New York / Chichester / Brisbane / Toronto / Singapore

CONTENTS

Preface	xv
Introduction	xvii
1 Introduction and General Aspects	1
1.1. Hydrocarbons and Their Classes / 1	
1.2. Energy–Hydrocarbon Relationship / 2	
1.3. Hydrocarbon Sources and Separation / 4	
1.3.1. Natural Gas / 5	
1.3.2. Petroleum or Crude Oil / 6	
1.3.3. Heavy Oils, Shale, and Tar Sand / 7	
1.3.4. Coal and Its Liquefaction / 8	
1.4. Petroleum Refining and Upgrading / 10	
1.4.1. Distillation of Crude Petroleum / 10	
1.4.2. Hydrocarbon Refining and Conversion Processes / 10	
1.5. Finite, Nonrenewable Hydrocarbon Resources / 12	
1.6. Hydrocarbon Synthesis / 13	
1.6.1. Syngas ($\text{CO}—\text{H}_2$)-based Fischer–Tropsch Synthesis / 14	
1.6.2. Methyl Alcohol Conversion / 15	
1.6.3. Carbon Dioxide Conversion / 16	
1.6.4. Direct Methane Conversion / 17	
1.7. Chemical Nature of Hydrocarbon Conversion Reactions / 19	
1.7.1. Homolytic (Free-Radical) Reactions / 19	
1.7.2. Heterolytic (Ionic) Reactions / 19	
1.8. Use of Hydrocarbons / 22	
1.8.1. Refined Petroleum Products / 22	
1.8.2. Transportation Fuels / 22	
1.8.3. Chemicals and Plastics / 23	
References and Notes / 24	

2. Hydrocarbons from Petroleum and Natural Gas 28

- 2.1. Cracking / 28
 - 2.1.1. Cracking Processes / 28
 - 2.1.2. Mechanism of Cracking / 31
 - 2.1.3. Comparison of Cracking Operations / 34
- 2.2. Reforming / 36
 - 2.2.1. Thermal Reforming / 37
 - 2.2.2. Catalytic Reforming / 38
 - Hydroforming* / 38
 - Metal-Catalyzed Reforming* / 39
- 2.3. Dehydrogenation with Olefin Production / 42
 - 2.3.1. Thermal Dehydrogenation / 42
 - 2.3.2. Catalytic Dehydrogenation to Alkenes / 44
 - 2.3.3. Practical Applications / 45
 - C₂-C₃ Alkenes* / 45
 - C₄ Alkenes* / 45
 - 1,3-Butadiene and Isoprene* / 46
 - Higher Olefins* / 47
 - Styrene* / 47
- 2.4. Upgrading of Natural-Gas Liquids / 48
- 2.5. Aromatics Production / 48
 - 2.5.1. Catalytic Dehydrogenation and Dehydrocyclization / 49
 - 2.5.2. Practical Applications / 53

References / 55

3. Synthesis from C₁ Sources 64

- 3.1. Nature's C₁ Chemistry and Chemical Reduction of CO₂ / 65
- 3.2. Fischer-Tropsch Chemistry / 66
 - 3.2.1. Catalysts / 68
 - 3.2.2. Mechanism / 69
 - 3.2.3. Related Processes / 73
- 3.3. Direct Coupling of Methane / 75
 - 3.3.1. Catalytic Oxidative Condensation / 75
 - 3.3.2. High-Temperature Self-Coupling / 75
- 3.4. Hydrocarbons through Methane Derivatives / 80
 - 3.4.1. Hydrocarbons through Methanol / 80
 - Methanol Synthesis* / 80
 - Methanol Conversion to Hydrocarbons* / 84
 - 3.4.2. Hydrocarbons through Methyl Halides / 89

