

Plant Genome

Biodiversity and Evolution

Volume 1, Part A
Phanerogams

Editors

A.K. SHARMA and A. SHARMA

Science Publishers, Inc.

Enfield (NH), USA

Plymouth, UK

Contents

<i>Preface to the Series</i>	v
<i>Preface to this Volume</i>	vii
<i>List of Contributors</i>	xi
1. Molecular Phylogenetics, Evolution and Population Biology in Brassicaceae	1
Marcus Koch	
2. Evolutionary Dynamics of Repetitive DNA Fraction in Two Wild Triticeae Species	37
Alexander Belyayev, Olga Raskina and Eviatar Nevo	
3. Hybridization and Evolution of the nrITS Spacer Region	57
Volker Wissemann	
4. Gene Families and Their Evolution in Angiosperms: ABC Transporter Genes in <i>Arabidopsis thaliana</i>	73
H. Üner Kolukisaoglu	
5. Cladistic Analysis of Chloroplast <i>rbcL</i> Gene and <i>trnL-trnF</i> Intergenic Spacer Sequences in Taxaceae and Related Taxa	103
Ting Wang, Ying-Juan Su, Bo Zheng, Xue-Yan Li, Qing-lu Zeng, Li-jia Qu, and Hong-Ya Gu	
6. Genome Phylogenetics in <i>Chrysanthemum sensu lato</i>	117
Katsuhiko Kondo, Magdy Hussein Abd El-Twab, Reiko Idesawa, Shino Kimura and Ryuso Tanaka	

7. Use of Repeated and Coding DNA Sequences to Study Genetic Relationships in Genus <i>Helianthus</i>	201
<i>A. Cavallini, S. Santini, T. Giordani and L. Natali</i>	
8. Cytogenetic and Molecular Genetic Evidence on Evolution of Genus <i>Triticum</i>	223
<i>Wenguang Cao</i>	
9. Hybrid Introgression in <i>Betula</i>	249
<i>Kesara Anamthawat-Jónsson</i>	
10. Molecular Systematics of Bryophytes in Context of Land Plant Phylogeny	267
<i>Dietmar Quandt and Michael Stech</i>	
11. The Use of <i>in situ</i> Hybridization to Investigate Plant Chromosome Diversity	297
<i>Paul Maxwell Datson and Brian Grant Murray</i>	
12. Molecular Phylogenetic Studies in Rosaceae	319
<i>Daniel Potter</i>	
Authors Index	353
Detailed Contents	379
