

Paracetamol (Acetaminophen)

A Critical Bibliographic Review

LAURIE F. PRESCOTT

Professor of Clinical Pharmacology,
University of Edinburgh

Taylor & Francis
Publishers since 1798

Contents

<i>Preface</i>	ix
<i>Acknowledgements</i>	x
1 The History of Paracetamol	1
2 Physicochemical Properties and Prodrugs of Paracetamol	5
Physicochemical Properties	5
Prodrugs of Paracetamol	6
3 Analytical Methods for the Assay of Paracetamol and its Metabolites in Biological Fluids	9
Introduction	9
Colorimetry	11
Ultraviolet (UV) Spectrophotometry	16
Paper, Thin Layer and Column Chromatography	16
Gas Liquid Chromatography	17
High Performance Liquid Chromatography	18
Enzymatic Methods	27
Immunoassay	28
Other Methods	28
Paracetamol Metabolites	29
4 The Absorption of Paracetamol	33
Mechanism and Sites of Absorption	33
First Pass Metabolism of Paracetamol	36
Formulation and Bioavailability	39
Paracetamol Absorption and Gastric Emptying	41
Factors Influencing Paracetamol Absorption	45
Effects of Drugs on Paracetamol Absorption	49
Reduction of Paracetamol Absorption Following Overdosage	51
Rectal Absorption of Paracetamol	55

Other Routes of Administration	57
Absorption as a Function of Therapeutic Efficacy	58
Absorption of Paracetamol Prodrugs	59
5 The Distribution of Paracetamol	61
Introduction	61
Tissue Distribution	62
Plasma Protein Binding	65
Distribution of Paracetamol Conjugates	66
6 The Metabolism of Paracetamol	67
Historical Survey	67
Glucuronide Conjugation	70
Sulphate Conjugation	73
Metabolic Activation of Paracetamol	76
Reactions and Covalent Binding of <i>N</i> -acetyl- <i>p</i> -benzoquinoneimine	89
Glutathione-derived Metabolites of Paracetamol	92
Other Minor Metabolites	99
7 Factors Influencing Paracetamol Metabolism	103
Species Differences	103
Dose Dependence	106
Age	113
Sex, Pregnancy and Oral Contraceptives	117
Genetic and Environmental Factors	121
Diet and Nutrition	125
Stimulation and Inhibition of Paracetamol Metabolism	128
Effects of Disease States	143
8 The Biliary Excretion of Paracetamol and its Metabolites	151
Introduction	151
Dose Dependence	153
Effects of Induction and Inhibition of Drug Metabolism	153
9 Renal Excretion and Other Routes of Removal of Paracetamol and its Metabolites	157
Mechanisms of the Renal Excretion of Paracetamol	157
Extracorporeal Removal	164
Excretion of Paracetamol in Breast Milk	166
10 The Pharmacokinetics of Paracetamol	167
Model-dependent and Model-independent Analysis	167
Paracetamol Absorption	172
Distribution	174
Paracetamol Elimination	175
Pharmacokinetics of Paracetamol Glucuronide and Sulphate	190
Saturation Kinetics and Paracetamol Overdosage	191
Extracorporeal Removal of Paracetamol	193

Relationships Between Pharmacokinetics and the Toxicity and Efficacy of Paracetamol	194
11 Pharmacological Actions and Therapeutic Use of Paracetamol	197
Introduction	197
Analgesia	197
Anti-inflammatory Activity	211
Antipyretic Action	212
Mechanisms of Analgesic and Antipyretic Action	219
Analgesic and Antipyretic Actions and Plasma Concentrations of Paracetamol	227
Other Pharmacological Actions of Paracetamol	229
Therapeutic Use of Paracetamol	237
12 General Toxicology	241
Introduction	241
Acute Toxicity	242
Nephrotoxicity and Hepatotoxicity	245
Toxic Effects on the Blood	246
Reticulo-endothelial System, Thyroid and Salivary Glands	248
Pulmonary and Cardiovascular Toxicity	248
Central Nervous System Toxicity	250
Gastrointestinal System	251
Oculotoxicity	252
Reproductive Toxicity	252
Genotoxicity and Mutagenicity	253
Carcinogenicity	256
Cytotoxicity	258
Metabolic Effects	259
13 Nephrotoxicity	263
Introduction	263
Acute Nephrotoxicity	263
Chronic Nephrotoxicity	271
Mechanisms of Nephrotoxicity	275
14 Hepatotoxicity	285
Introduction	285
Pathology	286
Biochemical Abnormalities	300
Mechanisms of Paracetamol Hepatotoxicity	307
Factors Influencing the Hepatotoxicity of Paracetamol	330
15 Adverse Reactions and Interactions	353
Introduction	353
Allergy	354
Dermatological Reactions	357
Respiratory and Cardiovascular Systems	358
Adverse Haematological Effects	358

Contents

Adverse Gastrointestinal Effects	363
Hepatotoxicity	368
Nephrotoxicity	380
Central Nervous System Effects	393
Effects on Pregnancy and the Newborn	394
Adverse Metabolic Effects	395
Drug Interactions	397
16 Paracetamol Overdose	401
Introduction	401
Epidemiology	402
Clinical Features	415
Biochemical Abnormalities	421
Haematological Abnormalities	430
Liver Pathology	431
Renal Failure	435
Other Complications	440
Plasma Paracetamol Concentrations and Toxicity	443
Factors Influencing the Hepatotoxicity of Paracetamol	451
General Management of Paracetamol Poisoning	459
Specific Antidotal Therapy	467
<i>References</i>	475
<i>Index</i>	695