3.4.3. Hydrocarbons through Sulfurated Methanes / 90

References / 91

4. Isomerization**102**

4.1. Acid-catalyzed Isomerization / 103

4.1.1. Alkanes / 103

Mechanism / 107

4.1.2. Arylalkanes / 111

*Side-Chain Isomerization / 111**Positional Isomerization / 112*

4.1.3. Alkenes and Dienes / 115

4.2. Base-Catalyzed Isomerization / 118

4.2.1. Alkenes / 118

4.2.2. The Reversible Acetylene–Allene Transformation / 120

4.3. Metal-Catalyzed Isomerization / 122

4.3.1. Alkanes / 122

4.3.2. Alkenes / 125

4.4. Pericyclic Rearrangements / 129

4.5. Practical Applications / 132

4.5.1. Isomerization of C_4 – C_6 Hydrocarbons / 132*Alkanes / 132**Alkenes 133*

4.5.2. Isomerization of Xylenes / 133

References / 134

5. Alkylation**144**

5.1. Acid-Catalyzed Alkylation / 144

5.1.1. Alkylation of Alkanes with Alkenes / 144

5.1.2. Alkylation of Alkanes under Superacidic Conditions / 150

Alkylolysis (Alkylative Cleavage) / 154

5.1.3. Alkylation of Alkenes and Alkynes / 154

*Alkylation of Alkenes with Organic Halides / 154**Alkylation of Alkynes / 156**Alkylation with Carbonyl Compounds: The Prins Reaction / 156*

5.1.4. Alkylation of Aromatics / 157

*Catalysts / 159**Alkylation with Alkyl Halides / 161*

<i>Alkylation with Alkenes</i>	/ 166
<i>Alkylation with Alkanes</i>	/ 169
<i>Alkylation with Alcohols</i>	/ 172
<i>Transalkylation and Dealkylation</i>	/ 174

- 5.2. Base-Catalyzed Alkylation / 176
- 5.3. Alkylation through Organometallics / 178
- 5.4. Miscellaneous Alkylations / 181
- 5.5. Practical Applications / 182
 - 5.5.1. Isoalkane-Alkene Alkylation / 182
 - 5.5.2. Ethylbenzene / 185
 - 5.5.3. Cumene / 186
 - 5.5.4. Xylenes / 186
 - 5.5.5. *p*-Ethyltoluene / 187
 - 5.5.6. Detergent Alkylates / 187

References / 188

6. Addition

199

- 6.1. Hydration / 199
 - 6.1.1. Alkenes and Dienes / 200
 - 6.1.2. Alkynes / 201
 - 6.1.3. Practical Applications / 202
 - Production of Alcohols by Hydration of Alkenes* / 202
 - Production of Octane-Enhancing Oxygenates* / 204
 - Acetaldehyde* / 205
- 6.2. HX Addition / 205
 - 6.2.1. Hydrohalogenation / 205
 - Alkenes* / 205
 - Dienes* / 209
 - Alkynes* / 211
 - 6.2.2. Hypohalous Acids and Hypohalites / 212
 - 6.2.3. Hydrogen Cyanide / 214
 - 6.2.4. Practical Applications / 215
 - Ethyl Chloride* / 215
 - Hydrochlorination of 1,3-Butadiene* / 216
 - Vinyl Chloride* / 216
 - Ethylene Chlorohydrin* / 216
 - Propylene Chlorohydrin* / 216
 - Adiponitrile* / 217
 - Acrylonitrile* / 217
- 6.3. Halogen Addition / 218
 - 6.3.1. Alkenes / 218
 - 6.3.2. Dienes / 222

6.3.3.	Alkynes / 223
6.3.4.	Practical Applications / 225
	<i>Vinyl Chloride / 225</i>
	<i>Chlorination of 1,3-Butadiene / 226</i>
6.4.	Ammonia and Amine Addition / 226
6.4.1.	Alkenes / 227
6.4.2.	Dienes / 228
6.4.3.	Alkynes / 228
6.5.	Hydrometalation / 229
6.5.1.	Hydroboration / 229
	<i>Alkenes / 230</i>
	<i>Dienes / 233</i>
	<i>Alkynes / 234</i>
6.5.2.	Hydroalanaion / 234
6.5.3.	Hydrosilylation / 235
	<i>Alkenes / 237</i>
	<i>Dienes / 238</i>
	<i>Alkynes / 238</i>
6.5.4.	Hydrozirconation / 239
6.6.	Halometalation / 240
6.7.	Solvometalation / 242
6.7.1.	Solvomercuration / 243
6.7.2.	Oxythallation / 244
6.8.	Carbometalation / 244
6.9.	Cycloaddition / 245
References / 249	

7. Carbonylation

268

7.1.	Hydroformylation / 268
7.1.1.	Alkenes / 269
7.1.2.	Dienes and Alkynes / 274
7.1.3.	Synthesis of Aldehydes and Alcohols by the Oxo Reaction / 274
7.2.	Carboxylation / 276
7.2.1.	Koch Reaction / 276
7.2.2.	Carboxylation Catalyzed by Transition Metals / 277
	<i>Alkenes and Dienes / 278</i>
	<i>Alkynes / 279</i>
	<i>Alcohols / 280</i>
7.2.3.	Carboxylation of Saturated Hydrocarbons / 280

