Preface	IX
Introduction	XI
I Elementary local properties of holomorphic functions of several complex variables	1
1 Notation and definitions	1
2 The Cauchy formula for polydiscs	3
3 The open mapping theorem	8
4 Series of holomorphic functions	10
5 Holomorphic maps	11
6 Some holomorphic extension theorems	13
II Currents and complex structures	21
1 Currents	21
2 Regularisation	28
3 Kronecker index of two currents	38
4 Complex analytic manifolds	44
5 Complex structures	46
6 Differential forms of type (p, q)	48
7 The $\bar{\partial}$ operator and Dolbeault cohomology	49
8 Complex tangent space to the boundary of a domain	52
III The Bochner–Martinelli–Koppelman kernel and formula and applications	57
1 The Bochner–Martinelli–Koppelman kernel and formula	57
2 Existence of solutions to the $\bar{\partial}$ equation for compactly supported data	63
3 Regularity of $\bar{\partial}$	68
4 Hartogs' phenomenon	71

IV	Extensions of CR functions	75
1	The Bochner–Martinelli transform	75
2	CR functions on a real hypersurface	79
3	Bochner’s theorem	82
4	Stokes’ formula for CR functions	86
5	Integral of the Bochner–Martinelli kernel	88
6	An extension theorem for CR functions	90
V	Extensions of holomorphic and CR functions on manifolds	95
1	Cohomology with compact support and Hartogs’ phenomenon	95
2	Extension of C^∞ CR functions	98
3	The Cauchy–Fantappi� formula and Dolbeault’s lemma	100
4	The Dolbeault isomorphism	105
5	Bochner’s theorem and extensions of CR functions on manifolds	110
VI	Domains of holomorphy and pseudoconvexity	113
1	Domains of holomorphy and holomorphic convexity	113
2	Plurisubharmonic functions	121
3	Pseudoconvexity	133
VII	The Levi problem and the resolution of $\bar{\partial}$ in strictly pseudoconvex domains	147
1	Solving $\bar{\partial}$ with H�lder estimates in strictly convex open sets	147
2	Local uniform approximation of $\bar{\partial}$ -closed forms in strictly pseudoconvex domains	157
3	Finiteness of Dolbeault cohomology groups of strictly pseudoconvex domains	160
4	Invariance of Dolbeault cohomology under strictly pseudoconvex extensions	162
5	Vanishing theorems for Dolbeault cohomology of strictly pseudoconvex domains in $\mathbb{C}^n$	166
6	Integral formulae for solving $\bar{\partial}$ with H�lder estimates in strictly pseudoconvex domains	168
7	The Levi problem in $\mathbb{C}^n$	176
8	The Levi problem for complex analytic manifolds	179
VIII	Characterisation of removable singularities of CR functions on a strictly pseudoconvex boundary	195
1	Reduction to continuous functions	195
2	The two-dimensional case	196
3	A cohomological characterisation in dimension $n \geq 3$	198
4	Characterisation of weakly removable singularities	200

Appendix

A	Differentiable manifolds and differential forms	213
1	Differentiable manifolds	213
2	Partitions of unity	215
3	Cotangent space at a point and differential forms of degree 1 .	216
4	The tangent space at a point and vector fields.....	218
5	The algebra of differential forms	221
6	Integration of differential forms.....	226
7	Stokes' theorem	230
B	Sheaf theory	233
C	Functional analysis	241
	References	245
	Index of notation	249
	Index	251
