Introduction	1
--------------------	---

Part 1. Recent Advances and Problems in Total Joint Replacement

Biomechanics of Endoprotheses of the Hip and Adaptive Reactions of the Bone B. KUMMER	5
Management of Femoral Bone Stock Deficiency in Total Hip Replacement H.P. CHANDLER	19
Bone Grafting of Acetabular Deficiencies in Total Hip Replacement A.H. WILDE, B.N. STULBERG	29
Follow-up Results of Chiari Pelvic Osteotomy for Patients with Acetabular Dysplasia K. HIROHATA, R. SHIBA, T. SHIMIZU	35
<i>Discussion I</i>	51
Total Condylar Knee Replacement: Late Results A.H. WILDE	55
Principles of Alignment in Primary and Revision Knee Replacement T.D.V. COOKE	59
<i>Discussion II</i>	67
Biomechanics of the Ankle R.A. MANN	73
Current Status of Total Ankle Replacement R.N. STAUFFER	83
<i>Discussion III</i>	91

Part 2. Problem Case Presentation and Surgical Decision Making

Segmental Comminuted Open Supracondylar Fracture of the Distal Femur	
K. MIZUNO	97
Management of Splayfoot: Report of a Case	
M. KUROSAKA, H. MURATSU, K. MIZUNO	105
Application of Machining Principles: Use of the Questor Saw Jig in TKR for Severe Valgus Hyperextension Osteoarthritis of the Knee	
T.D.V. COOKE	111
Treatment of Infected Total Knee Arthroplasty	
K. KAWAI	117
Cup Arthroplasty in a 31-year-old Female with Neglected Congenital Dislocation of the Hip	
R. SHIBA	127
