

CONTENTS

Preface ix

PART ONE – Human Resource Planning

Modelling Human Systems in Support of Process Engineering 3
Joseph O. Ajaefobi and Richard H. Weston

Human Aspects of IT-Supported Performance Measurement System 17
Sai S. Nudurupati and Umit S. Bititci

Competence and Preference-based Workplace Assignment 31
Malte L. Peters and Stephan Zelewski

**Personnel Development and Assignment Based upon the Technology
Calendar Concept** 45
Sven Rottinger and Gert Zülch

**Reorganising the Working Time System of a Call-Centre with
Personnel-oriented Simulation** 57
Patricia Stock and Gert Zülch

PART TWO – Human Aspects in the Digital Factory

Impact of the Digital Factory on the Production Planning Process 73
Eberhard Haller, Emmerich F. Schiller and Ingo Hartel

Integrating Human Aspects into the Digital Factory 85
Gert Zülch

Human Aspects in Manufacturing Process Management 101
Manuel Geyer and Stefan Linner

PART THREE – Human Aspects in Production Planning & Control

Human Factors in Production Planning and Control	113
<i>Hans-Peter Wiendahl, Gregor von Cieminski, Carsten Begemann and Rouven Nickel</i>	
Human Factors Aspects in Set-Up Time Reduction	127
<i>Dirk Van Goubergen and Thurmon E. Lockhart</i>	
Influences of Human Operators on the Logistics of Manufacturing Cells	137
<i>Gregor von Cieminski and Peter Nyhuis</i>	
Simulation of Disassembly and Re-assembly Processes with Beta-distributed operation Times	147
<i>Jörg Fischer, Patricia Stock and Gert Zülch</i>	
Strategic Analysis of Products Related to the Integration of Human Judgement into Demand Forecasting	157
<i>Séverine Meunier Martins, Naoufel Cheikhrouhou and Rémy Glardon</i>	
Workplace Injury Risk Prediction and Risk Reduction Tools for Electronics Assembly Work	173
<i>Leonard O'Sullivan and Timothy Gallwey</i>	

PART FOUR – Knowledge Management

Effectiveness of Knowledge Management	187
<i>Jürgen Fleischer and Andreas Stepping</i>	
Practical Knowledge and Collaboration in Engineering	203
<i>Päivi Pöyry, Markus Mäkelä, Jouni Meriluoto and Marju Luoma</i>	
Work Process Knowledge	217
<i>Thomas Scheib</i>	
Knowledge Management Issues For Maintenance of Automated Production Systems	229
<i>Jacek Reiner, Jan Koch, Irene Krebs, Stefan Schnabel and Thomas Siech</i>	
Factory Planning Modules for Knowledge Sharing among Different Locations	239
<i>Michael F. Zaeh and Wolfgang Wagner</i>	

A Competence Approach in the Experience Feedback Process	253
<i>Jorge Hermosilló Worley, Holitiana Rakoto, Bernard Grabot and Laurent Geneste</i>	

PART FIVE – Management of Distributed Work

Learning for an Agile Manufacturing	269
<i>Heinz-Hermann Erbe</i>	
Competency Development in Distributed Work Environments	281
<i>Pamela Meil and Eckhard Heidling</i>	
New Approach for Global Education - Simulating Supply Chains by Applying World Wide Web	295
<i>Karl-Robert Graf, Siegfried Augustin and Konstantinos Terzidis</i>	
Overcoming Cultural Barriers in Distributed Work Environments	307
<i>Ralf Lossack and Matthias Sander</i>	
Developing a Web Enabled Gaming Approach to Mediate Performance Skills in Interorganisational Learning and Collaboration to Engineers	319
<i>Klaus D. Thoben and Max Schwesig</i>	
A Platform for Technical Consultation of Service Providers in Rapid Prototyping	331
<i>Claus Aumund-Kopp, Frank Ellebrecht, Holger Fricke, Holm Gottschalch and Christian Panse</i>	
The Evolution of Outsourced Operations - A Five-Phase Model	343
<i>Kimmo Pekkola, Riitta Smeds, Heli Syväoja and Pekka Turunen</i>	

PART SIX – Service Engineering

Implementing the Service Concept through Value Engineering	359
<i>Alastair Nicholson and Katarzyna Zdunczyk</i>	
Service Management in Production Companies	375
<i>Alexander Karapidis</i>
