Table of content

1	**Introduction**	**1**
1.1	General role of NA study application in a repository development programme	4
1.2	Investigation of the Ruprechtov site: objectives and intentions	6
2	**Knowledge about uranium deposits and natural analogue studies at the beginning of the Ruprechtov project**	**11**
2.1	Natural uranium-containing systems	14
2.1.1	Uranium accumulation in geological formations	16
2.1.2	Uranium deposits and mining in the Czech Republic	23
2.1.3	Main genetic phases of uranium formation and accumulation in the north-western part of the Bohemian Massive	26
2.2	Understanding of the Ruprechtov geology before the start of the project	34
2.3	Stepwise site investigation for overall system understanding	37
2.4	Potential use of the outcome in performance assessment	40
2.4.1	Repository systems in Germany and the Czech Republic	40
2.4.2	Relevant processes dealt within PA - input of Natural Analogues	43
3	**Methods**	**47**
3.1	Drilling methods	47
3.2	Drill core and GW-sampling methods	50
3.3	Methods for characterizing geological parameters	55
3.4	In-situ measurements	57
3.5	Chemically based analytical methods	59
3.6	Micro- to nanoscale analytical methods	61
3.7	Isotope investigation methods	64
3.8	Modelling tools	68
4	**Application of methods to selected topics**	**71**
4.1	Information from topics needed for system understanding	71
4.2	Identification of (groundwater) flow patterns	72

Bibliografische Informationen
http://d-nb.info/1065673299

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

4.3 Geochemistry / geochemical milieu 79
4.4 Microbiology 87
4.5 Role of organic matter and carbon 91
4.6 Uranium transport and uranium enrichment process(es) 97

5 New results from national and international R&D 109
5.1 Development of regional stratigraphy 109
5.2 Findings from comparable analogue studies 113

6 System understanding 117
6.1 Geological evolution 117
6.1.1 Variant X 118
6.1.2 Variant Y 120
6.2 Key processes and interrelations 124
6.3 Abstraction to the Safety Case 126

7 Lessons learnt / experiences gained 129

List of project publications 135

References 141

A Annex: Background information 171
A.1 In-depth information about uranium deposits in the Czech Republic related to the selection of the Ruprechtov site as a Natural Analogue 171
A.1.1 Uranium mining and utilization before 1945 171
A.1.2 Uranium mining after 1945 172
A.1.3 Uranium mineralization in the Hroznětín section of the Sokolov Basin ... 178
A.2 Description of applied methods (cf. Chapter 3) 185
