Introduction		7
Safety standards (Examples)		9
German standards.....		9
ASTM standards.....		10
European Committee for Standardization		11
1 Methods of testing cement – Determination of settings times – Vicat test (reference procedure)	According to DIN EN 196-3:2009-02	13
2 Methods of testing cement – Determination of fineness of cement by means of air-permeability method – Specific surface according to Blaine method.....	According to DIN EN 196-6:2010-05	21
3 Methods of testing of cement – Manufacturing and storing of cement mortar prisms.....	According to DIN EN 196-1:2016-11	31
4 Methods of testing of cement – Determination of strength – Flexural strength of cement mortar prisms	According to DIN EN 196-1:2016-11	37
5 Methods of testing cement – Determination of strength – Compressive strength of cement mortar prisms	According to DIN EN 196-1:2016-11	41
6 Determination of the water content by drying in ventilated oven – Total evaporable moisture content of aggregates by drying	According to DIN EN 1097-5:2008-06	47
7 Test method for field determination of water (moisture) – Content of sand by the calcium carbide gas pressure test.....	Non-standardized, based on DIN 18560-4:2012-06	53
8 Determination of the surface moisture of aggregates with dense structure – Thaulow method	Non-standardized	57
9 Determination of particle size distribution of aggregates with dense structure: Sieving method.....	According to DIN EN 933-1:2012-03	61
10 Determination of particle shape of aggregates – Shape index SI	According to DIN EN 933-4:2015-01	69
11 Determination of particle shape of aggregates – Flakiness index FI	According to DIN EN 933-3:2012-04	75
12 Test methods for aggregates with dense structure – Determination of dry bulk density by the cylinder method	According to DIN EN 52102:2013-10	81
13 Fines in aggregates – Washing method	based on DIN EN 933-1:2012-03	85
14 Detachable components in aggregates – Fine parts < 0.063 mm – Settling test.....	Non-standardized, based on DIN 4226-3:1983-04 (Document withdrawn)	89
15 Substances of organic origin in aggregates – Sodium hydroxide test	Non standardized, based on DIN 4226-3:1983-04 (Document withdrawn)	93
16 Determination of loose bulk of aggregates – Density and voids	According to DIN EN 1097-3:1998-06	97

17	Testing fresh concrete – Consistency of fresh concrete – Flow table test	According to DIN EN 12350-5:2009-08	101
18	Testing fresh concrete – Consistency of fresh concrete – Degree of compactability	According to DIN EN 12350-4:2009-08	107
19	Testing fresh concrete – Determination of water content of fresh concrete – Kiln-dry method.....	Non-standardized (former DIN 1048-1:1991-06, Document withdrawn)	113
20	Testing fresh concrete – Air content – Pressure gauge methods	According to DIN EN 12350-7:2009-08	117
21	Testing fresh concrete – Slump flow test of self-compacting concrete (SCC)	According to DIN EN 12350-8:2010-12	123
22	Testing fresh concrete – Self-compacting concrete (SCC) – J-ring test	According to DIN EN 12350-12:2012-12	127
23	Testing fresh concrete – Making, curing and density of concrete cubes and cylinders or strength tests	According to DIN EN 12390-2:2009-08 / DIN EN 12390-1:2009-07 / DIN EN 12390-7:2009-08	133
24	Testing fresh concrete – Making, curing and density of concrete beams – Compacting by vibrating table	According to DIN EN 12390-2:2009-08 / DIN EN 12390-1:2012-12 / DIN EN 12350-6:2009-08	141
25	Testing fresh concrete – Making, curing and density of concrete test samples – Depth of penetration of water under pressure	According to DIN EN 12390-8:2009-07	147
26	Testing hardened concrete – Compressive strength and density of concrete cubes.....	According to DIN EN 12390-3:2009-07 / DIN EN 12390-7:2009-07 / DIN EN 12390-1:2012-12	151
27	Testing hardened concrete – Compressive strength and density of cylindrical concrete specimens	According to DIN EN 12390-3:2009-07	157
28	Testing hardened concrete – Flexural strength and density of concrete beams – Two-point loading	According to DIN EN 12390-5:2009-07 / DIN EN 12390-7:2009-07 / DIN EN 12390-1:2012-12	163
29	Testing hardened concrete – Depth of penetration of water under pressure	According to DIN EN 12390-8:2009-07	169
30	Testing concrete in structures – Non-destructive testing – Determination of rebound number.....	According to DIN EN 12504-2:2012-12	173
