Best Evidence Medical Education (BEME) Collaboration	3
Characteristics of a systematic review	4
Contrasting with a literature review	4
Why the need for this Guide	5
Conducting a health education systematic review	6
Step 1: Inception of review	6
Step 2: Scoping searches	7
Step 3: Assembling the full review team	8
Step 4: Creating the Protocol (work-plan)	8
Step 5: Formulating the Review Question	9
Step 6: Planning the search	10
<i>Inclusion/Exclusion Criteria</i>	11
<i>Sources of Studies</i>	12
<i>Electronic search strategy</i>	13
Step 7: Performing the search and selecting studies	13
Step 8: Extracting data from the studies	14
<i>Descriptive data</i>	15
<i>Quality assessment of studies</i>	16
Step 9: Synthesising and analysing the data	18
<i>Plan of Analysis</i>	19
<i>Qualitative Synthesis</i>	19
<i>Subgroup and sensitivity analysis</i>	23
Step 10: Discussing and concluding the review	23
Step 11: How the review will be reported	24
What are the limitations of a systematic review?	26
Updating a systematic review	27
Conclusion	28