7.2.4. Practical Applications / 281

Neocarboxylic Acids / 281

Hydrocarboxymethylation of Long-Chain Alkenes / 281

Propionic Acid / 282

Acrylic Acid and Acrylates / 282

Acetic Acid / 282

Dimethyl Carbonate / 282

7.3. Aminomethylation / 283

References / 283

8. Oxidation–Oxygenation

291

8.1. Oxidation of Alkanes / 291

8.1.1. Oxidation to Alcohols and Carbonyl Compounds / 291

Autoxidation of Alkanes / 291

Oxidation of Methane / 293

Oxidation of Other Saturated Hydrocarbons / 298

8.1.2. Oxidations Resulting in Carbon–Carbon Bond
Cleavage / 308

Metal Oxidants / 308

Electrophilic Reagents / 309

Oxygenolysis / 312

8.2. Oxidation of Alkenes / 312

8.2.1. Epoxidation / 313

Direct Oxidation with Stoichiometric Oxidants / 313

Metal-Catalyzed Epoxidation / 317

Epoxidation Catalyzed by Metalloporphyrins / 320

Asymmetric Epoxidation / 323

8.2.2. Reactions with Molecular Oxygen / 324

Autoxidation / 324

Reactions with Singlet Oxygen / 325

8.2.3. Bis-hydroxylation / 330

8.2.4. Vinylic Oxidation / 334

Oxidation to Carbonyl Compounds / 334

Vinylic Acetoxylation / 338

8.2.5. Oxidative Cleavage / 340

Ozonation / 340

Other Oxidants / 344

8.2.6. Allylic Oxidation / 346

Allylic Hydroxylation and Acyloxylation / 346

*Oxidation to α,β -Unsaturated Carbonyl
Compounds / 349*

- 8.3. Oxidation of Alkynes / 350
 - 8.3.1. Oxidation to Carbonyl Compounds / 351
 - 8.3.2. Oxidative Cleavage / 352
- 8.4. Oxidation of Aromatics / 353
 - 8.4.1. Ring Oxygenation / 353
 - Oxidation to Phenols / 353*
 - Ring Acyloxylation / 357*
 - Oxidation to Quinones / 358*
 - Oxidation to Arene Oxides and Arene Diols / 359*
 - Oxidation with Singlet Oxygen / 360*
 - 8.4.2. Oxidative Ring Cleavage / 361
 - 8.4.3. Benzylic Oxidation / 362
 - Oxidation of Methyl-Substituted Aromatics / 362*
 - Oxidation of Other Arenes / 364*
 - Benzylic Acetoxylation / 365*
- 8.5. Practical Applications / 366
 - 8.5.1. Oxidation of Alkanes / 366
 - Acetic Acid / 366*
 - Oxidation of Cyclohexane / 366*
 - Oxidation of Cyclododecane / 367*
 - sec-Alcohols / 367*
 - 8.5.2. Oxygenation of Alkenes and Dienes / 367
 - Ethylene Oxide / 367*
 - Propylene Oxide / 369*
 - Acetaldehyde and Acetone / 370*
 - Vinyl Acetate / 371*
 - 1,4-Diacetoxy-2-butene / 371*
 - Acrolein and Acrylic Acid / 371*
 - Methacrolein and Methacrylic Acid / 372*
 - 8.5.3. Ammoxidation / 372
 - Acrylonitrile / 372*
 - Other Processes / 374*
 - 8.5.4. Oxidation of Arenes / 374
 - Phenol and Acetone / 374*
 - Benzoic Acid / 375*
 - Terephthalic Acid / 375*
 - Maleic Anhydride / 376*
 - Phthalic Anhydride / 378*
 - Anthraquinone / 380*

