	134
6	Feature inheritance versus extended projections <i>Hans Broekhuis</i>	136
6.1	Introduction	136
6.2	Parallel movement	138
6.3	Feature inheritance	145
6.4	Extended projections	148
6.5	Optimization/economy considerations	154
6.6	Conclusion	157
7	Multiple grammars, dominance, and optimization <i>Joshua Bousquette, Michael T. Putnam, Joseph Salmons, Benjamin Frey, and [†]Daniel Nützel</i>	158
7.1	The multilingual challenge	158
7.2	Simultaneous activation: Fighting for the same space (at the same time)	160
7.3	Modeling (multiple) filler-gap dependencies in an OT grammar	162
7.4	Multiple filler-gap dependencies in WHG	166
7.5	Conclusion and outlook	175
Part II. Issues in Optimality-Theoretic Semantics and Pragmatics		177
8	On the origin of constraints <i>Sander Lestrade, Geertje van Bergen, and Peter de Swart</i>	179
8.1	Introduction	179
8.2	Differential case marking	179
8.3	The state of the art	181
8.4	From bidirectional optimization to unidirectional constraints	186
8.5	Implications for the optimization process	194
8.6	Discussion	198
8.7	Conclusion	199

9	Optimality Theory and lexical interpretation and selection	200
	<i>Lotte Hogeweg</i>	
9.1	Introduction	200
9.2	Lexical flexibility	201
9.3	Lexical production and interpretation in Optimality Theory	206
9.4	Competition	209
9.5	Detailed representations	213
9.6	Processing	217
9.7	Conclusion	219
10	On the optimal interpretation of <i>yes</i> and <i>no</i> in Dutch	220
	<i>Jet Hoek and Helen de Hoop</i>	
10.1	Introduction	220
10.2	Corpus study of <i>ja</i> and <i>nee</i> in spoken Dutch	222
10.3	Optimal interpretation of <i>ja</i> and <i>nee</i>	237
10.4	Responding to positively and negatively framed utterances	243
10.5	Conclusion	247
11	Telicity features of bare nominals	248
	<i>Henriëtte de Swart</i>	
11.1	Telicity in aspectual theory: An introduction based on English data	248
11.2	Cross-linguistic investigation: Challenges and an OT approach	254
11.3	Telicity features of bare nominals across languages	259
11.4	Weakly referential bare nominals and aspect	270
11.5	Conclusion	273
12	Blocking effects at the lexicon/semantics interface and bidirectional optimization in French	276
	<i>Géraldine Legendre, Paul Smolensky, and Jennifer Culbertson</i>	
12.1	Introduction	276
12.2	Blocking in (im)personal constructions	278
12.3	Antiblocking of aspectual interpretations in inchoatives	284
12.4	A formal account in terms of bidirectional optimization	288
12.5	Conclusion	298
13	Unfaithful conduct: A competence-based explanation of asymmetries between production and comprehension	300
	<i>Petra Hendriks</i>	
13.1	Introduction	300
13.2	Optimization is direction-sensitive	301
13.3	Direction-sensitive optimization also predicts inverse asymmetries	305

13.4 Unfaithful correspondences arise from low-ranked faithfulness constraints	309
13.5 Underspecification in optimization predicts further asymmetries	312
13.6 Faithful and unfaithful correspondences	317
13.7 Conclusion	322
