List of contributors	ix
Introduction	1
<i>Robert M. May</i>	
PART 1 EVOLUTION: PATTERNS AND PROCESSES	
Overview	15
<i>Sean Nee, Pierre-Henri Gouyon, Godfrey Hewitt and Jean-Jacques Jaeger</i>	
1 Diversity in the past: comparing cladistic phylogenies and stratigraphy	19
<i>Michael J. Benton and Glenn W. Storrs</i>	
2 What can phylogenetic patterns tell us about the evolutionary processes generating biodiversity?	41
<i>Hervé Philippe and André Adoutte</i>	
3 New computer packages for analysing phylogenetic tree structure	60
<i>Paul H. Harvey, Andrew Rambaut and Sean Nee</i>	
4 Is it ancient or modern history that we can read in the genes?	69
<i>Richard A. Nichols and Mark A. Beaumont</i>	
5 Evolution of adaptive polymorphism in spatially heterogeneous environments	88
<i>Thierry de Meeûs and François Renaud</i>	
PART 2 ECOLOGY: FROM POPULATIONS TO COMMUNITIES TO ECOSYSTEMS	
Overview	99
<i>Jean Clobert, Chris Gliddon, Bradford A. Hawkins and Michael E. Hochberg</i>	
6 Local diversity: a problem with too many solutions	104
<i>Bryan Shorrocks</i>	

7	The population dynamics of single host–multiparasitoid interactions	123
	<i>T. Hefin Jones and Michael P. Hassell</i>	
8	Structural constraints on food web assembly	142
	<i>Philip H. Warren</i>	
9	Trophic interactions, nutrient supply, and the structure of freshwater pelagic food webs	162
	<i>G��rard Lacroix, Fran��oise Lescher-Moutou�� and Roger Pourriot</i>	
10	Linking communities and ecosystems: trophic interactions as nutrient cycling pathways	180
	<i>James P. Grover and Michel Loreau</i>	
 PART 3 LARGE SCALE DIVERSITY PATTERNS AND CONSERVATION		
	Overview	195
	<i>John H. Lawton, Robert Barbault, Claude Combes and Richard D. Gregory</i>	
11	Does climate cause the global biodiversity gradient?	199
	<i>John R. G. Turner, Jack J. Lennon and Jeremy J. D. Greenwood</i>	
12	Spatial covariance in the species richness of higher taxa	221
	<i>Kevin J. Gaston</i>	
13	Biodiversity of parasites in relation to their life-cycles	243
	<i>Serge Morand</i>	
14	Biodiversity value and taxonomic relatedness	261
	<i>Paul H. Williams</i>	
15	Utilising genetic information in plant conservation programmes	278
	<i>Richard A. Ennos</i>	
16	Essential ingredients of real metapopulations, exemplified by the butterfly <i>Plebejus argus</i>	292
	<i>Chris D. Thomas</i>
