

**Application, Protection and Regeneration of Palladium as
Hydrodechlorination Catalyst for Chlorinated
Organic Pollutants**

Von der Fakultät für Chemie und Mineralogie
der Universität Leipzig
genehmigte

DISSERTATION

zur Erlangung des akademischen Grades

DOCTOR RERUM NATURALIUM

(Dr. rer. nat.)

vorgelegt

von M. Sc. Dalia Angeles-Wedler

geboren am 29. Juli 1975 in Irosin, Philippinen

Angenommen aufgrund der Gutachten von:

Prof. Dr. Frank-Dieter Kopinke

Prof. Dr. Martin Reinhard

Tag der Verleihung: 20.12.2010

Table of Contents

1. General Introduction	1
1.1. Chlorinated organic compounds (COCs) in the environment.....	1
1.2. Palladium-catalyzed hydrodechlorination as remediation technique for COCs	6
1.3. Activity and performance of palladium-based catalysts	9
1.4. Deactivation and regeneration of palladium catalysts	13
1.5. Aims and objectives of this thesis.....	17
1.6. References.....	19
2. Overview of the Following Manuscripts.....	27
3. Permanganate Oxidation of Sulfur Compounds to Prevent Poisoning of Pd Catalysts in Water Treatment Processes	31
4. Sulfide-induced Deactivation of Pd/Al ₂ O ₃ as Hydrodechlorination Catalyst and its Oxidative Regeneration with Permanganate	53
5. Pd-catalyzed Hydrodechlorination of Chlorinated Aromatics in Contaminated Waters: Effects of Surfactants, Organic Matter and Catalyst Protection by Silicone Coating	71
6. Summary/ Zusammenfassung	92
7. Bibliography.....	101
Acknowledgements	113
Curriculum Vitae.....	114
