Analysis of Censored Data

**Proceedings of the Workshop on Analysis of Censored Data,
December 28, 1994—January 1, 1995, University of Pune,
Pune, India**

Hira L. Koul and Jayant V. Deshpande, Editors

TABLE OF CONTENTS

Maximum modified kernel likelihood estimation of the intensity for a counting process	ANILKUMAR, P. AND NAIK-NIMBALKAR, U.	1
The marginal distributions of life time variables which right censor each other BEDFORD, T. AND MEILIJSO, I.		11
On Kolmogorov-Smirnov type tests for NB(W)UE alternates under censoring schemes	BHATTACHARJEE, M.C., AND SEN, P.K.	25
Markov Mesh models for filtering and forecasting with leading indicators CHEN, J., LYNN, N. AND SINGPURWALLA, N.		39
Exploratory methods in survival analysis CROWLEY, J., LEBLANC, M., GENTLEMAN, R., AND SALMON, S.		55
Competing risks in bioassay: A nonparametric Bayesian approach DESHPANDE, J.V. AND KARIA, S.R.		79
Consistency of Bayesian inference for survival analysis with or without censoring GHOSH, J.K. AND RAMAMOORTHY, R.V.		95
Nonparametric estimators for interval censoring problems GROENEBOOM, P.		105
Maximum likelihood estimation for proportional odds regression model with current status data	HUANG, J.	129
A review of some distribution free tests for the equality of cause specific hazard rates	KOCHAR, S.C.	147
Remarks on Cramer-Rao type intergal inequalities for randomly censored data PRAKASA RAO, B.L.S.		163
Censoring in theory and practice: statistical perspective and controversies SEN, P.K.		177
Graphical tools for censored survival data	SENGUPTA, D.	193
Ranking and subset selection procedure for populations with censored data: A review	SINGH, H. AND GILL, A.N.	219
Statistical analysis of Kaplan-Meier integrals	STUTE, W.	231

Comparing cause specific hazard rates of a competing risks model with censored data	SUN, Y AND TIWARI, R.C.	255
Interval censoring, Case 2: alternative hypotheses	WELLNER, J.	271
