

Marie E. Schmidt

Integrating Routing Decisions in Public Transportation Problems

Springer

Contents

1	Introduction	1
1.1	Overview	1
1.2	Outline	4
1.3	Basic Concepts Used in This Book	5
2	Line Planning	9
2.1	Introduction to Line Planning	9
2.1.1	Line Planning Problems	9
2.1.2	Literature Overview	12
2.1.3	The Line Planning Problems Considered in This Book	14
2.1.4	Outline of the Line Planning Chapter	20
2.2	Modeling Line Planning with Routing	20
2.2.1	The Change-and-Go Network	21
2.2.2	Line Planning in the Change-and-Go Network	23
2.2.3	The Line Network	25
2.2.4	Uncapacitated Line Planning in the Line Network	28
2.3	Solving Line Planning When Part of the Solution Is Fixed	30
2.3.1	Solving Uncapacitated Line Planning When Part of the Solution Is Fixed	30
2.3.2	Solving Capacitated Line Planning When Part of the Solution Is Fixed	31
2.4	Classification of Line Planning Problems with Routing	33
2.5	Uncapacitated Line Planning with Routing	35
2.5.1	Uncapacitated Line Planning in General Networks	35
2.5.2	Uncapacitated Line Planning in Linear Networks	44
2.6	Capacitated Line Planning with Routing	60
2.6.1	Complexity of Capacitated Line Planning with Routing	60
2.6.2	Integer Programming Formulations	64

3 Timetabling	73
3.1 Introduction to Timetabling	73
3.1.1 Timetabling Problems	73
3.1.2 Literature Overview	76
3.1.3 The Timetabling Problem Considered in This Book	79
3.1.4 Outline of the Timetabling Chapter	81
3.2 Modeling Timetabling with Routing Using Event-Activity Networks	82
3.3 Solving Timetabling When Part of the Solution Is Fixed	85
3.4 Complexity of Timetabling with Routing	88
3.4.1 NP-Hardness of Timetabling with Routing	88
3.4.2 Inapproximability of Timetabling with Routing	92
3.5 Timetabling with Routing Between Events	97
3.6 An Exact Algorithm for Timetabling with Routing	99
3.7 Integer Programming Formulations	101
3.7.1 Flow-Based Formulation	102
3.7.2 Virtual-Activity-Based Formulation	108
4 Delay Management	113
4.1 Introduction to Delay Management	113
4.1.1 Delay Management Problems	113
4.1.2 Literature Overview	117
4.1.3 The Delay Management Problem Considered in This Book	120
4.1.4 Outline of the Delay Management Chapter	122
4.2 Modeling Delay Management with Routing Using Event-Activity Networks	123
4.3 Solving Delay Management When Part of the Solution Is Fixed	126
4.4 Complexity of Delay Management with Routing	130
4.4.1 NP-Hardness of Delay Management with Routing for One OD-Pair	131
4.4.2 An Algorithm for Delay Management with Routing with One OD-Pair	136
4.4.3 NP-Hardness of Delay Management with Routing for Instances with NTT Property	151
4.4.4 Inapproximability of Delay Management with Routing	155
4.5 Integer Programming Formulation	162
5 An Iterative Solution Approach for General Network Problems with Routing	167
5.1 Classification of Network Problems with Routing	167
5.2 An Iterative Heuristic	173
5.3 The Price of Sequentiality	175
5.4 Analysis of the Iterative Heuristic for Timetabling with Routing	176

- 5.5 Analysis of the Iterative Heuristic for Arc Speed-Up 181
 - 5.5.1 Definition of the Problem Arc Speed-Up 181
 - 5.5.2 The Iterative Heuristic for Arc Speed-Up 183
 - 5.5.3 Solving Arc Speed-Up Exactly 185
 - 5.5.4 The Price of Sequentiality for Arc Speed-Up 186
- 6 Conclusions and Outlook 207
- Frequently Used Notation 213
- References 217
- Index 225
