Preface	5
Important abbreviations	6
1. Summary of hydroelectric utilization of the Paraná basin river system in Brazil	7
1.1 General information on the energy-producing industry in Brazil	7
1.2 Electric power production, power station capacities and hydroelectric power potential in Brazil	7
1.3 The power station situation in the Paraná basin	12
2. Itaipú power station and reservoir	21
2.1 Introduction	21
2.2 Itaipú Agreement	21
2.3 Project execution and project description	22
2.4 Cost and financing	24
2.5 Itaipú reservoir	25
3. Political and economic problems arising from the construction of the Itaipú dam and reservoir	28
3.1 Cooperation between Brazil and Paraguay: Attempt to "tie" Paraguay geopolitically and economically to Brazil	28
3.2 Differences of opinion between Argentina and Brazil about hydroelectric utilization of the Rio Paraná	31
3.3 Assessment of the energy supply implications of Itaipú for Brazil and Paraguay	34
4. Basic natural and socio-economic conditions in the Itaipú region	39
4.1 Natural conditions	39
4.2 Socio-economic conditions and regional development processes in western Paraná in the "pre-Itaipú" period	41
4.3 Spatial development processes in eastern Paraguay	48
5. The Itaipú problem: assessment of the latest regional development processes and ecological problems	55
5.1 Problems of compulsory purchase	55
5.1.1 Background	55
5.1.2 Start of compulsory purchase and first reactions	56
5.1.3 Development of resistance and mass protest in the Itaipú region	57
5.1.4 Civil disobedience and state reactions	59

5.2	Resettlement problems and lack of planning	
	strategies for resettlement	62
5.2.1	Sequence of events and problem in general.	62
5.2.2	Case study: Arapotí	65
5.2.3	Paraguay	66
5.3	Changes in settlement and economic structures in rural areas	67
5.4	Development stimuli and urban development problems	
	arising from the construction of Itaipú	72
5.5	Ecological problems and consequences of Itaipú	78
5.5.1	Introduction.	78
5.5.2	Activities and programmes planned by Itaipú	
	Binacional to protect the environment.	79
5.5.3	Climatic consequences	81
5.5.4	Hydrological consequences	83
5.5.5	Seismic aspects	87
5.5.6	Effects on the aquatic ecosystem	88
5.5.7	Erosion problems	89
5.5.8	Health problems	91
6.	Assessment of measures taken by the state	94
	Bibliography (selection)	97
	List of figures	100
	List of tables	100
