TABLE OF CONTENTS

Preface ix

List of participants xi

TUTORIAL ON INVERSE PROBLEMS

1. An Introduction to Inverse Problems in Partial Differential Equations
for Physicists, Scientists and Engineers
P. DuChateau 3

PART I. Identifying Unknown Parameters in Parabolic Partial Differential
Equations 3

PART II. Towards Unified Treatment of Inverse and Identification Problems
..... 19

PART III. An Inverse Problem for the Hydraulic Properties of Porous Media
..... 38

HYDROLOGY

2. Interpretation of Field Tests in Low Permeability Fractured Media. Recent
Experiences
*J. Carrera, L. Vives, P. Tume, M. Saaltink, G. Galarza, J. Guimerà
and A. Medina* 53

3. New Front Limitation Algorithm
*F. Häfner, S. Boy, S. Wagner, A. Behr, V. Piskarev, I. Zakirov and
B. Palatnik* 71

4. Identification and Reduction of Model Structure for Modeling Distributed
Parameter Systems
N.-Z. Sun 91

5. Results from a Comparison of Geostatistical Inverse Techniques for
Groundwater Flow
*D.A. Zimmerman, C.L. Arness, G. De Marsily, M.G. Marietta
and C.A. Gotway* 105

NONLINEAR DIFFUSION AND SOIL PHYSICS

6. Identification of the Hydraulic Diffusivity of a Soil by Inverse Method with Dual-Energy Gamma Ray Attenuation Measurements
F. Barataud, D. Stemmelen and C. Moyne 123
7. Identification of Parameters for Heat Conductivity Equations
N.D. Botkin 133
8. Sensitivity Analysis in Parameter Identification, Test Planning and Test Evaluation Procedures for Two-Phase Flow in Porous Media
O. Kemmesies and L. Luckner 143
9. An Inverse Problem for Porous Medium Equation
R. Nabokov 155
10. Evaluation of Different Boundary Conditions for Independent Determination of Hydraulic Parameters Using Outflow Methods
T. Zurmühl 165

GEOPHYSICAL METHODS

11. Gravity Data Inversion Using Subspace Method
M. Mirzaei, J.W. Bredewout and R.K. Snieder 187
12. A Method to Determine Parameters of a Linear Functional Equations Set and its Application to the Lightning Location Problem
A.V. Panyukov and V.A. Strauss 199

MATHEMATICAL ANALYSIS OF INVERSE AND ILL-POSED PROBLEMS

13. Stability Estimates for Inverse Problems
H.J.S. Dorren and R.K. Snieder 213
14. Identifiability of Distributed Physical Parameters
S. Handrock-Meyer 225
15. Inverse Scattering Problem for the Wave Equations and its Applications
L.P. Nizhnik 233
16. A Descriptive Regularization Approach for a Class of Ill-Posed Nonlinear Integral Equations
T. Schröter and B. Hofmann 239
17. Parameter Estimation in Nonlinear Models by Using Total Least Squares
W.J.H. Stortelder 249
18. Tikhonov Regularization for Identification Problems in Differential Equations
U. Tautenhahn 261

PARALLEL ALGORITHMS FOR INVERSE PROBLEMS

19. Parameter Estimation in Multispecies Transport Reaction Systems Using
Parallel Algorithms
M.W. Zieße, H.G. Bock, J.V. Gallitzendörfer and J.P. Schlöder273

20. On Design and Implementation of Parallel Algorithms for Solving Inverse
Problems
W. Zimmermann, W. Löwe and J. Gottlieb283
