	PAGE
Foreword (Th. HAHN)	ix
Scope of this volume (M. I. AROYO, U. MÜLLER AND H. WONDRATSCHEK)	x
Computer production of Parts 2 and 3 (P. KONSTANTINOV, A. KIROV, E. B. KROUMOVA, M. I. AROYO AND U. MÜLLER)	xi
List of symbols and abbreviations used in this volume	xii
 PART 1. SPACE GROUPS AND THEIR SUBGROUPS	
1.1. Historical introduction (M. I. AROYO, U. MÜLLER AND H. WONDRATSCHEK)	2
1.1.1. The fundamental laws of crystallography	2
1.1.2. Symmetry and crystal-structure determination	2
1.1.3. Development of the theory of group-subgroup relations	3
1.1.4. Applications of group-subgroup relations	4
1.2. General introduction to the subgroups of space groups (H. WONDRATSCHEK)	7
1.2.1. General remarks	7
1.2.2. Mappings and matrices	7
1.2.3. Groups	10
1.2.4. Subgroups	12
1.2.5. Space groups	14
1.2.6. Types of subgroups of space groups	18
1.2.7. Application to domain structures	20
1.2.8. Lemmata on subgroups of space groups	23
1.3. Computer checking of the subgroup data (F. GÄHLER)	25
1.3.1. Introduction	25
1.3.2. Basic capabilities of the <i>Cryst</i> package	25
1.3.3. Computing maximal subgroups	25
1.3.4. Description of the checks	26
1.4. The mathematical background of the subgroup tables (G. NEBE)	27
1.4.1. Introduction	27
1.4.2. The affine space	27
1.4.3. Groups	29
1.4.4. Space groups	33
1.4.5. Maximal subgroups	35
1.4.6. Quantitative results	37
1.4.7. Qualitative results	38
1.4.8. Minimal supergroups	39
1.5. Remarks on Wyckoff positions (U. MÜLLER)	41
1.5.1. Crystallographic orbits and Wyckoff positions	41
1.5.2. Derivative structures and phase transitions	41
1.5.3. Relations between the positions in group-subgroup relations	42
1.6. Relating crystal structures by group-subgroup relations (U. MÜLLER)	44
1.6.1. Introduction	44
1.6.2. The symmetry principle in crystal chemistry	44
1.6.3. Bärnighausen trees	44
1.6.4. The different kinds of symmetry relations among related crystal structures	46
1.6.5. Handling cell transformations	52

CONTENTS

1.6.6. Comments concerning phase transitions and twin domains	54
1.6.7. Exercising care in the use of group-subgroup relations	54
1.7. The Bilbao Crystallographic Server (M. I. AROYO, J. M. PEREZ-MATO, C. CAPILLAS AND H. WONDRATSCHEK)	57
1.7.1. Introduction	57
1.7.2. Databases and retrieval tools	57
1.7.3. Group-subgroup and group-super group relations between space groups	58
1.7.4. Relations of Wyckoff positions for a group-subgroup pair of space groups	66
 PART 2. MAXIMAL SUBGROUPS OF THE PLANE GROUPS AND SPACE GROUPS	
2.1. Guide to the subgroup tables and graphs (H. WONDRATSCHEK AND M. I. AROYO)	72
2.1.1. Contents and arrangement of the subgroup tables	72
2.1.2. Structure of the subgroup tables	72
2.1.3. I Maximal <i>translationengleiche</i> subgroups (<i>t</i> -subgroups)	76
2.1.4. II Maximal <i>klassengleiche</i> subgroups (<i>k</i> -subgroups)	79
2.1.5. Series of maximal isomorphic subgroups (Y. BILLIET)	82
2.1.6. The data for minimal supergroups	84
2.1.7. Derivation of the minimal supergroups from the subgroup tables	86
2.1.8. The subgroup graphs	90
2.2. Tables of maximal subgroups of the plane groups (Y. BILLIET, M. I. AROYO AND H. WONDRATSCHEK)	97
2.3. Tables of maximal subgroups of the space groups (Y. BILLIET, M. I. AROYO AND H. WONDRATSCHEK)	115
2.4. Graphs for <i>translationengleiche</i> subgroups (V. GRAMLICH AND H. WONDRATSCHEK)	433
2.4.1. Graphs of the <i>translationengleiche</i> subgroups with a cubic summit	434
2.4.2. Graphs of the <i>translationengleiche</i> subgroups with a tetragonal summit	440
2.4.3. Graphs of the <i>translationengleiche</i> subgroups with a hexagonal summit	447
2.4.4. Graphs of the <i>translationengleiche</i> subgroups with an orthorhombic summit	450
2.5. Graphs for <i>klassengleiche</i> subgroups (V. GRAMLICH AND H. WONDRATSCHEK)	453
2.5.1. Graphs of the <i>klassengleiche</i> subgroups of monoclinic and orthorhombic space groups	454
2.5.2. Graphs of the <i>klassengleiche</i> subgroups of tetragonal space groups	457
2.5.3. Graphs of the <i>klassengleiche</i> subgroups of trigonal space groups	460
2.5.4. Graphs of the <i>klassengleiche</i> subgroups of hexagonal space groups	461
2.5.5. Graphs of the <i>klassengleiche</i> subgroups of cubic space groups	462
 PART 3. RELATIONS BETWEEN THE WYCKOFF POSITIONS	
3.1. Guide to the tables (U. MÜLLER)	466
3.1.1. Arrangement of the entries	466
3.1.2. Cell transformations	468
3.1.3. Origin shifts	468
3.1.4. Nonconventional settings of orthorhombic space groups	469
3.1.5. Conjugate subgroups	470
3.1.6. Monoclinic and triclinic subgroups	471
3.2. Tables of the relations of the Wyckoff positions (U. MÜLLER)	473
Appendix. Differences in the presentation of Parts 2 and 3 (U. MÜLLER AND H. WONDRATSCHEK)	761
Subject index	763
