Applied Wavelet Analysis with S-PLUS

With 192 illustrations

Springer

Contents

1	Introduction	1
1.1	Example 1: Digital Image Compression	2
1.2	Example 2: Noise Removal	4
1.3	Example 3: Time-Frequency Analysis	6
1.4	Example 4: Prototyping Fast Algorithms	7
1.5	References for Wavelet Analysis	8
2	Wavelet Analysis of 1-D Signals	11
2.1	Wavelet Functions and Approximations	11
2.1.1	Father and Mother Wavelets	13
2.1.2	The Wavelet Approximation	14
2.1.3	Location and Scale Families	15
2.1.4	Orthogonal Wavelet Families	16
2.2	The Discrete Wavelet Transform	19
2.2.1	Computing the Discrete Wavelet Transform	19
2.2.2	DWT Objects	22
2.2.3	The Inverse Discrete Wavelet Transform	24
2.2.4	The Wavelet Approximation Using the Largest Coefficients	24
2.3	Multiresolution Analysis	27
2.3.1	Computing a Multiresolution Decomposition	27

2.3.2	Multiresolution Approximation	29
2.3.3	Zooming Feature of Multiresolution Analysis	30
2.4	Time-Scale View of Wavelets	31
2.5	Biorthogonal Wavelets	34
2.6	Pyramid Algorithm	37
2.6.1	Forward Algorithm to Compute the DWT	37
2.6.2	Backward Algorithm to Compute the IDWT	38
3	Wavelet Analysis of Images	41
3.1	2-D Wavelet Functions	41
3.1.1	2-D Wavelet Families	42
3.1.2	The 2-D Wavelet Approximation	44
3.2	2-D Discrete Wavelet Transform	45
3.2.1	Computing the 2-D DWT	45
3.2.2	2-D DWT Objects	48
3.2.3	The Inverse 2-D DWT	49
3.3	Multiresolution Analysis of Images	50
3.3.1	Computing a 2-D Multiresolution Decomposition	50
4	Exploratory Wavelet Analysis	53
4.1	Exploratory 1-D Wavelet Analysis	53
4.1.1	Summaries of DWT Objects	54
4.1.2	Summaries of Decomposition Objects	58
4.1.3	Summaries of Crystals	60
4.2	Visual and Statistical Summaries for the 2-D DWT	62
5	More on Wavelet Analysis	67
5.1	Selecting Options for Wavelet Analysis	68
5.1.1	Selecting the Multiresolution Level	68
5.1.2	Selecting a Wavelet	69
5.2	Extracting Crystals from a DWT Object	72
5.2.1	Extracting Crystals from 1-D DWT Objects	72
5.2.2	Extracting Crystals from 2-D DWT Objects	73
5.3	Creating Wavelet Packets	74
5.4	Math and Logical Operators Applied to DWT Objects	75
5.5	Replacement in DWT Objects	75
5.5.1	Replacement Using Logical Vectors	76
5.5.2	Simulation of Multiscale Processes	78

5.6	Subscripting by Coefficient	79
5.7	Bypassing the DWT Subscript, Assignment, and Math Operators	81
6	Nonparametric Estimation with Wavelets	83
6.1	Nonparametric Regression and Smoothing	84
6.2	Understanding Wavelet Shrinkage	86
6.2.1	Wavelets are Good Building Blocks	86
6.2.2	Noise Affects All Wavelet Coefficients	86
6.2.3	De-Noising by Wavelet Shrinkage	87
6.2.4	The WaveShrink Algorithm	88
6.2.5	Theoretical Properties of Wavelet Shrinkage	90
6.3	Assessing the WaveShrink Fit	90
6.4	Tuning the Smooth	94
6.4.1	Selecting the Shrinkage Function	94
6.4.2	Selecting the Shrinkage Threshold	97
6.4.3	Estimating the Scale of the Noise	99
6.4.4	Choosing the Resolutions to Shrink	100
6.4.5	Extra-Fine Tuning	100
6.5	Comparison with Other Smoothers	101
6.6	Variance and Bias Estimation in WaveShrink	102
6.7	Bootstrapping WaveShrink	103
6.8	WaveShrink Applied to Spectral Density Estimation	105
7	Wavelet Packet Analysis	111
7.1	Wavelet Packets	111
7.1.1	Wavelet Packet Families	113
7.1.2	Wavelet Packet Location and Scale Families	114
7.2	Wavelet Packet Tables	114
7.2.1	Computing a Wavelet Packet Table	116
7.2.2	Wavelet Packet Table Objects	117
7.3	Wavelet Packet Transforms	118
7.3.1	Obtaining the DWT From a Table	119
7.3.2	Selecting a Level	120
7.3.3	General Wavelet Packet Transforms	120
7.3.4	Inverting Wavelet Packet Transforms	122
7.3.5	Decomposing a Wavelet Packet Transform	123
7.3.6	Time-Frequency Plots for Wavelet Packets	125
7.4	The Best Basis Algorithm	128
7.4.1	Computing a Best Basis	128