9. Heterosubstitution

414

- 9.1. Electrophilic (Acid-Catalyzed) Substitution / 415
 - 9.1.1. Substitution of Alkanes / 415
 - Halogenation / 415*
 - Nitration / 416*
 - Sulfuration / 417*
 - 9.1.2. Substitution of Aromatic Hydrocarbons / 417
 - Halogenation / 418*
 - Nitration / 419*
 - Sulfonation / 421*
 - 9.1.3. Practical Applications / 422
 - Chlorobenzene / 422*
 - Nitration of Benzene and Toluene / 422*
 - Sulfonation of Benzene and Alkylbenzenes / 422*
- 9.2. Free-Radical Substitution / 423
 - 9.2.1. Halogenation of Alkanes and Arylalkanes / 423
 - Chlorination of Alkanes / 424*
 - Fluorination of Alkanes / 426*
 - Side-Chain Chlorination of Arylalkanes / 426*
 - 9.2.2. Allylic Chlorination / 427
 - 9.2.3. Sulfochlorination / 428
 - 9.2.4. Nitration / 428
 - 9.2.5. Practical Applications / 430
 - Chlorination of Alkanes / 430*
 - Side-Chain Chlorination of Toluene / 431*
 - Allyl Chloride / 432*
 - Sulfochlorination of Alkanes / 432*
 - Nitroalkanes / 432*
- 9.3. Amination / 432
- 9.4. Heterosubstitution through Organometallics / 433
 - 9.4.1. Transition Metals / 433
 - 9.4.2. Alkali Metals and Magnesium / 435

10. Reduction-Hydrogenation

446

- 10.1. Heterogeneous Catalytic Hydrogenation / 447
 - 10.1.1. Catalysts / 447
 - 10.1.2. Hydrogenation of Alkenes / 447

- Mechanism* / 448
 - Stereochemistry* / 450
 - 10.1.3. Hydrogenation of Dienes / 452
 - 10.1.4. Transfer Hydrogenation / 453
 - 10.1.5. Hydrogenation of Alkynes / 454
 - 10.1.6. Hydrogenation of Aromatics / 456
- 10.2. Homogeneous Catalytic Hydrogenation / 459
 - 10.2.1. Catalysts / 459
 - 10.2.2. Hydrogenation of Alkenes and Dienes / 460
 - Mechanism* / 460
 - Selectivity and Stereochemistry* / 462
 - Asymmetric Hydrogenation* / 465
 - 10.2.3. Hydrogenation of Alkynes / 466
 - 10.2.4. Hydrogenation of Aromatics / 467
- 10.3. Chemical and Electrochemical Reduction / 470
 - 10.3.1. Reduction of Alkenes / 470
 - 10.3.2. Reduction of Alkynes / 470
 - 10.3.3. Reduction of Aromatics / 473
 - Mechanism* / 474
 - Selectivity* / 474
- 10.4. Ionic Hydrogenation / 476
 - 10.4.1. Hydrogenation of Alkenes and Dienes / 476
 - 10.4.2. Hydrogenation of Aromatics / 480
- 10.5. Hydrogenolysis of Saturated Hydrocarbons / 481
 - 10.5.1. Metal-Catalyzed Hydrogenolysis / 481
 - 10.5.2. Ionic Hydrogenolysis / 487
- 10.6. Practical Applications / 489
 - 10.6.1. Selective Hydrogenation of Petroleum-Refining Streams / 489
 - C₂ Hydrorefining* / 489
 - C₃ Hydrorefining* / 489
 - C₄ Hydrorefining* / 489
 - Gasoline Hydrorefining* / 490
 - 10.6.2. Cyclohexane / 490
 - 10.6.3. Various Hydrogenations / 491

References 491

11. Metathesis

503

- 11.1. Acyclic Alkenes / 505
- 11.2. Ring-Opening Metathesis Polymerization / 512

11.3. Practical Applications / 515

References / 517

12. Oligomerization and Polymerization

524

12.1. Oligomerization / 524

12.1.1. Acid-Catalyzed Oligomerization / 524

Practical Applications / 527

12.1.2. Base-Catalyzed Oligomerization / 528

12.1.3. Metal-Catalyzed Oligomerization / 528

Cyclooligomerization / 530

Practical applications / 532

12.2. Polymerization / 535

12.2.1. Cationic Polymerization / 535

12.2.2. Anionic Polymerization / 541

12.2.3. Free-Radical Polymerization / 544

12.2.4. Coordination Polymerization / 550

Catalysts / 550

Active Centers and Mechanisms / 554

Stereoregular Polymerization of Propylene / 558

Stereoregular Polymerization of Dienes / 564

12.2.5. Conducting Polymers / 567

12.2.6. Practical Applications / 570

Ethylene Polymers / 570

Polypropylene / 572

Polybutylenes / 572

Styrene Polymers / 573

Polydienes / 575

References / 575
