

Contents

1	Accelerating the Process of Drug Discovery <i>A.M. Davis, J. Dixon, C.J. Logan, D.W. Payling</i>	1
2	The Role of Pharmacokinetics in Drug Discovery: Finding Drug Candidates with the Greatest Potential for Success <i>J.H. Lin</i>	33
3	Rapid Permeability Screening in Drug Discovery to Predict Human Intestinal Absorption <i>G.S.J. Mannens, H. Bohets, P. Verboven, K. Steemans, K. Lavrijsen, W. Meuldermans</i>	49
4	Drug Metabolism Assays and Their Use in Drug Discovery <i>M.K. Bayliss, P.J. Eddershaw</i>	69
5	Prediction of Human Pharmacokinetics Based on Preclinical In Vitro and In Vivo Data <i>T. Lavé, O. Luttringer, J. Zuegge, G. Schneider, P. Coassolo, F.-P. Theil</i>	81
6	In Vitro Screening of Cytochrome P450 Induction Potential <i>O. Pelkonen, J. Hukkanen, P. Honkakoski, J. Hakkola, P. Viitala, H. Raunio</i>	105
7	Drug Transport Across the Blood–Brain Barrier <i>G. Fricker</i>	139

8	The Development and Implementation of Bioanalytical Methods Using LC-MS to Support ADME Studies in Early Drug Discovery and Candidate Selection <i>T.V. Olah</i>	155
9	Strategies in Lead Selection and Optimization: Application of a Graphical Model and Automated In Vitro ADME Screening <i>A.K. Mandagere</i>	185
10	High-Throughput Screening – Brains Versus Brawn <i>D.A. Smith</i>	203
11	Relation of Molecular Properties with Drug Absorption and Disposition <i>H. van de Waterbeemd</i>	213
12	Modelling Human Cytochrome P450-Substrate Interactions <i>D.F.V. Lewis</i>	235
13	Forum Discussion	249
	Subject Index	299
	Previous Volumes Published in This Series	303
