

Handbook of Diamond Technology

Editor:

W.R. Fahrner

**University of Hagen, Chair of Electronic Devices
Hagen, Germany**

ttp TRANS TECH PUBLICATIONS LTD
Switzerland • Germany • UK • USA

Table of Contents:

1.	Characterization techniques	1
1.1	Optical techniques (<i>A. M. Zaitsev</i>)	1
1.2	Non-optical techniques (<i>A. M. Zaitsev</i>)	234
2.	Surface structuring	317
2.1	Structuring, polishing, and etching (<i>A. M. Zaitsev</i>)	317
2.2	Hydrogen plasma treatment (<i>A. V. Denisenko</i>)	358
3.	Doping techniques	375
3.1	Ion implantation (<i>H. Gabor, W. R. Fahrner</i>)	375
3.1.1	Monte Carlo simulations	375
3.1.2	Experimental range data	411
3.1.3	Damage, doping efficiencies	455
3.2	In situ doping (<i>A. V. Denisenko, H. Gabor</i>)	482
3.3	Doping by diffusion (<i>A. V. Denisenko</i>)	483
4.	Packaging	485
4.1	Phase diagrams (<i>R. Eibl, J. Bonhaus, W. R. Fahrner</i>)	485
4.1.1	General considerations	485
4.1.2	The binary carbon-metal systems	486
4.1.3	The binary metal-metal systems	501
4.2	Metal contacts on diamond (<i>R. Eibl, J. Bonhaus, W. R. Fahrner</i>)	517
4.2.1	General considerations	517
4.2.2	Preparation of the diamond surface	518
4.2.3	One-layer contacts	523
4.2.4	Multilayer contacts	552
4.2.5	Further investigations on one layer and multilayer contacts	574
4.2.6	Measurements of spreading and contact resistances	575
4.3	Formation enthalpies of metal oxides (<i>R. Eibl, J. Bonhaus, W. R. Fahrner</i>)	581
4.4	Bonding on diamond (<i>R. Job, H. Gabor</i>).....	584
4.4.1	Introduction	584
4.4.2	Formation of low resistance metallic layers on diamond surfaces	585
4.4.3	Die bonding on diamond surfaces	588

4.4.4	Final remarks	593
5.	Numerical simulation (A. V. Denisenko)	645
5.1	Electrical simulation	645
5.1.1	Material properties of diamond	645
5.1.2	p-i-p diode on insulator with traps	651
5.1.3	Numerical simulation of diamond based transistors with the intrinsic channel	657
5.2	Thermal simulation of diamond heat spreaders	661
5.2.1	Heat spreader efficiency	661
5.2.2	Effect of ^{13}C isotope content	664
