Contents

<i>Preface to the Second Edition</i>	iii
<i>Preface to the First Edition</i>	v
1. Overview	1
2. Solution Kinetics	17
3. Kinetic pH Profiles	59
4. Oxidation in Solution	122
5. Catalysis, Complexation and Photolysis	144
6. Stability of Peptides and Proteins	156
7. Disperse and Aggregated Systems	163
8. Physical Characteristics of Solids	196
9. Solid State Stability	230
10. Interactions of Moisture with Solids	281
11. Statistical Aspects	304
12. Preformulation	360
13. Packaging	386
14. Physical Testing	408
15. Modus Operandi for a Stability Program	486
16. 1993 ICH Guidelines	538
17. 1987 FDA Stability Guideline	551
<i>Author Index</i>	581
<i>Subject Index</i>	593
