Thin Film Microstructure and Process Simulation Using SIMBAD

Michael J. Brett, Steven K. Dew, and Tom J. Smy

I. Introduction	2
A. Thin Film Microstructure and Its Implications	2
B. Modeling Thin Film Microstructure	3
II. Description of the Transport and Deposition Algorithms	6
A. The SIMSPUD Vapor Transport Model	6
B. The SIMBAD Deposition Model	9
C. SIMBAD Program Structure and User Interface	14
III. Model Verification	15
A. Verification of SIMSPUD	15
B. Verification of SIMBAD	20
IV. Examples of Applications of the SIMBAD/SIMSPUD Models	29
A. Refractory Metal Chemical Vapor Deposition	29
B. Bias Sputtering	30
C. Collimated Sputtering	39
D. Simulation of Film Composition	45
E. High-Temperature Deposition and Bulk Diffusion	49
F. Interpolated Three-Dimensional SIMBAD Model	55
G. Etching Processes	61
V. New Developments in Film Growth Simulation	67
VI. Conclusions	76
References	77

Mathematical Methods for Thin Film Deposition Simulations

S. Hamaguchi

I. Introduction	81
II. The Hamilton–Jacobi Type Equation	84
A. Boundary Motion	84
B. A Spurious Solution	85

C. Characteristics and Slope Discontinuities	87
D. Viscosity Solutions	89
E. Entropy Conditions.	91
F. Geometric Interpretation of Entropy Conditions	95
III. The Shock-Tracking Algorithm	97
IV. Deposition and Etch Rates	98
A. Collisionless Transport.	98
B. The Two-Energy Model	100
C. Ion and Neutral Fluxes.	107
V. Sample Simulations.	110
VI. Summary	113
References	114

A Process Model for Sputter Deposition of Thin Films Using Molecular Dynamics

C.-C. Fang, V. Prasad, R. V. Joshi, F. Jones, and J. J. Hsieh

I. Introduction	118
A. Introductory Remarks	118
B. Sputter Deposition of Thin Films	119
C. Discrepancy between Theory and Experiments	120
D. Simulation of Thin Film Deposition	122
E. Molecular Dynamics Modeling	123
F. Modeling of Sputtering from the Target	125
II. Fundamentals of Molecular Dynamics	126
A. Potential Function	126
B. Sorting Algorithms	128
C. Discretization and Integration Scheme	132
D. Constant Temperature Control Algorithms	134
E. Periodic Boundary Conditions: Fixed versus Moving	142
F. Average Film Stress	144
G. Local Stress Function	145
III. Transport of Sputtered Atoms from Target to Substrate	146
IV. Deposition on Plane Substrates: Microstructure and Stresses	149
A. Effect of Adatom Energy	150
B. Combined Effect of Ion Bombardment and Gas Entrapment on Ni Film	152
C. Effect of Voltage Bias on Film Stresses	156
V. Step Coverage of a Submicron Liner	161
A. Collimated Sputtering	162
B. Low-Pressure/Low-Throw Sputtering	165
VI. Conclusions	169
References	171

Feature Scale Transport and Reaction during Low-Pressure Deposition Processes

Timothy S. Cale and Vadali Mahadev

I. Introduction	176
A. Transport during Deposition Processes	177
B. Chemical Reaction Kinetics	179
C. Transport and Reaction Simulations	180
II. Chemistry	181
A. Reaction Stoichiometry	183
B. Global Rate Expressions	185
C. Reaction Mechanisms	186
III. Low-Pressure Transport	188
A. Coordinate Systems	188
B. Single Particle Distribution Function	189
C. Fluxes	189
D. Flux Distributions	191
IV. Ballistic Transport and Reaction Model	193
A. Model Statements	193
B. Gas/Solid Interactions	194
C. Diffuse Re-emission	194
D. Specular Transport	197
E. Surface Species	200
F. Solution of Governing Equations	201
V. LPCVD of Silicon Dioxide from TEOS	202
A. BTRM for LPCVD	202
B. Kinetics Models	203
C. Results	205
D. Simulation Using Sandia's Mechanism	209
VI. Plasma-Enhanced Chemical Vapor Deposition of Silicon Dioxide from TEOS	210
A. Experimental	211
B. Model Development	212
C. Results	213
VII. Remote Microwave PECVD of Silicon Dioxide from TEOS	215
A. Experimental	216
B. Model Development	216
C. Results	219
VIII. Uncollimated and Collimated TiN PVD	226
A. Experimental	226
B. Uncollimated PVD of TiN	226
C. Collimated PVD of TiN	227
IX. Composition of PVD Titanium–Tungsten Films	229
A. Composition Profiles	232
B. First Experiments	232
C. Model Development	233
D. Second Experiments	235
E. Simulations	238

X. Simultaneous Deposition and Sputter Etch	241
A. IMS Deposition of Aluminum	242
B. ECR Deposition of SiO_2	243
C. Simulations	243
XI. Curvature-Driven Surface Diffusion	252
A. Experiment	253
B. Model Development	253
XII. Programmed Rate CVD of Tungsten	265
A. Programmed Rate CVD	266
B. Experimental	266
XIII. Conclusions	269
References	271
Author Index	277
Subject Index	285
