The Impact of Plant Molecular Genetics

Bruno W. S. Sobral

Editor

Birkhäuser
1996

Contents

Preface	ix
---------------	----

List of Contributors	xv
----------------------------	----

PART I: GENETICS AND BREEDING

1. Genetics of Polyploids <i>Jorge A. G. da Silva and Bruno W. S. Sobral</i>	3
2. Validation Strategies for QTL Mapping <i>William C. Bridges, Jr. and Bruno W. S. Sobral</i>	39
3. Complex Trait Dissection in Forest Trees Using Molecular Markers <i>David M. O'Malley</i>	49
4. The Use of Comparative Genome Mapping in the Identification, Cloning and Manipulation of Important Plant Genes <i>Jeffrey L. Bennetzen</i>	71
5. The Potential Impacts of Apomixis: A Molecular Genetics Approach <i>Richard A. Jefferson and Ross Bicknell</i>	87
6. The Role of Meiotic Recombination in Generating Novel Genetic Variability <i>Patrick S. Schnable, Xiaojie Xu, Laura Civardi, Yiji Xia, An-Ping Hsia, Lei Zhang, Basil J. Nikolau</i>	103

PART II: EVOLUTION AND PHYLOGENETICS

7. Molecular Markers in Plant Conservation Genetics <i>William J. Hahn and Francesca T. Grifo</i>	113
8. Identifying Links Between Genotype and Phenotype Using Marker Loci and Candidate Genes <i>Keith A. Crandall</i>	137

9. Integrating Genetics, Phylogenetics and Developmental Biology <i>Elizabeth A. Kellogg</i>	159
10. Molecular Variation and the Delimitation of Species <i>Jerrold I Davis</i>	173
PART III: MICROORGANISMS IN AGRICULTURE: TWO EXAMPLES	
11. Application of the Polymerase Chain Reaction to the Detection of Plant Pathogens <i>Rhonda Honeycutt and Michael McClelland</i>	187
12. Molecular Approaches to Understanding and Manipulating Field Ecology of Microorganisms in Agriculture <i>Kate J. Wilson</i>	203
PART IV: TOOLS: SOFTWARE AND HARDWARE	
13. Informatics and Genomic Research <i>Carol Bult and Chris Fields</i>	221
14. Instrumentation for Automated Molecular Marker Acquisition and Analysis <i>Stephen R. E. Bates, David A. Knorr, Jennifer W. Weller, and Janet S. Ziegler</i>	239
PART V: THE EXPERIENCE OF MOLECULAR MARKER-ASSISTED BREEDING	
15. Molecular Marker-Assisted Breeding in a Company Environment <i>Stephen Smith and William Beavis</i>	259
16. Molecular Biology and Traditional Breeding Applied to the Improvement of Maize Nutritional Quality <i>Maurício A. Lopes and Brian A. Larkins</i>	273
PART VI: EXAMPLES OF SOCIAL AND ECONOMIC IMPACT OF NEW TECHNOLOGIES	
17. Economic Impact of Molecular Genetics on International Forestry <i>Victor M. Villalobos</i>	299
18. Molecular Anthropology of Cassava Cyanogenesis <i>Hans Rosling</i>	315
19. Structural Adjustment and Biotechnological Demand in South America: The Case of Brazil <i>Carlos A. Moreira Filho, Marcos E. da Silva, Guilherme L. S. Dias and Adriana P. A. Xavier</i>	329
Index	345