7.4.2	Computing the Best Level	129
7.4.3	Using Tree Plots to Visualize Bases	130
7.4.4	Wavelet Packet Cost Tables	132
7.5	Wavelet Packet Analysis of a Speech Signal	135
8	Cosine Packet Analysis	143
8.1	Discrete Cosine Transform	144
8.1.1	DCT Types	144
8.1.2	Computing the DCT	145
8.1.3	Block DCT	146
8.2	Cosine Packets	149
8.2.1	Special Tapering Functions	150
8.2.2	Dyadic Cosine Packet Families	151
8.3	Cosine Packet Transforms	153
8.3.1	Block Cosine Packet Transform	154
8.3.2	Cosine Packet Transform Objects	154
8.3.3	Inverting and Decomposing CPTs	156
8.3.4	Time-Frequency Plots with CPTs	158
8.4	Cosine Packet Tables	159
8.4.1	Computing a Cosine Packet Table	160
8.4.2	Selecting Cosine Packet Transforms from Tables	161
8.4.3	Best Basis Selection for Cosine Packets	162
8.5	Cosine Packet Analysis of a Speech Signal	165
9	Wavelet Packet and Cosine Packet Analysis of Images	171
9.1	2-D Wavelet and Cosine Packet Functions	171
9.2	2-D Packet Transforms	173
9.2.1	Computing 2-D Wavelet Packet Transforms	174
9.2.2	Computing 2-D Cosine Packet Transforms	177
9.3	Best Basis Selection in 2-D	180
9.4	Analysis of a Digital Fingerprint Image	184
9.4.1	Proposed FBI Standard for Compression	185
9.4.2	Best Basis Analysis of Fingerprints	190
10	Matching Pursuit and Molecules	197
10.1	Matching Pursuit Decompositions	197
10.2	Computing a Matching Pursuit Transform	200
10.3	Molecule and Atom Objects	203

10.4	Comparison with DWT and Best Basis	204
11	Variations on Wavelet Analysis	211
11.1	Non-Decimated Wavelets	211
11.1.1	Wavelet Shrinkage with Non-Decimated Wavelets	212
11.1.2	The “à trous” Wavelet Transform	215
11.2	Robust Smoother-Cleaner Wavelets	216
11.2.1	Smoother-Cleaner Algorithm	217
11.2.2	Computing the Robust Smoother-Cleaner DWT	219
11.2.3	Selecting the Robust DWT	221
11.3	Creating and Using Your Own Wavelets	223
11.3.1	Creating New Wavelets	223
11.3.2	Analysis with Your Own Wavelet Functions	225
12	Wavelet Algorithms and Filters	229
12.1	Wavelet Filters	230
12.1.1	Orthogonal Wavelet Filters	230
12.1.2	Convolution Formulas	231
12.1.3	Transfer Functions	232
12.1.4	Biorthogonal Wavelet Filters	234
12.2	Implementing the Pyramid Algorithm	238
12.3	The DWT as a Linear Transform	239
12.4	Properties of Wavelet Functions	242
12.5	The Dilation Equation	244
12.5.1	Evaluating a Wavelet Function at the Dyadics	245
12.5.2	Evaluating a Wavelet Function at the Integers	246
12.6	Algorithms for the 2-D DWT	247
13	Wavelet Packet and Cosine Packet Algorithms	251
13.1	Wavelet Packet Filters and Algorithms	252
13.1.1	The Splitting Algorithm	252
13.1.2	Wavelet Packet Filters	253
13.1.3	Evaluating a Wavelet Packet Function . . .	255
13.2	Cosine Packet Algorithms	256
13.2.1	Computing the DCT	256
13.2.2	Computing the Cosine Packet Transform .	257
13.2.3	Tapers for Orthogonal Cosine Packets . . .	260

13.2.4	Boundary Extension Rules	261
13.3	Algorithms for 2-D Packets	263
13.3.1	The 2-D WPT Algorithm	263
13.3.2	The 2-D CPT Algorithm	264
14	Boundary Conditions for Wavelet Analysis	267
14.1	Types of Boundary Treatment Rules	268
14.2	Considerations in Selecting a Boundary Method .	271
14.3	Comparing Boundary Treatments	273
14.4	Boundary Correction Algorithms	275
14.4.1	Examining the Matrix Operators	276
A	Orthogonal Wavelet Functions	279
B	Biorthogonal Wavelet Functions	287
C	Wavelet Classes and Objects	295
C.1	1-D Transform and Analysis Objects	295
C.1.1	1-D Transforms	295
C.1.2	Decompose Objects	298
C.1.3	Other 1-D Analysis Objects	299
C.2	Crystals, Molecules, and Atoms	299
C.2.1	Crystals	299
C.2.2	Molecules and Atoms	300
C.3	2-D Transform and Analysis Objects	301
C.3.1	2-D Transform Objects	301
C.3.2	Other 2-D Objects	302
C.4	Wavelet Functions, Filters, and Dictionaries . . .	302
D	S+WAVELETS Function List	305
