

Contents

1	Preliminaries	1
1.1	Korovkin's Theorem	2
1.2	Weierstrass Approximation Theorems	4
1.3	Order of Approximation	8
1.4	Differential Properties of Function	11
1.5	Notations and Inequalities	13
1.6	Bounded Variation	15
2	Approximation by Certain Operators	17
2.1	Discretely Defined Operators	17
2.2	Kantorovich Operators	27
2.3	Durrmeyer-Type Operators	29
2.4	Szász–Beta-Type Operators	36
2.5	Phillips Operators	52
2.6	Integral Modification of Jain Operators	60
2.7	Generalized Bernstein–Durrmeyer Operators	64
2.8	Generalizations of Baskakov Operators	72
2.9	Mixed Summation–Integral Operators	89
3	Complete Asymptotic Expansion	93
3.1	Baskakov–Kantorovich Operators	93
3.2	Baskakov–Szász–Durrmeyer Operators	97
3.3	Meyer–König–Zeller–Durrmeyer Operators	100
3.4	Beta Operators of the First Kind	103
4	Linear and Iterative Combinations	109
4.1	Linear Combinations	109
4.2	Iterative Combinations	118
4.3	Another Form of Linear Combinations	129
4.4	Combinations of Szász–Baskakov Operators	132

5	Better Approximation	141
5.1	Bernstein–Durrmeyer-Type Operators	142
5.2	Phillips Operators	146
5.3	Szász–Mirakjan–Beta Operators	147
5.4	Integrated Szász–Mirakjan Operators	149
5.5	Beta Operators of the Second Kind	151
6	Complex Operators in Compact Disks	155
6.1	Complex Baskakov–Stancu Operators	155
6.2	Complex Favard–Szász–Mirakjan–Stancu Operators	166
6.3	Complex Beta Operators of the Second Kind	175
6.4	Genuine Durrmeyer–Stancu Polynomials	189
6.5	New Complex Durrmeyer Operators	196
6.6	Complex q -Durrmeyer-Type Operators	206
6.7	Complex q -Bernstein–Schurer Operators	210
7	Rate of Convergence for Functions of Bounded Variation	213
7.1	Fourier and Fourier–Legendre Series	213
7.2	Hermite–Fejér Polynomials	216
7.3	Exponential-Type Operators	217
7.4	Bernstein–Durrmeyer-Type Polynomials	222
7.5	Szász–Mirakjan–Durrmeyer-Type Operators	226
7.6	Baskakov–Durrmeyer-Type Operators	231
7.7	Baskakov–Beta Operators	239
7.8	General Summation–Integral-Type Operators	242
7.9	Meyer–König–Zeller Operators	244
8	Convergence for Bounded Functions on Bézier Variants	249
8.1	Bernstein–Bézier-Type Operators	250
8.2	Bleimann–Butzer–Hann–Bézier Operators	252
8.3	Balazs–Kantorovich–Bézier Operators	254
8.4	Szász–Kantorovich–Bézier Operators	257
8.5	Baskakov–Bézier Operators	264
8.6	Baskakov–Kantorovich–Bézier Operators	268
8.7	Baskakov–Durrmeyer–Bézier Operators	275
8.8	MKZ Bézier-Type Operators	280
9	Some More Results on the Rate of Convergence	287
9.1	Nonlinear Operators	287
9.2	Chanturiya’s Modulus of Variation	296
9.3	Functions with Derivatives of Bounded Variation	301
9.4	Convergence for Bounded and Absolutely Continuous Functions	308
10	Rate of Convergence in Simultaneous Approximation	313
10.1	Bernstein–Durrmeyer–Bézier-Type Operators	314
10.2	General Class of Operators for DBV	325

Contents	xiii
10.3 Baskakov–Beta Operators for DBV	333
10.4 Szász–Mirakian–Stancu–Durrmeyer Operators	334
11 Future Scope and Open Problems	345
