No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the Publisher.

The appearance of the code at the bottom of the first page of a chapter in this book indicates the Publisher's consent that copies of the chapter may be made for personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (222 Rosewood Drive, Danvers, Massachusetts 01923), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1997 chapters are as shown on the title pages, if no fee code appears on the title page, the copy fee is the same as for current chapters.

Contents

PREFACE	xi
---------------	----

Cell Cycle Checkpoints and Apoptosis: Potential for Improving Radiation Therapy

RUTH J. MUSCHEL, W. GILLIES MCKENNA, AND ERIC J. BERNHARD

I. Introduction	1
II. Apoptosis	2
III. Linkage of Cell Cycle Checkpoints to Apoptosis	4
IV. Regulation of Cell Proliferation and the Control of Apoptosis	6
V. Effect of Oncogenes on Radiation-Induced Apoptosis	14
VI. Therapeutic Implications	17
References	18

Structure and Function of Interleukin-1 β Converting Enzyme

MICHAEL J. TOCCI

I. Introduction	27
II. The IL-1 System	28
III. Molecular and Biochemical Characterization of ICE	30
IV. ICE Gene Family Members	48
V. Biological Role of ICE	51
VI. Summary	55
References	56

The Role of the IGF-I Receptor in Apoptosis

RENATO BASERGA, MARIANA RESNICOFF, CONSUELO D'AMBROSIO,
AND BARBARA VALENTINIS

I. Introduction	65
II. The IGF-I Receptor in Mitogenesis	67
III. The Signal-Transducing Pathways of the IGF-I Receptor	68

IV.	The IGF-I Receptor in Transformation	69
V.	Mutational Analysis of the IGF-I Receptor	71
VI.	The IGF-I Receptor and Its Ligands in Apoptosis	75
VII.	The <i>in Vivo</i> Method for Determining the Extent of Apoptosis	76
VIII.	The IGF-I Receptor Protects Tumor Cells from Apoptosis <i>in Vivo</i>	77
IX.	The IGF-I Receptor and Apoptosis in Normal Cells	81
X.	Dominant Negatives	82
XI.	Critique of Antisense Strategies	84
XII.	Mechanisms	86
XIII.	Host Response	88
XIV.	Significance	90
	References	91

Bcl-2 Family Proteins and the Hormonal Control of Cell Life and Death in Normalcy and Neoplasia

JOHN C. REED

I.	Introduction	99
II.	The Bcl-2 Protein Family	100
III.	Mechanisms of Bcl-2 Protein Action	102
IV.	Bcl-2 Family Proteins as Determinants of Tumor Resistance to Chemotherapeutic Drugs, Glucocorticoids, Retinoids, Antiandrogens, and Antiestrogens	112
V.	<i>In Vivo</i> Patterns of Bcl-2 Family Gene Expression in Hormone- Dependent Tissues and Tumors Derived from Them	115
VI.	Conclusions	128
	References	128

Pathways of p53-Dependent Apoptosis

LUIGI GRASSO AND W. EDWARD MERCER

I.	Introduction	139
II.	Dual Personality of the p53 Tumor Suppressor Protein	140
III.	Oncogene-Driven p53-Dependent Apoptosis	145
IV.	Coupling of p53-Dependent Cell Cycle Regulatory Pathways and Apoptosis	151
V.	Downstream Effector Genes of p53-Dependent Apoptosis: The Bcl-2 Bax Connection	156
VI.	Growth Factors, Cytokines, and Survival Factors	158
VII.	Role of p53-Mediated Modulation of Transcription	160
	References	162

Viral Inhibitors of Apoptosis

ANTHONY G. UREN AND DAVID L. VAUX

I. Introduction	175
II. Viral Proteins That Resemble Bcl-2	178
III. Viral Proteins That Inactivate p53	180
IV. Inactivators of Apoptotic Cysteine Proteases	180
V. Inhibitor of Apoptosis Proteins	183
VI. Virus-Encoded Cytokine Regulators	184
VII. Other Viral Inhibitors of Apoptosis	185
VIII. Conclusions	186
References	187
