

ASTÉRIQUE 288

**VIEWS OF PARAMETER SPACE:  
TOPOGRAPHER AND RESIDENT**

**Mary Rees**

**Société Mathématique de France 2003**

**Publié avec le concours du Centre National de la Recherche Scientifique**

## CONTENTS

<b>Part I. Topology, Combinatorics, Views</b> .....	1
Introduction .....	3
1. The Topology of Spaces of Homeomorphisms and Branched Coverings .....	19
2. Loop Sets satisfying the Invariance and Levy Conditions .....	37
3. Nodes, Edges and Enhanced Levy Sets .....	55
4. The Group of an Enhanced Levy Set .....	71
5. Graphs of Topological Spaces and the Topographer's and Resident's Views .....	83
6. An Iteration on a Teichmüller Space .....	91
7. How to approach the Topographer's and Resident's Views .....	101
<b>Part II. Teichmüller Distance</b> .....	115
8. $L^1$ estimates on the Distortion and the First Derivative of Teichmüller Distance .....	117
9. Product Structure in the thin part of Teichmüller Space and Teichmüller Distance .....	133
10. The Formula for the Second Derivative of Teichmüller Distance .....	143
11. Solving the Second Derivative Equation .....	155
12. The Second Derivative of Teichmüller Distance is Continuous .....	169
13. The Second Derivative and the Solution of a Differential Equation .....	183
14. Distance between geodesics .....	197
15. Triangles of Geodesics .....	209
16. Hard Same Shape .....	229
<b>Part III. Proof of the Topographer's View</b> .....	243
17. Distance and the Pullback map .....	245
18. Pushing the Pullback Map .....	257
19. Pushing and the Good Vector Field .....	271
20. Construction of the Good Vector Field: Part 1 .....	281
21. Construction of the good vector field: Part 2 .....	295

22. Proof of Descending Points: Strategy .....	309
23. Proof of Descending Points: Reductions .....	321
24. Proof of Descending Points: Critical Points .....	331
<b>Part IV. Proof of the Resident's View .....</b>	<b>343</b>
25. Resident's View of Rational Maps Space: Outline Proof .....	345
26. Reductions to the Infinity Condition Theorem .....	355
27. Proof of the Infinity Condition Theorem .....	365
28. Reductions in the Proof of the Eventually Close Theorem .....	375
29. Chunks .....	389
30. Outline construction of a good sequence .....	395
31. Straightening .....	409
<b>Bibliography .....</b>	<b>417</b>
