BIOTECHNOLOGICAL APPLICATIONS OF LIPID MICROSTRUCTURES

Edited by

Bruce Paul Gaber

Joel M. Schnur

Naval Research Laboratory
Washington, D.C.

and

Dennis Chapman

Royal Free Hospital School of Medicine
London, United Kingdom

PLENUM PRESS • NEW YORK AND LONDON

CONTENTS

SECTION I

BIOPHYSICAL STUDIES OF PHOSPHOLIPID BILAYERS

Molecular Modeling of the Phospholipid Bilayer B.P. Gaber, M. Nagumo, W.R. Light, I. Chandrasekhar and N. Pattabiraman	1
Biomembranes: Structure of Biomembranes and Their Models D. Chapman	13
Stereoselective Recognition in Phospholipid Monolayers E.M. Arnett, J.M. Gold, N. Harvey, E.A. Johnson, and L.G. Whitesell	21
Biradical Tetraether Lipids From Thermoacidophilic Archaeobacteria A. Gulik, V. Luzatti, M. De Rosa, and A. Gambacorta	37
Physical Properties of Membrane Lipids Isolated From A Thermophilic Eubacterium (<u>Thermus</u> sp.) A. Prado, M.S. da Costa, J. Laynez, and V.M.C. Madeira	47
Time Resolved X-Ray Analysis of <u>E.Coli</u> Lipid and Membrane Structural Transitions J.L. Ranck, A. Tardieu, L. Letellier, and E. Shechter	59

SECTION II

BILAYER-BIOMOLECULE INTERACTIONS

Stabilization of Small, Unilamellar Phospholipid Vesicles by Sucrose During Freezing and Dehydration H. Hauser and G. Strauss	71
Surfactant-Induced Liposome Fusion: Molecular Mechanisms and Biotechnological Applications F.M. Goni and A. Alonso	81

Molecular Mechanisms of Membrane Fusion and Applications of Membrane Fusion Techniques J. Wilschut, J. Scholma, and T. Stegmann	105
The Interaction of Coenzyme Q and Vitamin E With Multibilayer Liposomes J.C. Gomez-Fernandez, F.J. Aranda, J. Villalain, and A. Ortiz	127
The Interaction of an Anti-Phosphorylcholine Monoclonal Antibody With Phosphorylcholine-Containing Lipids M.-A. Urbaneja and D. Chapman	141

SECTION III

LIPOSOMES AS DELIVERY SYSTEMS

Liposomes As A Drug Delivery System: Optimization Studies G. Gregoriadis	151
Liposome-Encapsulated Hemoglobin: A Synthetic Red Cell M.C. Farmer, S.A. Johnson, R.L. Beissinger, J.L. Gossage, A.B. Lynn, and K.A. Carter	161
Progress in Development Of Synthetic Erythrocytes Made By Encapsulation Of Hemoglobin L. Djordjevich and A.D. Ivankovich	171
Some Structural and Functional Properties of Hemoglobin-Containing Liposomes (Hemosomes), A Potential Red Blood Cell Substitute J. Szebeni, E.E. Di Iorio, H. Hauser, and K.H. Winterhalter	199
Liposome-Based Immunoassays For Detection Of Small And Large Molecules B.P. Gaber, F.S. Ligler, and R. Bredehorst	209

SECTION IV

ARTIFICIAL CELLS

Artificial Cells With Ultrathin Lipid-Polymer or Lipid-Protein Membranes T.M.S. Chang	215
Immobilized Photosynthetic Membranes and Cells for the Production of Fuels and Chemicals D.O. Hall and K.K. Rao	225
Development of Plastid Membranes in Immobilized Systems C. Sundqvist and C. Grevby	247

SECTION V

ENERGY TRANSFER IN BILAYERS

Development of Membrane-Based Biosensors: Measurement of Current From Photocycling Bacteriorhodopsin on Patch Clamp Electrodes P. Yager	257
Biotechnological Application of Membrane Proteins Reconstituted Into Vesicular and Planar Lipid Bilayers N.A. Dencher	269
Electron Transfer in Monolayer Assemblies and Energy Storage in Photosynthetic Bacteria H. Kuhn	279
Photochemical Reactions of Dyes and Olefins in Monolayer Films and Supported Multilayers D.G. Whitten, L. Collins-Gold, T.J. Dannhauser, and W.F. Mooney	291

SECTION VI

NOVEL BIOMATERIALS

Technological Development of Lipid Based Tubule Microstructures A.S. Rudolph, J.M. Calvert, P.E. Schoen, and J.M. Schnur	305
Magnetite and Magnetotaxis in Microorganisms R.B. Frankel and R.P. Blakemore	321
Enzymes Covalently Bound on Collagen Membranes Immobilization of Blood Clotting Factor XIII D.C. Gautheron, B.G. Blanchy, and P.R. Coulet	331
Biocompatibility of Haemodialysis Membranes A. van Berlo and D.J. Ellens	341
Prostaglandin Oligomers: Potential Agents for the Protection Against the Effects of Oxygen Deprivation G.L. Nelson	359
Participants	383
Index	391
