

COMPUTER SCIENCE, TECHNOLOGY AND APPLICATIONS

DATA MINING AND MANAGEMENT

LAWRENCE I. SPENDLER
EDITOR

Nova Science Publishers, Inc.
New York

CONTENTS

Preface		vii
Chapter 1	Cognitive Finance: Data Analysis with a Behavioral Edge <i>Philipp Erik Otto</i>	1
Chapter 2	Data Mining Perspective of the Indian Mineral Industry <i>Mrinal K. Ghose</i>	39
Chapter 3	Adding Time Dimension to XML <i>Khadija Abied Ali and Jaroslav Pokorný</i>	101
Chapter 4	Statistical Learning Methods for Combining Technical Trading Rules and Predicting the Stock Markets <i>Fernando Fernández-Rodríguez, Julián Andrada-Félix and Eduardo Acosta-González</i>	141
Chapter 5	Model Selection using Data Mining <i>Fernando Fernández-Rodríguez, Julián Andrada-Félix and Eduardo Acosta-González</i>	159
Chapter 6	Managing Building Information Models <i>Umit Isikdag and Jason Underwood</i>	175
Chapter 7	Modeling the Auditors' Opinions by Using Association Rules <i>Efstathios Kirkos</i>	193
Chapter 8	Spatio-Temporal Data Management for Environmental Modeling of Dust Dispersion Over Opencast Coal Mining Areas <i>Lubos Matejicek</i>	209
Chapter 9	Challenges and Future Trends in Querying Semantic Web Data Streams <i>Sven Groppe and Jinghua Groppe</i>	225
Chapter 10	A New Co-Training Method for Data Mining <i>Chang-Hwan Lee and Jungjin Yang</i>	241

Chapter 11	HESTIA: Historically-Enabled Spatio-Temporal Information Anonymity	253
	<i>Aris Gkoulalas-Divanis and Vassilios S. Verykios</i>	
Chapter 12	Binomial P-Spline Regression for Anomaly Detection in Cohort Mortality Patterns	283
	<i>Grzegorz A. Rempala, Ryan S. Gill and Fadden G. Holden</i>	
Index		307
