<b>Abstract.....</b>	<b>II</b>
<b>List of figures .....</b>	<b>VII</b>
<b>List of tables .....</b>	<b>X</b>
<b>List of abbreviations .....</b>	<b>XI</b>
<b>1 Introduction.....</b>	<b>2</b>
1.1 The spatial allocation issue of the energy system.....	2
1.2 The concept of spatial externalities .....	4
1.3 Modelling approaches in the context of RES .....	6
1.4 Structure of dissertation .....	8
<b>2 The model.....</b>	<b>12</b>
2.1 Overview.....	12
2.2 Entities, variables and scales.....	14
2.3 The model procedure .....	19
2.4 Sub-models.....	21
2.4.1 General model structure.....	21
2.4.2 The Spatial Analysis .....	23
2.4.3 The Grid Module .....	25
2.5 Evaluation equations.....	28
2.6 Policy scenarios .....	30
2.7 Enhancing the model plausibility .....	34
2.7.1 Overview .....	34
2.7.2 The harvest potential.....	35
2.7.3 A pattern approach for the remaining parameter.....	37
2.8 Summary and Conclusion.....	39

<b>3</b>	<b><i>The model evaluation</i></b>	<b>41</b>
3.1	Overview	41
3.2	The statistical evaluation model	42
3.3	The sensitivity analysis for the examination of the basic market scenario	43
3.3.1	Overview	43
3.3.2	Efficiency evaluation of the basic market scenario	45
3.3.3	Fairness evaluation of the basic market scenario	49
3.4	Summary and Conclusion	54
<b>4</b>	<b><i>The efficiency and fairness impact of policies</i></b>	<b>57</b>
4.1	Overview	57
4.2	Regulation-based land-use policies	58
4.2.1	A general overview about regulation-based land-use policies	58
4.2.2	Model Implementation and extension	60
4.2.3	The sensitivity analysis for the examination of regulation-based land-use policies	62
4.3	Additional market-based policies	72
4.3.1	Overview	72
4.3.2	The reference yield model	74
4.3.3	Reinforcement costs to producer	81
4.4	Summary and conclusion	86
<b>5</b>	<b><i>The role of the regions - Lessons from the cooperative game theory and the ABM</i></b>	<b>91</b>
5.1	Overview	91
5.2	Lessons from the cooperative game theory	93
5.3	The regions' reactions on the transformation process	99
5.3.1	Overview	99
5.3.2	Spatial externality avoidance strategy	101
5.3.3	Regional economy encouragement strategy	102

5.4	Lessons from the ABM framework.....	103
5.4.1	Overview .....	103
5.4.2	Strategy impact on the central welfare components .....	104
5.4.3	Strategy Impact on the regional net utility of the consumer centres .....	110
5.4.4	Impact of the strategy choice on the fairness criteria.....	113
5.5	Summary and conclusion .....	115
<b>6</b>	<b><i>Case study: A scenario based analysis inspired by Germany...</i></b>	<b>117</b>
6.1	Overview.....	117
6.2	Model specification .....	118
6.2.1	The parameter modification .....	118
6.2.2	The applied policy scenario combination .....	121
6.3	The impact of the Policy Mix on the efficiency and fairness .....	122
6.4	Strategy impact on the welfare components.....	124
6.5	Strategy impact on the regional net utility of the consumer centres..	132
6.6	Impact of the strategy choice on the fairness criteria .....	134
6.7	Summary and conclusion .....	136
<b>7</b>	<b><i>Discussion and synthesis</i></b> .....	<b>139</b>
7.1	Summary.....	139
7.2	Lessons from the ABM .....	141
7.3	Reflection on the methodological approach.....	146
7.4	Outlook.....	148
	<b><i>References:</i></b> .....	<b>152</b>
	<b><i>Appendix</i></b> .....	<b>163</b>
